

**FICO**<sup>®</sup>

**FAIR ISAAC CORPORATION**

**2019 ANNUAL REPORT**

Shareholders:

FICO had a remarkable fiscal 2019. Our revenue grew 16% to \$1.16 billion, and our free cash flow grew 69% year over year to \$90 million. In the 4<sup>th</sup> quarter, we delivered \$55 million of GAAP net income, up 67%, and GAAP earnings of \$1.80 per share, up 69%.

I am pleased with the strength in both of our businesses – scores and software.

### Scores

In our Scores business we had another very successful year. Revenues were up 25% for the year, driven primarily by strong growth in B2B Scores. We continue to seek opportunities for growth in scores through innovation and geographic expansion. At our FICO World conference in November, we announced the pilot phase for our UltraFICO™ Score, built on consumer-permissioned data. We anticipate additional innovations in scores will be released in 2020.

### Software

Overall, our software business performed very well, with annual revenue up 11%. We continue to deliver more of our products in the cloud, with full-year SaaS revenues increasing 12% and SaaS bookings up 24%.

We delivered 7% growth overall in the applications segment. The biggest growth came from our fraud and compliance solutions, with both up double-digits over the previous year. In the last three months, we announced FICO® Falcon® X, which combines fraud management and financial crime compliance, leveraging the IP in our Falcon® franchise and in the compliance solutions from our TONBELLER acquisition in 2015. Our FICO® Cyber Risk Score is now the first cyber rating available on the AWS Marketplace. Also, we launched new solutions for biometric customer authentication and validation, which are the result of acquiring eZmCom, Inc. in 2019.

In our decision management segment, we see continued strength, with revenue growth of 34% over fiscal 2018. This platform, which we have been developing for several years, is meeting the growing need for analytics-driven decisioning software.

### Looking Forward

In late 2019, we made two important leadership changes. Claus Moldt, who joined us in 2016 as CIO, became our CTO. Claus has tremendous industry experience driving cloud adoption and he is helping us accelerate our transition to a platform-based, cloud-first company. This transition has involved several years of heavy investment as we aim to dramatically scale our decisioning software business. We have been able to make this transition without significant disruption to our income statement, as we have shifted from up-front license to ratable cloud revenue. In addition, Michael McLaughlin joined FICO as our CFO. Mike brings tremendous software industry experience and is already having a great impact on our business.

As we move into FY20, I am pleased with the progress we have made, and am excited about what lies ahead. In November 2019, we sold out our FICO World conference in New York, with a record-setting 1,400 attendees. This reflects the growing demand for our innovations in AI and machine learning, our decision management platform, our industry-standard scores and our analytics-powered, cloud-based applications.

In scores, we aim to maintain our leadership. In software, we believe that we are entering an era where data-driven decisioning is of paramount importance. Every B2C company is focused on how to improve its relationship with its consumer customers. Our aim is to be the preeminent decisioning platform for B2C companies to optimize their interactions with consumers.

We look forward to an excellent 2020.

A handwritten signature in black ink that reads "William Lansing". The signature is written in a cursive, slightly slanted style.

William Lansing  
CEO

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each Class</u>	<u>Trading Symbol(s)</u>	<u>Name of each exchange on which registered</u>
Common Stock, \$0.01 par value per share	FICO	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:  
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large Accelerated Filer	<input checked="" type="checkbox"/>	Accelerated Filer	<input type="checkbox"/>
Non-Accelerated Filer	<input type="checkbox"/>	Smaller Reporting Company	<input type="checkbox"/>
		Emerging Growth Company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).  Yes  No

As of March 31, 2019, the aggregate market value of the registrant's common stock held by non-affiliates of the registrant was \$5,769,737,106 based on the last transaction price as reported on the New York Stock Exchange on such date. This calculation does not reflect a determination that certain persons are affiliates of the registrant for any other purposes.

The number of shares of common stock outstanding on October 25, 2019 was 28,961,612 (excluding 59,895,171 shares held by the Company as treasury stock).

Items 10, 11, 12, 13 and 14 of Part III incorporate information by reference from the definitive proxy statement for the Annual Meeting of Stockholders to be held on March 4, 2020.

## FORWARD LOOKING STATEMENTS

*Statements contained in this report that are not statements of historical fact should be considered forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995 (the “PSLRA”). In addition, certain statements in our future filings with the Securities and Exchange Commission (“SEC”), in press releases, and in oral and written statements made by us or with our approval that are not statements of historical fact constitute forward-looking statements within the meaning of the PSLRA. Examples of forward-looking statements include, but are not limited to: (i) projections of revenue, income or loss, expenses, earnings or loss per share, the payment or nonpayment of dividends, capital structure and other statements concerning future financial performance; (ii) statements of our plans and objectives by our management or Board of Directors, including those relating to products or services, research and development, and the sufficiency of capital resources; (iii) statements of assumptions underlying such statements, including those related to economic conditions; (iv) statements regarding results of business combinations; (v) statements regarding business relationships with vendors, customers or collaborators, including the proportion of revenues generated from international as opposed to domestic customers; and (vi) statements regarding products, their characteristics, performance, sales potential or effect in the hands of customers. Words such as “believes,” “anticipates,” “expects,” “intends,” “targeted,” “should,” “potential,” “goals,” “strategy,” “outlook,” and similar expressions are intended to identify forward-looking statements, but are not the exclusive means of identifying such statements. Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from those in such statements. Factors that could cause actual results to differ from those discussed in the forward-looking statements include, but are not limited to, those described in Item 1A of Part I, Risk Factors, below. The performance of our business and our securities may be adversely affected by these factors and by other factors common to other businesses and investments, or to the general economy. Forward-looking statements are qualified by some or all of these risk factors. Therefore, you should consider these risk factors with caution and form your own critical and independent conclusions about the likely effect of these risk factors on our future performance. Such forward-looking statements speak only as of the date on which statements are made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which such statement is made to reflect the occurrence of unanticipated events or circumstances. Readers should carefully review the disclosures and the risk factors described in this and other documents we file from time to time with the SEC, including our reports on Forms 10-Q and 8-K to be filed by the Company in fiscal 2020.*

## PART I

### Item 1. *Business*

#### GENERAL

Fair Isaac Corporation (NYSE: FICO) (together with its consolidated subsidiaries, the “Company,” which may also be referred to in this report as “we,” “us,” “our,” and “FICO”) provides products, solutions and services that enable businesses to automate, improve and connect decisions to enhance business performance. Our predictive analytics, which includes the industry-standard FICO® Score, and our decision management systems leverage the use of big data and mathematical algorithms to predict consumer behavior and power hundreds of billions of customer decisions each year.

We were founded in 1956 on the premise that data, used intelligently, can improve business decisions. Today, we help thousands of companies in over 100 countries use our decision management technology to target and acquire customers more efficiently, increase customer value, reduce fraud and credit losses, lower operating expenses, and enter new markets more profitably. Most leading banks and credit card issuers rely on our solutions, as do insurers, retailers, telecommunications providers, automotive companies, pharmaceutical companies, healthcare organizations, public agencies and organizations in other industries. We also serve consumers through online services that enable people to purchase and understand their FICO® Scores, the standard measure in the U.S. of consumer credit risk, empowering them to manage their financial health.

More information about us can be found on our website, [www.fico.com](http://www.fico.com). We make our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q and our Current Reports on Form 8-K, as well as amendments to those reports, available free of charge through our website as soon as reasonably practicable after we electronically file them with the SEC. References to our website address in this report do not constitute an incorporation by reference. Information on our website is not part of this report.

#### PRODUCTS AND SERVICES

We use analytics to help businesses automate, improve and connect decisions across their enterprise, an approach we commonly refer to as decision management. Most of our solutions address customer engagement, including customer acquisition, customer onboarding, customer servicing and management, and customer protection. We also help businesses improve non-customer decisions such as transaction and claims processing. Our solutions enable users to make decisions that are more precise, consistent and agile, and that systematically advance business goals. This helps our clients to reduce the cost of doing business, increase revenues and profitability, reduce losses from risks and fraud, and increase customer loyalty.

#### Our Segments

We categorize our products and services into the following three operating segments:

- *Applications.* This segment includes pre-configured decision management applications designed for a specific type of business problem or process — such as marketing, account origination, customer management, fraud, collections and insurance claims management — as well as associated professional services. These applications are available to our customers as on-premises software, and many are available as hosted, software-as-a-service (“SaaS”) applications through the FICO® Analytic Cloud or third-party public clouds, such as those provided by Amazon Web Services (“AWS”).
- *Scores.* This segment includes our business-to-business scoring solutions and services, our business-to-consumer scoring solutions and services including myFICO® solutions for consumers, and associated professional services. Our scoring solutions give our clients access to analytics that can be

easily integrated into their transaction streams and decision-making processes. Our scoring solutions are distributed through major credit reporting agencies worldwide, as well as services through which we provide our scores to clients directly.

- *Decision Management Software.* This segment is composed of analytic and decision management software tools that clients can use to create their own custom decision management applications, our FICO® Decision Management Suite, as well as associated professional services. These tools are available to our customers as on-premises software, through the FICO® Analytic Cloud or third-party public clouds, such as those provided by AWS.

## **Our Solutions**

Our solutions involve four fundamental disciplines:

- Analytics, which include predictive analytics that identify risks and opportunities associated with individual customers, prospects and transactions, in order to detect patterns such as risk and fraud, as well as optimization analytics that are used to improve the design of decision logic or “strategies.”
- Data management and transaction profiling that bring extensive consumer information to every decision.
- Software such as decision management systems that author and implement business rules, models and decision strategies, often in a real-time environment, as well as software for managing customer engagement.
- Consulting services that help clients make the most of investments in FICO applications, tools and scores in the shortest possible time.

All of our solutions are designed to help businesses make decisions that are faster, more precise, more consistent and more agile, while reducing costs and risks incurred in making decisions. In addition, we offer our clients a portfolio of applications, tools and services in the cloud, which allow them to create, customize, deploy and manage powerful analytic services.

### ***Applications***

We develop industry-tailored decision management applications, which apply analytics, data management and decision management software to specific business challenges and processes. Our applications primarily serve clients in the banking, insurance, telecommunications, healthcare, retail and public sectors. During fiscal 2019, we continued to expand our product offerings for the FICO® Analytic Cloud and AWS, resulting in increased sales opportunities by accommodating small to mid-size businesses that benefit from the affordability and simplicity of cloud-based solutions. Within our Applications segment, our fraud solutions accounted for 18%, 17%, and 19% of total revenues in each of fiscal 2019, 2018 and 2017, respectively; our customer communication services accounted for 9%, 10%, and 10% of total revenues for each of these periods, respectively; and our customer management solutions accounted for 6%, 8%, and 8% of total revenues in each of these periods, respectively.

### ***Marketing Applications***

FICO® Marketing Solutions Suite is made up of products, capabilities and services designed to integrate the technology and analytic services needed to perform context-sensitive customer acquisition, cross-selling and retention programs and deliver mathematically optimized offers. The Marketing Solutions Suite enables companies that offer multiple products and use multiple channels (companies such as large financial institutions, consumer branded goods companies, pharmaceutical companies, retail merchants and hospitality companies) to execute more efficient and profitable customer interactions. Services offered in our marketing solutions include

customer data integration services; services that enable real-time marketing through direct consumer interaction channels; campaign management, messaging and optimization services; interactive tools that automate the design, execution and collection of customer response data across multiple channels; and customer data collection, management and profiling services.

#### *Originations Applications*

We provide solutions that enable banks, credit unions, finance companies, alternative peer-to-peer and online lenders, auto lenders and other companies to automate and improve the processing of requests for credit or service. These solutions increase the speed and efficiency with which requests are handled, reduce losses and increase approval rates through analytics that assess applicant risk, and reduce the need for manual review by loan officers.

FICO® Origination Manager, an application-to-decision processing solution, is available both on premises and in the FICO® Analytic Cloud. Other solutions include the web-based FICO® LiquidCredit® service, which is primarily focused on credit decisions and offered largely to mid-tier banking institutions. Delivered as a cloud service, FICO® Origination Manager Essentials offers mid-market organizations the ability to inexpensively set up and process small business applications quickly, without a long or difficult implementation process. We also offer custom and consortium-based credit risk and application fraud models.

#### *Customer Management Applications*

Our customer strategy management products and services enable businesses to automate and improve risk-based decisions for their existing customers. These solutions help businesses apply advanced analytics in account and customer decisions to increase portfolio revenue, decrease risk exposure and losses, and reduce customer attrition, while improving operational efficiencies.

We provide customer strategy management solutions for banking, telecommunications and retail. FICO® TRIAD® Customer Manager, a leading credit management system, is available both on-premises and in the FICO® Analytic Cloud. The solution is an adaptive control system, which enables businesses to rapidly adapt to changing business and internal conditions by designing and testing new strategies in a “champion/challenger” environment. The current version enables users to manage risk and communications at both the account and customer level from a single platform.

We market and sell FICO® TRIAD® Customer Manager software licenses, maintenance, consulting services, and strategy design and evaluation. Additionally, we provide TRIAD services and similar credit account management services through third-party credit card processors worldwide, including two of the largest processors in the U.S.

#### *Fraud and Security Management Applications*

Our fraud management products improve our clients’ profitability by predicting the likelihood a given transaction or customer account is experiencing fraud. Our fraud products analyze transactions in real time and generate recommendations for immediate action, which is critical to stopping third-party fraud, as well as first-party fraud and deliberate misuse of account privileges.

Our solutions are designed to detect and prevent a wide variety of fraud and risk types across multiple industries, including credit and debit payment card fraud; e-payment fraud; deposit account fraud; identity theft; healthcare fraud; Medicaid and Medicare fraud; and property and casualty insurance claims fraud, including workers’ compensation fraud. FICO fraud solutions protect financial institutions, insurance companies and government agencies from losses and damaged customer relationships caused by fraud and related criminal behavior.

Our leading fraud detection solution is the FICO® Falcon® Platform, recognized as a leader in global payment card fraud detection. The Falcon® Platform examines transaction, cardholder, account, customer, device and merchant data to detect a wide range of payment card fraud quickly and accurately utilizing artificial intelligence technology. It analyzes payment transactions in real time, assesses the risk of fraud in a fraud score, and provides the ability for user-defined variables and rules strategies to be used in conjunction with the fraud score to prevent fraud while expediting legitimate transactions. Adaptive analytics, a form of self-learning models, can also be employed to accelerate our customers' response to evolving fraud tactics.

In September 2019, FICO introduced FICO® Falcon® X, a unified platform for the detection and investigation of both fraud and financial crimes. We also announced the FICO® Financial Crimes Studio, which allows banks' data science teams to develop machine learning models using open source libraries, as well as FICO machine learning libraries, and then deploy the models on FICO® Falcon® X for operational use.

FICO® Fraud Predictor with Merchant Profiles is used in conjunction with the Falcon® Platform to improve fraud detection rates through the inclusion of merchant profiles, which is especially important for online transactions. Merchant profiles are built using fraud and transactional data that include characteristics revealing which merchants have a history of higher fraud volumes, and which purchase types and ticket sizes have most often been fraudulent at a particular merchant, among others.

FICO® Card Compromise Manager is used in conjunction with the FICO® Falcon® Platform to identify point-of-sale and e-commerce card compromises with analytically derived recommended actions — such as card block and reissue, or watch-listing — to optimize loss prevention. Separately, the FICO® Card Alert Service prevents ATM debit fraud by identifying counterfeit payment cards and reporting them to issuers. The service analyzes daily transactions from participating networks and uses this data to identify common points of compromise and suspect cards most likely to incur fraud.

In addition to our Falcon® products, we offer a wide range of solutions focused on preventing and detecting a variety of financial crimes. FICO® Application Fraud Manager helps businesses prevent both first- and third-party fraud during the application process. By preventing fraud prior to account origination, we help our customers avoid future losses as well as unnecessary collections costs. FICO® Identity Resolution Engine helps organizations detect and investigate organized criminal behavior using graph analytics to identify entities and their connections across federated data sources.

FICO® Insurance Fraud Manager uses advanced unsupervised modeling techniques to detect health care claims fraud, abuse and errors as soon as unusual behavior patterns emerge. Insurance Fraud Manager is used by both public and private health care payers to detect and prevent fraud in both pre- and post-pay fraud investigation environments.

FICO offers a comprehensive modular set of compliance solutions to fight money-laundering, terrorist financing, and to fulfill custom requirements for governance, risk and compliance.

In August 2019, FICO acquired EZMCOM, Inc. (“EZMCOM”) to provide both identity proofing (“ID proofing”) and user authentication solutions. ID proofing is the digital process of on-boarding new customers without requiring face-to-face verification. The technology provides an extra layer of security that is easy to use, with minimal customer inconvenience, thereby preventing fraud as well as ensuring regulatory compliance standards such as e-KYC are met. User authentication is the real-time corroboration of an identity previously established to enable his or her access to an electronic or digital asset. As an authentication hub, FICO's technology includes multifactor, biometric, and behavioral (user and device-based) capabilities.

FICO's cybersecurity products utilize predictive analytics to deliver enterprise-level risk assessments. The FICO® Cyber Risk Score provides an empirically derived score that conveys the security posture of an organization and the likelihood of a material data breach in the next twelve months. The score is used to manage

the cyber risk of an enterprise as well as to assess third-party risk that may be introduced by third-party partners and suppliers.

#### *Collections & Recovery Applications*

FICO® Debt Manager™, FICO® Debt Manager™ Pro, FICO® Debt Manager™ Pro Plus, FICO® PlacementsPlus® service and Placement Optimizer<sup>SM</sup> solution (collectively, the “FICO Debt Management Solutions”) automate the full cycle of collections and recovery, including early collections, late collections, asset disposal, agency placement and optimization, recovery, litigation, bankruptcy, asset management and residual balance recovery. PlacementsPlus service facilitates control over the distribution and management of accounts to agencies, attorneys, debt buyers and internal recovery departments. Placement Optimizer maximizes the effectiveness of the placement strategy once accounts are outsourced. FICO Debt Management Solutions also include assessments, models and scores, predictive analytics, advanced customer engagement and optimization. FICO® Debt Manager™ is available both on premises and in the FICO® Analytic Cloud.

#### *Customer Communication Services*

FICO® Customer Communication Services provide customer engagement, fraud resolution, and collection solutions in the cloud. It enables financial services institutions, utilities, telecommunications firms, insurers, and other businesses to engage in automated two-way communications. It allows businesses to reach customers in real time using short message service (“SMS”), mobile applications, automated voice, email and other channels; resolve matters such as verification of suspicious credit or debit card transactions; request missed payments; and resolve customer service issues. FICO® Customer Communication Services, combined with FICO’s decision management applications, allow businesses to execute and resolve customer interactions while improving customer outcomes.

#### *Analytic Services*

We perform custom predictive, descriptive and decision modeling and related analytic projects for clients in multiple industries to address business processes across the customer life cycle. This work leverages our analytic methodologies and expertise to solve risk management and marketing challenges for a single business, using that business’s data and industry best practices to develop a highly customized solution. Most of this work falls under predictive analytics, decision analysis and optimization, which provide greater insight into customer preferences and future customer behavior. Within decision analysis and optimization, we apply data and proprietary algorithms to the design of customer treatment strategies.

#### *Scores*

Our FICO® Scores are used in the majority of U.S. credit decisions, by nearly all of the major banks, credit card organizations, mortgage lenders and auto loan originators. These credit scores, developed based on third-party data, provide a consistent and objective measure of an individual’s credit risk. Credit grantors use our FICO® Scores in a variety of ways: to prescreen candidates for marketing programs; to evaluate applicants for new credit; and to manage existing customer accounts. FICO® Score is a three-digit score ranging from 300-850. They are calculated by running data from the three U.S. national credit reporting agencies, Experian, TransUnion and Equifax, through one of several proprietary scoring models developed by FICO. Lenders generally pay the credit reporting agencies scoring fees based on usage, and the credit reporting agencies pay an associated fee to us. FICO® Score 9, the most recent version of the FICO® Score, was released in early fiscal 2015.

While the core FICO® Score is the foundation of our scoring portfolio, we offer a number of other broad-based scores, including several specific FICO® Industry Scores. We also develop various custom scores for our financial services clients. The FICO® Score XD expands the scorable population using alternative credit data. FICO® Score XD looks at public records and property data, and a consumer’s history with mobile, landline

phone and cable payments, to generate scores on the same 300-850 scale as standard FICO® Scores. FICO® Score XD is available to lenders from LexisNexis Risk Solutions and Equifax. We also continue to innovate with respect to scores that consider consumer permissioned data from accounts such as checking, savings, or money market accounts. Incorporating consumer contributed data is a unique approach to helping empower consumers to establish or improve their creditworthiness by using data that reflects sound financial activity but that is not part of a traditional credit report. This can help consumers qualify for the credit they seek under more competitive terms. This approach is particularly helpful for consumers who may have very sparse or inactive credit files and are seeking a path toward greater financial inclusion in mainstream banking.

Outside the U.S., we offer FICO® Scores, including scores using alternative data, for consumers, and in some cases for small and medium enterprises, through credit reporting agencies. We also have installed client-specific versions of the FICO® Score in over 10 countries. Like FICO® Scores in the U.S., these scores help lenders in multiple countries leverage the FICO® Score's predictive analysis to assess the risk of marketing prospects and credit applicants. FICO® Scores are in use or being implemented in 30 different countries across five continents outside the U.S.

We also have scoring systems for insurance underwriters and marketers. They use the same underlying statistical technology as our FICO® Scores, but are designed to predict applicant or policyholder insurance loss ratio for automobile or homeowners' coverage. Our insurance scores are available in the U.S. and Canada. We license credit bureau scoring services and related consulting directly to users in banking through the FICO® PreScore® service for prescreening solicitation candidates.

We also provide FICO® Score based products, education and information on FICO® Scores to consumers. They are distributed directly by us through our myFICO® service and through licensed distribution partners, including Experian and certain lenders, for use in customer and non-customer programs.

The myFICO® products and subscription offerings are available online at [www.myfico.com](http://www.myfico.com). Consumers can use the myFICO.com website to purchase their FICO® Scores, including credit reports associated with the scores, explanations of the factors affecting their scores, and customized information on how to manage their scores. We make available the 28 most widely used versions of the FICO® Score from the three major U.S. credit bureaus through our myFICO® service, representing approximately 95% of all FICO® Scores sold and used by lenders. Customers can use products to simulate how taking specific actions could affect their FICO® Score 8. Consumers can also subscribe to monitoring services, which deliver alerts via email and text when changes to a user's FICO® Scores or other credit report content are detected. In addition, consumers can purchase identity theft monitoring products that alert consumers of potential risks of identity fraud with comprehensive detection and identity restoration services.

### ***Decision Management Software***

We provide analytic and decision management platforms and tools that businesses use to build their own tailored, analytically powered decision management applications on-premises, within the FICO® Analytic Cloud or via third-party cloud environments such as AWS. In contrast to our packaged applications developed for specific industry solutions, our tools platform adds scalable and flexible decision management capabilities to virtually any application or operational system. These tools are sold as licensed software or as a platform-as-a-service ("PaaS") offering in the cloud, and can be used standalone, or in conjunction with third-party solutions to advance a client's decision management initiatives. We use these tools as common software components for our own decision management solutions, described above in the Applications section. They are also key components of our decision management architecture. We also partner with third-party providers within given industry markets and with major software companies to embed our tools within existing applications.

During fiscal 2019, FICO continued to enhance the FICO® Decision Management Suite, a collection of tools for building, extending, deploying and scaling applications and solutions. The Decision Management Suite

includes the FICO® Decision Management Platform, along with capabilities for authoring, customizing, executing, and managing predictive analytic, decisioning, and optimization components and services; developing, orchestrating and publishing analytics-powered applications; and visualizing, analyzing and reporting data trends. The FICO® Decision Management Suite is available on-premises, in the FICO® Analytic Cloud, or in third-party public cloud solutions such as AWS; businesses can choose any of these three deployments depending on their specific needs, IT environments and other factors. Recent upgrades and enhancements to the functionality in the suite include:

- FICO® Decision Management Platform, the fundamental backbone of the Suite, which dramatically improves performance, data interchange, model tracking and user collaboration;
- FICO® Decision Modeler, the core decision rules modeling tool, which improves scale, performance, and versatility;
- FICO® Analytics Workbench, the consolidated predictive analytics modeling tool, which improves overall capabilities, explainable AI functionality, and data wrangling;
- FICO® Strategy Director, which helps organizations proactively manage consumer accounts to increase revenue, decrease risk and improve customer retention;
- FICO® Decision Central™ (formerly known as Model Central), an analytic and decision model management tool, which expands its versatility and usability across a much broader range of implementations and use cases and makes it fully cloud-capable; and
- FICO® Xpress Optimization, an optimization modeling suite which includes both the solver technology, Mosel, as well as a general-purpose optimization solver, Xpress Insight.

The FICO® Decision Management Suite combines big data, predictive analytics and decision execution together in an easy-to-use development environment. It enables organizations to rapidly create innovative analytic applications; dramatically increase developer and business user productivity with support for a broad range of analytic and decision tools; and execute decisions in real time. It also empowers business analysts and other domain experts to modify systems in real time without IT involvement, providing organizations with the agility they need to rapidly respond to customer, regulatory and business changes.

The principal products offered are software tools for:

- *Rules Management.* The FICO® Blaze Advisor® decision rules management system is used to design, develop, execute and maintain rules-based business applications. The Blaze Advisor system enables business users to propose and preview the impact of changes to decisioning logic, to review and approve proposed changes, and commit those changes to production decisioning, all without demanding IT cycles. The Blaze Advisor system is sold as an end-user tool and is also the rules engine within several of our decision management applications. The Blaze Advisor system, available in six languages, is a multi-platform solution that: embeds rules management within existing applications; supports Web Services and service-oriented architecture, Java 2 Enterprise Edition platforms, Microsoft .NET and COBOL for z/OS mainframes; and is the first rules engine to support Java, .NET and COBOL deployment of the same rules. It also incorporates the exclusive Rete III rules execution technology, which improves the efficiency and speed with which the Blaze Advisor system is able to process and execute complex, high-volume decision rules. FICO's solution for rules management in the cloud (i.e., Blaze Advisor in the cloud) is called FICO® Decision Modeler.
- *Predictive Modeling.* FICO® Decision Central™ is a comprehensive offering to help banks and other organizations, including insurance, retail and health care companies, maximize the power of their predictive and decision models and meet stricter regulations for model management. It complements FICO® Analytics Workbench, which enables the user to develop and deploy sophisticated predictive models for use in automated decisions. This software is based on the methodology and tools FICO uses to build both client-level and industry-level predictive models and scorecards, which it has developed

over more than 40 years, and includes additional algorithms for rapidly discovering variable relationships, predictive interactions and optimal segmentation. The predictive models produced can be embedded in custom production applications or one of our Decision Management applications and can also be executed in the FICO® Blaze Advisor® system. FICO® Analytics Workbench is available for on-premises or cloud implementation.

- *Optimization.* FICO® Xpress Optimization provides operations research professionals with world-class solvers and high-productivity tools to quickly design and deliver custom, mathematically optimal solutions for a wide range of industry problems. Xpress includes a powerful modeling and programming language, with robust scalability, to quickly model and solve even the largest optimization problems. Xpress tools are licensed to end users, consultants and independent software vendors in several industries, and are a core component within FICO® Decision Optimizer. Decision Optimizer is a software tool that enables complex, large-scale optimizations involving dozens of networked action-effect models, and enables exploration and simulation of many optimized scenarios along an efficient frontier of options. The data-driven strategies produced by these tools can be executed by the FICO® Blaze Advisor® system or one of our Decision Management applications. FICO's solution for creating or executing optimization solutions is available on-premises or in the cloud.

## COMPETITION

The market for our advanced solutions is intensely competitive and is constantly changing. Our competitors vary in size and in the scope of the products and services they offer. We encounter competition from a number of sources, including:

- in-house analytic and systems developers;
- scoring model builders;
- enterprise resource planning and customer relationship management packaged solutions providers;
- business intelligence solutions providers;
- business process management and decision rules management providers;
- providers of credit reports and credit scores;
- providers of automated application processing services;
- data vendors;
- neural network developers and artificial intelligence system builders;
- third-party professional services and consulting organizations;
- providers of account/workflow management software;
- software companies supplying predictive analytic modeling, rules, or analytic development tools; collections and recovery solutions providers; entity resolution and social network analysis solutions providers; and
- providers of cloud-based customer engagement and risk management solutions.

We believe our competitors are unable to provide the mix of products, expertise in predictive analytics and integration with decision management software, and enhanced customer management capabilities that we are able to deliver. However, certain competitors may have larger shares of particular geographic or product markets than we do.

### ***Applications***

The competition for our Applications varies by both application and industry.

In the marketing services market, we compete with Pegasystems, Equifax, Experian, SAS, Adobe and Salesforce, among others. We also compete with traditional advertising agencies and companies' internal information technology and analytics departments.

In the customer origination market, we compete with Experian, Equifax, Moody's, Meridian Link, and CGI, among others.

In the customer strategy management market, we compete with Experian and SAS, among others.

In the fraud management market for banking, we compete primarily with Actimize, a division of NICE Systems, Experian, Detica, a division of BAE, SAS and ACI Worldwide. In the fraud solutions market for health care insurance, we compete with Emdeon, OptumInsight, ViPS, MedStat, Detica, a division of BAE, SAS, Verisk Analytics and IBM. Verisk Analytics and SAS also compete in the property and casualty insurance claims fraud market.

In the collections and recovery market, we compete with both outside suppliers and in-house scoring and computer systems departments for software and ASP servicing. Major competitors include CGI, the three major U.S. credit reporting agencies and various boutique firms.

### ***Scores***

In this segment, we compete with both outside suppliers and in-house analytics departments for scoring business. Primary competitors among outside suppliers of scoring models are the three major credit reporting agencies in the U.S. and Canada, which are also our partners in offering our scoring solutions, Experian, TransUnion, and VantageScore (a joint venture entity established by the major U.S. credit reporting agencies). Additional competitors include CRIF and other credit reporting agencies outside the U.S., and other data providers like LexisNexis and ChoicePoint, some of which also are among FICO partners.

For our "direct-to-consumer" services that deliver credit scores, credit reports and consumer credit education services, we compete with other direct to consumer credit and identity services.

### ***Decision Management Software***

Our primary competitors in this segment include IBM, Experian, SAS, Pegasystems and Angoss.

### **Competitive Factors**

We believe the principal competitive factors affecting our markets include: technical performance; access to unique proprietary databases; availability in SaaS or PaaS formats; product attributes like adaptability, scalability, interoperability, functionality and ease-of-use; product price; customer service and support; the effectiveness of sales and marketing efforts; existing market penetration; and reputation. Although we believe our products and services compete favorably with respect to these factors, we may not be able to maintain our competitive position against current and future competitors.

## **MARKETS AND CUSTOMERS**

Our products and services serve clients in multiple industries, including primarily banking, insurance, retail, healthcare and public agencies. End users of our products include 98 of the 100 largest financial institutions in

the U.S., and two-thirds of the largest 100 banks in the world. Our clients also include more than 700 insurers, including nine of the top ten U.S. property and casualty insurers; more than 400 retailers and general merchandisers; more than 150 government or public agencies; and more than 150 healthcare and pharmaceuticals companies, including seven of the world's top ten pharmaceuticals companies. All of the top ten companies on the 2019 *Fortune* 500 list use FICO's solutions. In addition, our consumer services are marketed to an estimated 200 million U.S. consumers whose credit relationships are reported to the three major U.S. credit reporting agencies.

In the U.S., we market our products and services primarily through our own direct sales organization that is organized around vertical markets. Sales groups are based in our headquarters and in field offices strategically located both in and outside the U.S. We also market our products through indirect channels, including alliance partners and other resellers.

Our scores are marketed and sold through credit reporting agencies. During fiscal 2019, 2018 and 2017, revenues generated from our agreements with Experian, TransUnion and Equifax collectively accounted for 29%, 25% and 20% of our total revenues, respectively.

Outside the U.S., we market our products and services primarily through our subsidiary sales organizations. Our subsidiaries license and support our products in their local countries as well as within other foreign countries where we do not operate through a direct sales subsidiary. We also market our products through resellers and independent distributors in international territories not covered by our subsidiaries' direct sales organizations.

Our largest market segments outside the U.S. are the United Kingdom and Canada. In addition, we have delivered products to users in more than 100 countries.

## TECHNOLOGY

We specialize in analytics software and decision management technologies that analyze data and drive decision strategies and customer engagement. We maintain active research in a number of fields for the purposes of deriving greater insight and predictive value from data, making various forms of data more usable and valuable to the model-building process, and automating and applying analytics to the various business processes involved in making high-volume decisions in real time.

We are widely recognized as a leader in predictive analytics due to our pioneering work in credit scoring and fraud detection. We believe that our tools and processes are among the very best commercially available, and that we are uniquely able to integrate advanced analytic, software and data technologies into mission-critical business solutions that offer superior returns on investment.

In fiscal 2019, we continued to make progress with our FICO® Decision Management Suite and FICO® Decision Management Platform initiatives. Most significantly for the fiscal year, we have added distinct FICO intellectual property into tools to develop explainable artificial intelligence or xAI. In addition, we have made many of our software solutions, which were previously available only as on-premises software installations, into SaaS solutions hosted on the FICO® Analytic Cloud and/or in AWS. The FICO® Decision Management Suite enables clients to use FICO tools, along with rapid application development tools and visualization tools, to quickly develop their own decision management applications and services. We continue to add functionality to the platform as well as host additional FICO applications in the cloud. These ongoing initiatives are driven by enhancing our core technical capabilities listed below, and extending them through partnerships with other technology providers as well as through employing open source software.

### Principal Areas of Expertise

*Predictive Modeling.* Predictive modeling identifies and mathematically represents underlying relationships in historical data in order to explain the data and make predictions or classifications about future events. Our

models summarize large quantities of data to amplify its value. Predictive models typically analyze current and historical data on individuals to produce easily understood metrics such as scores. These scores rank-order individuals by likely future performance, e.g., their likelihood of making credit payments on time, or of responding to a particular offer for services. We also include in this category models that detect the likelihood of a transaction being fraudulent. Our predictive models are frequently operationalized in mission-critical transactional systems and drive decisions and actions in near real time. A number of analytic methodologies underlie our products in this area. These include proprietary applications of both linear and nonlinear mathematical programming algorithms, in which one objective is optimized within a set of constraints, and advanced neural systems, which learn complex patterns from large data sets to predict the probability that a new individual will exhibit certain behaviors of business interest. We also apply various related statistical techniques for analysis and pattern detection within large datasets, and have enhanced our abilities to derive insights and predictive variables from various forms of so-called big data, including unstructured data, such as text. We have enhanced our predictive analytic capabilities to include the development of machine learning algorithms and artificial intelligence. FICO has focused on making artificial intelligence explainable to auditors, developers and decision makers.

*Decision Analysis and Optimization.* Decision analysis refers to the broad quantitative field that deals with modeling, analyzing and optimizing decisions made by individuals, groups and organizations. Whereas predictive models analyze multiple aspects of individual behavior to forecast future behavior, decision analysis analyzes multiple aspects of a given decision to identify the most effective action to take to reach a desired result. We have developed an integrated approach to decision analysis that incorporates the development of a decision model that mathematically maps the entire decision structure; proprietary optimization technology that identifies the most effective strategies, given both the performance objective and constraints; the development of designed testing required for active, continuous learning; and the robust extrapolation of an optimized strategy to a wider set of scenarios than historically encountered. Our optimization capabilities also include a proprietary mathematical modeling and programming language, an easy-to-use development environment, and a state-of-the-art set of optimization algorithms.

*Transaction Profiling.* Transaction profiling is a patent-protected technique used to extract meaningful information and reduce the complexity of transaction data used in modeling. Many of our products operate using transactional data, such as credit card purchase transactions, or other types of data that change over time. In its raw form, this data is very difficult to use in predictive models for several reasons. First, an isolated transaction contains very little information about the behavior of the individual who generated the transaction. In addition, transaction patterns change rapidly over time. Finally, this type of data can often be highly complex. To overcome these issues, we have developed a set of techniques that transform raw transactional data into a mathematical representation that reveals latent information, and which make the data more usable by predictive models. This profiling technology accumulates data across multiple transactions of many types to create and update profiles of transaction patterns. These profiles enable our neural network models to efficiently and effectively make accurate assessments of, for example, fraud risk and credit risk within real-time transaction streams.

*Customer Data Integration.* Decisions made on customers or prospects can benefit from data stored in multiple sources, both inside and outside the enterprise. We have focused on developing data integration processes that are able to assemble and integrate those disparate data sources into a unified view of the customer or household, through the application of persistent keying technology. This data can include structured or unstructured data. Recent innovations include a solution that can integrate multiple data sources in real time and make them available for analysis and decisions.

*Decision Management Software.* In order to make a decision strategy operational, various steps and rules need to be programmed or exported into the business's software infrastructure, where they can communicate with front-end, customer-facing systems and back-end systems such as billing systems. We have developed software systems, sometimes known as decision engines and decision rules management systems, which perform the

necessary functions to execute a decision strategy. Our software includes very efficient programs for these functions, facilitating, for example, business user definition of extremely complex decision strategies using graphical user interfaces; simultaneous testing of hundreds of decision strategies in “champion/challenger” (test/control) mode; high-volume processing and analysis of transactions in real time; integration of multiple data sources; and execution of predictive models for improved behavior forecasts and finer segmentation. Decision management software is an integral part of our decision management applications, described earlier.

*Customer Engagement.* We have advanced technology for customer engagement, which enables the execution of decisions and customer contact through SMS, email, automated voice, mobile applications and other channels. This technology enables FICO to extend decision management beyond the rendering of the decision to the final resolution with a customer, using the most effective method of communication for a given event and customer. Integrating this technology with our decision management systems has proven to decrease costs, improve staff efficiency, increase customer satisfaction and improve the return from marketing, fraud and collections activities.

*Social Network Analysis.* We have advanced technology for identity resolution and social network analysis, which enables users to understand the relationships between their organization, customers, events, and third-party actors. Businesses can perform real-time searches across their enterprise data to find, match, and link similar entities and uncover hidden relationship between people, places and things. This technology complements FICO’s capabilities in the area of fraud and marketing analytics.

*Cybersecurity.* We have advanced services for cyber risk assessment, which enable users to understand the likelihood their organization or a third-party organization that is their partner, supplier, or potential supplier will suffer a material data breach within a forward-looking 12-month period. These services are used by organizations to track and monitor their own cyber risk for self-assessment and to assess and monitor partner and supplier enterprises for third-party risk assessment. They are also used by insurance underwriters to assess cyber risk for cyber breach insurance policies.

## **PRODUCT PROTECTION AND TRADEMARKS**

We rely on a combination of patent, copyright, trademark and trade secret laws and confidentiality agreements and procedures to protect our proprietary rights.

We retain the title to and protect the suite of models and software used to develop scoring models as a trade secret. We also restrict access to our source code and limit access to and distribution of our software, documentation and other proprietary information. We have generally relied upon the laws protecting trade secrets and upon contractual nondisclosure safeguards and restrictions on transferability to protect our software and proprietary interests in our product and service methodology and know-how. Our confidentiality procedures include invention assignment and proprietary information agreements with our employees and independent contractors, and nondisclosure agreements with our distributors, strategic partners and customers. We also claim copyright protection for certain proprietary software and documentation.

We have patents on many of our technologies and have patent applications pending on other technologies. The patents we hold may not be upheld as valid and may not prevent the development of competitive products. In addition, patents may never be issued on our pending patent applications or on any future applications that we may submit. We currently hold 178 U.S. and 17 foreign patents with 101 applications pending.

Despite our precautions, it may be possible for competitors or users to copy or reproduce aspects of our software or to obtain information that we regard as trade secrets. In addition, the laws of some foreign countries do not protect proprietary rights to the same extent as do the laws of the U.S. Patents and other protections for our intellectual property are important, but we believe our success and growth will depend principally on such factors as the knowledge, ability, experience and creative skills of our personnel, new products, frequent product enhancements and name recognition.

We have developed technologies for research projects conducted under agreements with various U.S. government agencies or their subcontractors. Although we have acquired commercial rights to these technologies, the U.S. government typically retains ownership of intellectual property rights and licenses in the technologies that we develop under these contracts. In some cases, the U.S. government can terminate our rights to these technologies if we fail to commercialize them on a timely basis. In addition, under U.S. government contracts, the government may make the results of our research public, which could limit our competitive advantage with respect to future products based on funded research.

We have used, registered and/or applied to register certain trademarks and service marks for our technologies, products and services. We currently have 34 trademarks registered in the U.S. and select foreign countries.

## PERSONNEL

As of September 30, 2019, we employed 4,009 persons worldwide. Of these, 177 full-time employees were located in our San Jose, California office, 404 full-time employees were located in our San Diego, California office, 180 full-time employees were located in our Roseville, Minnesota office, 173 full-time employees were located in our San Rafael, California office, 142 full-time employees were located in our Fairfax, Virginia office, 1,109 full-time employees were located in our India-based offices and 400 full-time employees were located in our United Kingdom-based offices. None of our employees are covered by a collective bargaining agreement other than to the extent mandated by applicable law in certain foreign jurisdictions, and no work stoppages were experienced during fiscal 2019.

Information regarding our executive officers is included in Item 10, *Directors, Executive Officers and Corporate Governance*, of this Annual Report on Form 10-K.

### Item 1A. Risk Factors

#### Risks Related to Our Business

***We continue to expand the pursuit of our Decision Management strategy, and we may not be successful, which could cause our growth prospects and results of operations to suffer.***

We continue to expand the pursuit of our business objective to become a leader in helping businesses automate and improve decisions across their enterprises, an approach that we commonly refer to as Decision Management, or “DM.” Our DM strategy is designed to enable us to increase our business by selling multiple products to clients, as well as to enable the development of custom client solutions that may lead to opportunities to develop new proprietary scores or other new proprietary products. Our DM strategy is also increasingly focused on the delivery of our products through cloud-based deployments. The market may be unreceptive to our general DM business approach, including being unreceptive to purchasing multiple products from us, unreceptive to our customized solutions, or unreceptive to our cloud-based offerings. As we continue to pursue our DM strategy, we may experience volatility in our revenues and operating results caused by various factors, including differences in revenue recognition treatment between our cloud-based offerings and on-premise software licenses, the timing of investments and other expenditures necessary to develop and operate our cloud-based offerings, and the adoption of new sales and delivery methods. If our DM strategy is not successful, we may not be able to grow our business, growth may occur more slowly than we anticipate, or our revenues and profits may decline.

***We derive a substantial portion of our revenues from a small number of products and services, and if the market does not continue to accept these products and services, our revenues will decline.***

We expect that revenues derived from our scoring solutions, fraud solutions, customer communication services, customer management solutions and decision management software will continue to account for a

substantial portion of our total revenues for the foreseeable future. Our revenues will decline if the market does not continue to accept these products and services. Factors that might affect the market acceptance of these products and services include the following:

- changes in the business analytics industry;
- changes in technology;
- our inability to obtain or use key data for our products;
- saturation or contraction of market demand;
- loss of key customers;
- industry consolidation;
- failure to successfully adopt cloud-based technologies;
- failure to execute our selling approach; and
- inability to successfully sell our products in new vertical markets.

***If we are unable to access new markets or develop new distribution channels, our business and growth prospects could suffer.***

We expect that part of the growth that we seek to achieve through our DM strategy will be derived from the sale of DM products and service solutions in industries and markets we do not currently serve. We also expect to grow our business by delivering our DM solutions through additional distribution channels. If we fail to penetrate these industries and markets to the degree we anticipate utilizing our DM strategy, or if we fail to develop additional distribution channels, we may not be able to grow our business, growth may occur more slowly than we anticipate, or our revenues and profits may decline.

***If we are unable to develop successful new products or if we experience defects, failures and delays associated with the introduction of new products, our business could suffer serious harm.***

Our growth and the success of our DM strategy depend upon our ability to develop and sell new products or suites of products, including the development and sale of our cloud-based product offerings. If we are unable to develop new products, or if we are not successful in introducing new products, we may not be able to grow our business or growth may occur more slowly than we anticipate. In addition, significant undetected errors or delays in new products or new versions of products may affect market acceptance of our products and could harm our business, financial condition or results of operations. In the past, we have experienced delays while developing and introducing new products and product enhancements, primarily due to difficulties developing models, acquiring data, and adapting to particular operating environments or certain client or other systems. We have also experienced errors or “bugs” in our software products, despite testing prior to release of the products. Software errors in our products could affect the ability of our products to work with other hardware or software products, could delay the development or release of new products or new versions of products, and could adversely affect market acceptance of our products. Errors or defects in our products that are significant, or are perceived to be significant, could result in rejection of our products, damage to our reputation, loss of revenues, diversion of development resources, an increase in product liability claims, and increases in service and support costs and warranty claims.

***We rely on relatively few customers, as well as our contracts with the three major credit reporting agencies, for a significant portion of our revenues and profits. Many of our customers are significantly larger than we are and may have greater bargaining power. The businesses of our largest customers depend, in large part, on favorable macroeconomic conditions. If these customers are negatively impacted by weak global economic conditions, global economic volatility or the terms of these relationships otherwise change, our revenues and operating results could decline.***

Most of our customers are relatively large enterprises, such as banks, payment card processors, insurance companies, healthcare firms, telecommunications providers, retailers and public agencies. As a result, many of our customers and potential customers are significantly larger than we are and may have sufficient bargaining power to demand reduced prices and favorable nonstandard terms.

In addition, the U.S. and other key international economies have experienced in the past a downturn in which economic activity was impacted by falling demand for a variety of goods and services, restricted credit, poor liquidity, reduced corporate profitability, volatility in credit, equity and foreign exchange markets, bankruptcies and overall uncertainty with respect to the economy. The European Union (“E.U.”) continues to face great economic uncertainty which could impact the overall world economy or various other regional economies. The potential for economic disruption presents considerable risks to our business, including potential bankruptcies or credit deterioration of financial institutions with which we have substantial relationships. Such disruption could result in a decline in the volume of transactions that we execute for our customers.

We also derive a substantial portion of our revenues and operating income from our contracts with the three major credit reporting agencies, Experian, TransUnion and Equifax, and other parties that distribute our products to certain markets. The loss of or a significant change in a relationship with one of these credit reporting agencies with respect to their distribution of our products or with respect to our myFICO® offerings, the loss of or a significant change in a relationship with a major customer, the loss of or a significant change in a relationship with a significant third-party distributor (including payment card processors), or the delay of significant revenues from these sources, could have a material adverse effect on our revenues and results of operations.

***We rely on relationships with third parties for marketing, distribution and certain services. If we experience difficulties in these relationships, our future revenues may be adversely affected.***

Most of our products rely on distributors, and we intend to continue to market and distribute our products through existing and future distributor relationships. Our Scores segment relies on, among others, Experian, TransUnion and Equifax. Failure of our existing and future distributors to generate significant revenues or otherwise perform their expected services or functions, demands by such distributors to change the terms on which they offer our products, or our failure to establish additional distribution or sales and marketing alliances, could have a material adverse effect on our business, operating results and financial condition. In addition, certain of our distributors presently compete with us and may compete with us in the future, either by developing competitive products themselves or by distributing competitive offerings. For example, Experian, TransUnion and Equifax have developed a credit scoring product to compete directly with our products and are collectively attempting to sell the product. Competition from distributors or other sales and marketing partners could significantly harm sales of our products and services.

***Our acquisition and divestiture activities may disrupt our ongoing business and may involve increased expenses, and we may not realize the financial and strategic goals contemplated at the time of a transaction.***

We have acquired and expect to continue to acquire companies, businesses, products, services and technologies. Acquisitions involve significant risks and uncertainties, including:

- our ongoing business may be disrupted and our management’s attention may be diverted by acquisition, transition or integration activities;

- an acquisition may not further our business strategy as we expected, we may not integrate acquired operations or technology as successfully as we expected or we may overpay for our investments, or otherwise not realize the expected return, which could adversely affect our business or operating results;
- we may be unable to retain the key employees, customers and other business partners of the acquired operation;
- we may have difficulties entering new markets where we have no or limited direct prior experience or where competitors may have stronger market positions;
- our operating results or financial condition may be adversely impacted by claims or liabilities we assume from an acquired company, business, product or technology, including claims by government agencies, terminated employees, current or former customers, former stockholders or other third parties; pre-existing contractual relationships of an acquired company we would not have otherwise entered into; unfavorable revenue recognition or other accounting treatment as a result of an acquired company's practices; and intellectual property claims or disputes;
- we may fail to identify or assess the magnitude of certain liabilities or other circumstances prior to acquiring a company, business, product or technology, which could result in unexpected litigation or regulatory exposure, unfavorable accounting treatment, unexpected increases in taxes due, a loss of anticipated tax benefits or other adverse effects on our business, operating results or financial condition;
- we may not realize the anticipated increase in our revenues from an acquisition for a number of reasons, including if a larger than predicted number of customers decline to renew their contracts, if we are unable to sell the acquired products to our customer base or if contract models of an acquired company do not allow us to recognize revenues on a timely basis;
- we may have difficulty incorporating acquired technologies or products with our existing product lines and maintaining uniform standards, architecture, controls, procedures and policies;
- our use of cash to pay for acquisitions may limit other potential uses of our cash, including stock repurchases, dividend payments and retirement of outstanding indebtedness;
- to the extent we issue a significant amount of equity securities in connection with future acquisitions, existing stockholders may be diluted and earnings per share may decrease; and
- we may experience additional or unexpected changes in how we are required to account for our acquisitions pursuant to U.S. generally accepted accounting principles, including arrangements we assume from an acquisition.

We have also divested ourselves of businesses in the past and may do so again in the future. Divestitures involve significant risks and uncertainties, including:

- disruption of our ongoing business;
- reductions of our revenues or earnings per share;
- unanticipated liabilities, legal risks and costs;
- the potential loss of key personnel;
- distraction of management from our ongoing business; and
- impairment of relationships with employees and customers as a result of migrating a business to new owners.

Because acquisitions and divestitures are inherently risky, our transactions may not be successful and may have a material adverse effect on our business, results of operations, financial condition or cash flows.

Acquisitions of businesses having a significant presence outside the U.S. will increase our exposure to the risks of conducting operations in international markets.

***Charges to earnings resulting from acquisitions may adversely affect our operating results.***

Under business combination accounting standards, we recognize the identifiable assets acquired and the liabilities assumed in acquired companies generally at their acquisition-date fair values and separately from goodwill. Goodwill is measured as the excess amount of consideration transferred, which is also generally measured at fair value, and the net of the amounts of the identifiable assets acquired and the liabilities assumed as of the acquisition date. Our estimates of fair value are based upon assumptions believed to be reasonable but which are inherently uncertain. After we complete an acquisition, the following factors could result in material charges and adversely affect our operating results and may adversely affect our cash flows:

- impairment of goodwill or intangible assets, or a reduction in the useful lives of intangible assets acquired;
- amortization of intangible assets acquired;
- identification of, or changes to, assumed contingent liabilities, both income tax and non-income tax related, after our final determination of the amounts for these contingencies or the conclusion of the measurement period (generally up to one year from the acquisition date), whichever comes first;
- costs incurred to combine the operations of companies we acquire, such as transitional employee expenses and employee retention, redeployment or relocation expenses;
- charges to our operating results to maintain certain duplicative pre-merger activities for an extended period of time or to maintain these activities for a period of time that is longer than we had anticipated, charges to eliminate certain duplicative pre-merger activities, and charges to restructure our operations or to reduce our cost structure; and
- charges to our operating results resulting from expenses incurred to effect the acquisition.

Substantially all of these costs will be accounted for as expenses that will decrease our net income and earnings per share for the periods in which those costs are incurred. Charges to our operating results in any given period could differ substantially from other periods based on the timing and size of our future acquisitions and the extent of integration activities. A more detailed discussion of our accounting for business combinations and other items is presented in the “Critical Accounting Policies and Estimates” section of Management’s Discussion and Analysis of Financial Condition and Results of Operations (Item 7).

***Our reengineering initiative may cause our growth prospects and profitability to suffer.***

As part of our management approach, we implemented an ongoing reengineering initiative designed to grow revenues through strategic resource allocation and improve profitability through cost reductions. Our reengineering initiative may not be successful over the long term as a result of our failure to reduce expenses at the anticipated level, or a lower, or no, positive impact on revenues from strategic resource allocation. If our reengineering initiative is not successful over the long term, our revenues, results of operations and business may suffer.

***The occurrence of certain negative events may cause fluctuations in our stock price.***

The market price of our common stock may be volatile and could be subject to wide fluctuations due to a number of factors, including variations in our revenues and operating results. We believe that you should not rely on period-to-period comparisons of financial results as an indication of future performance. Because many of our operating expenses are fixed and will not be affected by short-term fluctuations in revenues, short-term

fluctuations in revenues may significantly impact operating results. Additional factors that may cause our stock price to fluctuate include the following:

- variability in demand from our existing customers;
- failure to meet the expectations of market analysts;
- changes in recommendations by market analysts;
- the lengthy and variable sales cycle of many products, combined with the relatively large size of orders for our products, increases the likelihood of short-term fluctuation in revenues;
- consumer or customer dissatisfaction with, or problems caused by, the performance of our products;
- the timing of new product announcements and introductions in comparison with our competitors;
- the level of our operating expenses;
- changes in competitive and other conditions in the consumer credit, banking and insurance industries;
- fluctuations in domestic and international economic conditions;
- our ability to complete large installations, and to adopt and configure cloud-based deployments, on schedule and within budget;
- acquisition-related expenses and charges; and
- timing of orders for and deliveries of software systems.

In addition, the financial markets have at various times experienced significant price and volume fluctuations that have particularly affected the stock prices of many technology companies and financial services companies, and these fluctuations sometimes have been unrelated to the operating performance of these companies. Broad market fluctuations, as well as industry-specific and general economic conditions, may negatively affect our business and require us to record an impairment charge related to goodwill, which could adversely affect our results of operations, stock price and business.

***Our products have long and variable sales cycles. If we do not accurately predict these cycles, we may not forecast our financial results accurately, and our stock price could be adversely affected.***

We experience difficulty in forecasting our revenues accurately because the length of our sales cycles makes it difficult for us to predict the quarter in which sales will occur. In addition, our selling approach is complex as we look to sell multiple products and services across our customers' organizations. This makes forecasting of revenues in any given period more difficult. As a result of our sales approach and lengthening sales cycles, revenues and operating results may vary significantly from period to period. For example, the sales cycle for our products typically ranges from 60 days to 18 months. Customers are often cautious in making decisions to acquire our products because purchasing our products typically involves a significant commitment of capital and may involve shifts by the customer to a new software and/or hardware platform or changes in the customer's operational procedures. This may cause customers, particularly those experiencing financial stress, to make purchasing decisions more cautiously. Delays in completing sales can arise while customers complete their internal procedures to approve large capital expenditures and test and accept our applications. Consequently, we face difficulty predicting the quarter in which sales to expected customers will occur and experience fluctuations in our revenues and operating results. If we are unable to accurately forecast our revenues, our stock price could be adversely affected.

***We typically have revenue-generating transactions concentrated in the final weeks of a quarter, which may prevent accurate forecasting of our financial results and cause our stock price to decline.***

Large portions of our customer agreements are consummated in the weeks immediately preceding quarter end. Before these agreements are consummated, we create and rely on forecasted revenues for planning,

modeling and earnings guidance. Forecasts, however, are only estimates and actual results may vary for a particular quarter or longer periods of time. Consequently, significant discrepancies between actual and forecasted results could limit our ability to plan, budget or provide accurate guidance, which could adversely affect our stock price. Any publicly-stated revenue or earnings projections are subject to this risk.

***The failure to recruit and retain additional qualified personnel could hinder our ability to successfully manage our business.***

Our DM strategy and our future success will depend in large part on our ability to attract and retain experienced sales, consulting, research and development, marketing, technical support and management personnel. The complexity of our products requires highly trained personnel for research and development and to assist customers with product installation, deployment, maintenance and support. The labor market for these individuals is very competitive due to the limited number of people available with the necessary technical skills and understanding and may become more competitive with general market and economic improvement. We cannot be certain that our compensation strategies will be perceived as competitive by current or prospective employees. This could impair our ability to recruit and retain personnel. We have experienced difficulty in recruiting qualified personnel, especially technical, sales and consulting personnel, and we may need additional staff to support new customers and/or increased customer needs. We may also recruit skilled technical professionals from other countries to work in the U.S., and from the U.S. and other countries to work abroad. Limitations imposed by immigration laws in the U.S. and abroad and the availability of visas in the countries where we do business could hinder our ability to attract necessary qualified personnel and harm our business and future operating results. There is a risk that even if we invest significant resources in attempting to attract, train and retain qualified personnel, we will not succeed in our efforts, and our business could be harmed. The failure of the value of our stock to appreciate may adversely affect our ability to use equity and equity-based incentive plans to attract and retain personnel, and may require us to use alternative and more expensive forms of compensation for this purpose.

***The failure to obtain certain forms of model construction data from our customers or others could harm our business.***

Our business requires that we develop or obtain a reliable source of sufficient amounts of current and statistically relevant data to analyze transactions and update our products. In most cases, these data must be periodically updated and refreshed to enable our products to continue to work effectively in a changing environment. We do not own or control much of the data that we require, most of which is collected privately and maintained in proprietary databases. Customers and key business partners provide us with the data we require to analyze transactions, report results and build new models. Our DM strategy depends in part upon our ability to access new forms of data to develop custom and proprietary analytic tools. If we fail to maintain sufficient data sourcing relationships with our customers and business partners, or if they decline to provide such data due to privacy concerns, competition concerns, prohibitions or a lack of permission from their customers or partners, we could lose access to required data and our products, and the development of new products, might become less effective. Third parties have asserted copyright and other intellectual property interests in these data, and these assertions, if successful, could prevent us from using these data. Any interruption of our supply of data could seriously harm our business, financial condition or results of operations.

***We will continue to rely upon proprietary technology rights, and if we are unable to protect them, our business could be harmed.***

Our success depends, in part, upon our proprietary technology and other intellectual property rights. To date, we have relied primarily on a combination of copyright, patent, trade secret, and trademark laws, and nondisclosure and other contractual restrictions on copying and distribution, to protect our proprietary technology. This protection of our proprietary technology is limited, and our proprietary technology could be used by others without our consent. In addition, patents may not be issued with respect to our pending or future

patent applications, and our patents may not be upheld as valid or may not prevent the development of competitive products. Any disclosure, loss, invalidity of, or failure to protect our intellectual property could negatively impact our competitive position, and ultimately, our business. There can be no assurance that our protection of our intellectual property rights in the U.S. or abroad will be adequate or that others, including our competitors, will not use our proprietary technology without our consent. Furthermore, litigation may be necessary to enforce our intellectual property rights, to protect our trade secrets, or to determine the validity and scope of the proprietary rights of others. Such litigation could result in substantial costs and diversion of resources and could harm our business, financial condition or results of operations.

Some of our technologies were developed under research projects conducted under agreements with various U.S. government agencies or subcontractors. Although we have commercial rights to these technologies, the U.S. government typically retains ownership of intellectual property rights and licenses in the technologies developed by us under these contracts, and in some cases can terminate our rights in these technologies if we fail to commercialize them on a timely basis. Under these contracts with the U.S. government, the results of research may be made public by the government, limiting our competitive advantage with respect to future products based on our research.

***If we are subject to infringement claims, it could harm our business.***

We expect that products in the industry segments in which we compete, including software products, will increasingly be subject to claims of patent and other intellectual property infringement as the number of products and competitors in our industry segments grow. We may need to defend claims that our products infringe intellectual property rights, and as a result we may:

- incur significant defense costs or substantial damages;
- be required to cease the use or sale of infringing products;
- expend significant resources to develop or license a substitute non-infringing technology;
- discontinue the use of some technology; or
- be required to obtain a license under the intellectual property rights of the third party claiming infringement, which license may not be available or might require substantial royalties or license fees that would reduce our margins.

Moreover, in recent years, individuals and groups that are non-practicing entities, commonly referred to as “patent trolls,” have purchased patents and other intellectual property assets for the purpose of making claims of infringement in order to extract settlements. From time to time, we may receive threatening letters or notices or may be the subject of claims that our solutions and underlying technology infringe or violate the intellectual property rights of others. Responding to such claims, regardless of their merit, can be time consuming, costly to defend in litigation, divert management’s attention and resources, damage our reputation and brand, and cause us to incur significant expenses.

***If our cybersecurity measures are compromised or unauthorized access to customer or consumer data is otherwise obtained, our products and services may be perceived as not being secure, customers may curtail or cease their use of our products and services, our reputation may be damaged and we could incur significant liabilities.***

Our business requires the storage, transmission and utilization of sensitive consumer and customer information. Many of our products are provided by us through the Internet. Cybersecurity breaches could expose us to a risk of loss, the unauthorized disclosure of consumer or customer information, litigation, indemnity obligations and other liability. If our cybersecurity measures are breached as a result of third-party action, employee error, malfeasance or otherwise, and as a result, someone obtains unauthorized access to our systems

or to consumer or customer information, our reputation may be damaged, our business may suffer and we could incur significant liability. Because the techniques used to obtain unauthorized access, or to sabotage systems, change frequently and generally are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. Malicious third parties may also conduct attacks designed to temporarily deny customers access to our services. Cybersecurity compromises experienced by our competitors, by our distributors, by our customers or by us may lead to public disclosures, which may lead to widespread negative publicity. Any cybersecurity compromise in our industry, whether actual or perceived, could harm our reputation, erode customer confidence in the effectiveness of our security measures, negatively impact our ability to attract new customers, cause existing customers to curtail or cease their use of our products and services, cause regulatory or industry changes that impact our products and services, or subject us to third-party lawsuits, regulatory fines or other action or liability, all of which could materially and adversely affect our business and operating results.

***Protection from system interruptions is important to our business. If we experience system interruptions, it could harm our business.***

Systems or network interruptions, including interruptions experienced in connection with our cloud-based and other product offerings, could delay and disrupt our ability to develop, deliver or maintain our products and services, causing harm to our business and reputation and resulting in loss of customers or revenue. These interruptions can include software or hardware malfunctions, communication failures, outages or other failures of third party environments or service providers, fires, floods, earthquakes, power losses, equipment failures and other events beyond our control.

### **Risks Related to Our Industry**

***Our ability to increase our revenues will depend to some extent upon introducing new products and services. If the marketplace does not accept these new products and services, our revenues may decline.***

We have a significant share of the available market in portions of our Scores segment and for certain services in our Applications segment, specifically, the markets for account management services at payment card processors and payment card fraud detection software. To increase our revenues, we must enhance and improve existing products and continue to introduce new products and new versions of existing products that keep pace with technological developments, satisfy increasingly sophisticated customer requirements and achieve market acceptance. We believe much of the future growth of our business and the success of our DM strategy will rest on our ability to continue to expand into newer markets for our products and services. Such areas are relatively new to our product development and sales and marketing personnel. Products that we plan to market in the future are in various stages of development. We cannot assure you that the marketplace will accept these products. If our current or potential customers are not willing to switch to or adopt our new products and services, either as a result of the quality of these products and services or due to other factors, such as economic conditions, our revenues will decrease.

***If we fail to keep up with rapidly changing technologies, our products could become less competitive or obsolete.***

In our markets, technology changes rapidly, and there are continuous improvements in computer hardware, network operating systems, programming tools, programming languages, operating systems, database technologies, cloud-based technologies and the use of the Internet. If we fail to enhance our current products and develop new products in response to changes in technology or industry standards, or if we fail to bring product enhancements or new product developments to market quickly enough, our products could rapidly become less competitive or obsolete. Our future success will depend, in part, upon our ability to:

- innovate by internally developing new and competitive technologies;
- use leading third-party technologies effectively;

- continue to develop our technical expertise;
- anticipate and effectively respond to changing customer needs;
- initiate new product introductions in a way that minimizes the impact of customers delaying purchases of existing products in anticipation of new product releases; and
- influence and respond to emerging industry standards and other technological changes.

***Our product and pricing strategies may not be successful. If our competitors introduce new products and pricing strategies, it could decrease our product sales and market share, or could pressure us to reduce our product prices in a manner that reduces our margins.***

Demand for our products and services may be sensitive to product and pricing changes we implement, and our product and pricing strategies may not be accepted by the market. If our customers fail to accept our product and pricing strategies, our revenues, results of operations and business may suffer. In addition, we may not be able to compete successfully against our competitors, and this inability could impair our capacity to sell our products. The market for business analytics is rapidly evolving and highly competitive, and we expect competition in this market to persist and intensify. Our regional and global competitors vary in size and in the scope of the products and services they offer, and include:

- in-house analytic and systems developers;
- scoring model builders;
- fraud and security management providers;
- enterprise resource planning, customer relationship management, and customer communication and mobility solution providers;
- business intelligence solutions providers;
- credit report and credit score providers;
- business process management and decision rules management providers;
- process modeling tools providers;
- automated application processing services providers;
- data vendors;
- neural network developers and artificial intelligence system builders;
- third-party professional services and consulting organizations;
- account/workflow management software providers;
- software tools companies supplying modeling, rules, or analytic development tools; collections and recovery solutions providers; entity resolution and social network analysis solutions providers; and
- cloud-based customer engagement and risk management solutions providers.

We expect to experience additional competition from other established and emerging companies, as well as from other technologies. For example, certain of our fraud solutions products compete against other methods of preventing payment card fraud, such as payment cards that contain the cardholder's photograph; smart cards; cardholder verification and authentication solutions; biometric measures on devices including fingerprint and face matching; and other card authorization techniques and user verification techniques. Many of our anticipated competitors have greater financial, technical, marketing, professional services and other resources than we do, and industry consolidation is creating even larger competitors in many of our markets. As a result, our competitors may be able to respond more quickly to new or emerging technologies and changes in customer

requirements. They may also be able to devote greater resources than we can to develop, promote and sell their products. Many of these companies have extensive customer relationships, including relationships with many of our current and potential customers. Furthermore, new competitors or alliances among competitors may emerge and rapidly gain significant market share. For example, Experian, TransUnion and Equifax have formed an alliance that has developed a credit scoring product competitive with our products. If we are unable to respond as quickly or effectively to changes in customer requirements as our competition, our ability to expand our business and sell our products will be negatively affected.

Our competitors may be able to sell products competitive to ours at lower prices individually or as part of integrated suites of several related products. This ability may cause our customers to purchase products that directly compete with our products from our competitors. Price reductions by our competitors could negatively impact our margins, and could also harm our ability to obtain new long-term contracts and renewals of existing long-term contracts on favorable terms.

***Laws and regulations in the U.S. and abroad that apply to us or to our customers may expose us to liability, cause us to incur significant expense, affect our ability to compete in certain markets, limit the profitability of or demand for our products, or render our products obsolete. If these laws and regulations require us to change our products and services, it could adversely affect our business and results of operations. New legislation or regulations, or changes to existing laws and regulations, may also negatively impact our business and increase our costs of doing business.***

Laws and governmental regulation affect how our business is conducted and, in some cases, subject us to the possibility of government supervision and future lawsuits arising from our products and services. Laws and governmental regulation also influence our current and prospective customers' activities, as well as their expectations and needs in relation to our products and services. Laws and regulations that may affect our business and our current and prospective customers' activities include, but are not limited to, those in the following significant regulatory areas:

- Use of data by creditors and consumer reporting agencies (e.g., the U.S. Fair Credit Reporting Act);
- Laws and regulations that limit the use of credit scoring models (e.g., state "mortgage trigger" or "inquiries" laws, state insurance restrictions on the use of credit-based insurance scores, and the E.U. Consumer Credit Directive);
- Fair lending laws (e.g., the Equal Credit Opportunity Act and Regulation B, and the Fair Housing Act);
- Privacy and security laws and regulations that limit the use and disclosure of personally identifiable information, require security procedures, or otherwise apply to the collection, processing, storage, use and transfer of protected data (e.g., the U.S. Financial Services Modernization Act of 1999, also known as the Gramm Leach Bliley Act; the General Data Protection Regulation (the "GDPR") and country-specific data protection laws enacted to supplement the GDPR; the U.S. Health Insurance Portability and Accountability Act of 1996, as amended by the Health Information Technology for Economic and Clinical Health Act; the Cybersecurity Act of 2015; the U.S. Department of Commerce's National Institute of Standards and Technology's Cybersecurity Framework; the Clarifying Lawful Overseas Use of Data Act; and identity theft, file freezing, security breach notification and similar state privacy laws);
- Extension of credit to consumers through the Electronic Fund Transfers Act and Regulation E, as well as non-governmental VISA and MasterCard electronic payment standards;
- Laws and regulations applicable to secondary market participants (e.g., Fannie Mae and Freddie Mac) that could have an impact on our scoring products, including 12 CFR Part 1254 (Validation and Approval of Credit Score Models) issued by the Federal Housing Finance Agency in accordance with Section 310 of the Economic Growth, Regulatory Relief, and Consumer Protection Act (Public Law 115-174), and any regulations, standards or criteria established pursuant to such laws or regulations;

- Laws and regulations applicable to our customer communication clients and their use of our products and services (e.g., the Telemarketing Sales Rule, Telephone Consumer Protection Act and regulations promulgated thereunder);
- Laws and regulations applicable to our insurance clients and their use of our insurance products and services;
- The application or extension of consumer protection laws, including implementing regulations (e.g., the Consumer Financial Protection Act, the Federal Trade Commission Act, the Truth In Lending Act and Regulation Z, the Fair Debt Collection Practices Act, the Servicemembers Civil Relief Act, the Military Lending Act, and the Credit Repair Organizations Act);
- Laws and regulations governing the use of the Internet and social media, telemarketing, advertising, endorsements and testimonials;
- Anti-bribery and corruption laws and regulations (e.g., the Foreign Corrupt Practices Act and the UK Bribery Act 2010);
- Financial regulatory standards (e.g., Sarbanes-Oxley Act requirements to maintain and verify internal process controls, including controls for material event awareness and notification);
- Regulatory requirements for managing third parties (e.g., vendors, contractors, suppliers and distributors);
- Anti-money laundering laws and regulations (e.g., the Bank Secrecy Act and the USA PATRIOT Act);
- Financial regulatory reform stemming from the Dodd-Frank Wall Street Reform and Consumer Protection Act and the many regulations mandated by that Act, including regulations issued by, and the supervisory and investigative authority of, the Consumer Financial Protection Bureau; and
- Laws and regulations regarding export controls as they apply to FICO products delivered in non-U.S. countries (e.g., Office of Foreign Asset Control sanctions, and Export Administration Regulations).

In addition, many U.S. and foreign jurisdictions have passed, or are currently contemplating, a variety of consumer protection, privacy, and data security laws and regulations that may relate to our business or affect the demand for our products and services. For example, the GDPR became effective on May 25, 2018 and imposes more stringent operational requirements for entities processing personal information and greater penalties for noncompliance. Brazil, India, South Africa, Japan, China, Israel, Canada, and several other countries have introduced and, in some cases, enacted, similar privacy laws. The California Consumer Privacy Act of 2018, which was enacted on June 28, 2018 and will become effective on January 1, 2020, gives California residents certain privacy rights in the collection and disclosure of their personal information and requires businesses to make certain disclosures and take certain other acts in furtherance of those rights. The costs and other burdens of compliance with privacy and data security laws and regulations could negatively impact the use and adoption of our solutions and reduce overall demand for them. Additionally, concerns regarding data privacy may cause our customers, or their customers and potential customers, to resist providing the data necessary to allow us to deliver our solutions effectively. Even the perception that the privacy of personal information is not satisfactorily protected or does not meet regulatory requirements could inhibit sales of our solutions and any failure to comply with such laws and regulations could lead to significant fines, penalties or other liabilities. Any such decrease in demand or incurred fines, penalties or other liabilities could have a material adverse effect on our business, results of operations, and financial condition.

In addition to existing laws and regulations, changes in the U.S. or foreign legislative, judicial, regulatory or consumer environments could harm our business, financial condition or results of operations. The laws and regulations above, and changes to them, could affect the demand for or profitability of our products, including scoring and consumer products. New laws and regulations pertaining to our customers could cause them to pursue new strategies, reducing the demand for our products.

***Our revenues depend, to a great extent, upon conditions in the banking (including consumer credit) and insurance industries. If our clients' industries experience uncertainty, it will likely harm our business, financial condition or results of operations.***

During fiscal 2019, 88% of our revenues were derived from sales of products and services to the banking and insurance industries. Global economic uncertainty experienced in the U.S. and other key international economies in the past produced substantial stress, volatility, illiquidity and disruption of global credit and other financial markets, resulting in the bankruptcy or acquisition of, or government assistance to, several major domestic and international financial institutions. The potential for disruptions presents considerable risks to our businesses and operations. These risks include potential bankruptcies or credit deterioration of financial institutions, many of which are our customers. Such disruption would result in a decline in the revenue we receive from financial and other institutions.

While the rate of account growth in the U.S. bankcard industry has been slow and many of our large institutional customers have consolidated in recent years, we have generated most of our revenue growth from our bankcard-related scoring and account management businesses by selling and cross-selling our products and services to large banks and other credit issuers. As the banking industry continues to experience contraction in the number of participating institutions, we may have fewer opportunities for revenue growth due to reduced or changing demand for our products and services that support customer acquisition programs of our customers. In addition, industry contraction could affect the base of recurring revenues derived from contracts in which we are paid on a per-transaction basis as formerly separate customers combine their operations under one contract. There can be no assurance that we will be able to prevent future revenue contraction or effectively promote future revenue growth in our businesses.

While we are attempting to expand our sales of consumer credit, banking and insurance products and services into international markets, the risks are greater as these markets are also experiencing substantial disruption and we are less well-known in them.

## **Risks Related to External Conditions**

***Material adverse developments in global economic conditions, or the occurrence of certain other world events, could affect demand for our products and services and harm our business.***

Purchases of technology products and services and decisioning solutions are subject to adverse economic conditions. When an economy is struggling, companies in many industries delay or reduce technology purchases, and we experience softened demand for our decisioning solutions and other products and services. Global economic uncertainty has produced substantial stress, volatility, illiquidity and disruption of global credit and other financial markets in the past. Any economic uncertainty can negatively affect the businesses and purchasing decisions of companies in the industries we serve. The potential for disruptions presents considerable risks to our businesses and operations. If global economic conditions experience stress and negative volatility, or if there is an escalation in regional or global conflicts or terrorism, we will likely experience reductions in the number of available customers and in capital expenditures by our remaining customers, longer sales cycles, deferral or delay of purchase commitments for our products and increased price competition, which may adversely affect our business, results of operations and liquidity.

For example, on June 23, 2016, the United Kingdom (“U.K.”) held a referendum in which voters approved an exit from the E.U., commonly referred to as “Brexit.” As a result of the referendum, on March 29, 2017, the U.K. triggered Article 50 of the Lisbon Treaty formally starting negotiations regarding its exit from the E.U. As a result of the referendum and the ongoing uncertainty regarding the timing of Brexit, the future relationship between the U.K. and the E.U. remains unknown. Brexit has caused, and may continue to create, volatility in global stock markets and regional and global economic uncertainty, which may cause our customers to closely monitor their costs and reduce their spending budget on our products and services.

Whether or not recent or new legislative or regulatory initiatives or other efforts successfully stabilize and add liquidity to the financial markets, we may need to modify our strategies, businesses or operations, and we may incur additional costs in order to compete in a changed business environment. Given the volatile nature of the global economic environment and the uncertainties underlying efforts to stabilize it, we may not timely anticipate or manage existing, new or additional risks, as well as contingencies or developments, which may include regulatory developments and trends in new products and services. Our failure to do so could materially and adversely affect our business, financial condition, results of operations and prospects.

***In operations outside the U.S., we are subject to additional risks that may harm our business, financial condition or results of operations.***

A growing portion of our revenues is derived from international sales. During fiscal 2019, 34% of our revenues were derived from business outside the U.S. As part of our growth strategy, we plan to continue to pursue opportunities outside the U.S., including opportunities in countries with economic systems that are in early stages of development and that may not mature sufficiently to result in growth for our business. Accordingly, our future operating results could be negatively affected by a variety of factors arising out of international commerce, some of which are beyond our control. These factors include:

- general economic and political conditions in countries where we sell our products and services;
- difficulty in staffing and efficiently managing our operations in multiple geographic locations and in various countries;
- effects of a variety of foreign laws and regulations, including restrictions on access to personal information;
- import and export licensing requirements;
- longer payment cycles;
- reduced protection for intellectual property rights;
- currency fluctuations;
- changes in tariffs and other trade barriers; and
- difficulties and delays in translating products and related documentation into foreign languages.

There can be no assurance that we will be able to successfully address each of these challenges in the near term. Additionally, some of our business will be conducted in currencies other than the U.S. dollar. Foreign currency transaction gains and losses are not currently material to our cash flows, financial position or results of operations. However, an increase in our foreign revenues could subject us to increased foreign currency transaction risks in the future.

In addition to the risk of depending on international sales, we have risks incurred in having research and development personnel located in various international locations. We currently have a substantial portion of our product development staff in international locations, some of which have political and developmental risks. If such risks materialize, our business could be damaged.

***Our anti-takeover defenses could make it difficult for another company to acquire control of FICO, thereby limiting the demand for our securities by certain types of purchasers or the price investors are willing to pay for our stock.***

Certain provisions of our Restated Certificate of Incorporation, as amended, could make a merger, tender offer or proxy contest involving us difficult, even if such events would be beneficial to the interests of our stockholders. These provisions include giving our board the ability to issue preferred stock and determine the rights and designations of the preferred stock at any time without stockholder approval. The rights of the holders of our common stock will be subject to, and may be adversely affected by, the rights of the holders of any preferred stock that may be issued in the future. The issuance of preferred stock, while providing flexibility in

connection with possible acquisitions and other corporate purposes, could have the effect of making it more difficult for a third party to acquire, or discouraging a third party from acquiring, a majority of our outstanding voting stock. These factors and certain provisions of the Delaware General Corporation Law may have the effect of deterring hostile takeovers or otherwise delaying or preventing changes in control or changes in our management, including transactions in which our stockholders might otherwise receive a premium over the fair market value of our common stock.

***If we experience changes in tax laws or adverse outcomes resulting from examination of our income tax returns, it could adversely affect our results of operations.***

We are subject to federal and state income taxes in the U.S. and in certain foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. Our future effective tax rates could be adversely affected by changes in tax laws, by our ability to generate taxable income in foreign jurisdictions in order to utilize foreign tax losses, and by the valuation of our deferred tax assets. In addition, we are subject to the examination of our income tax returns by the Internal Revenue Service and other tax authorities. We regularly assess the likelihood of adverse outcomes resulting from such examinations to determine the adequacy of our provision for income taxes. There can be no assurance that the outcomes from such examinations will not have an adverse effect on our operating results and financial condition.

**Item 1B. Unresolved Staff Comments**

Not applicable.

**Item 2. Properties**

Our properties consist primarily of leased office facilities for sales, data processing, research and development, consulting and administrative personnel. Our principal locations include:

- approximately 55,000 square feet of office space in San Jose, California in one building under a lease expiring in fiscal 2024; this is used for our corporate headquarters and all of our segments;
- approximately 173,000 square feet of office space in Bangalore, India in one building under a lease expiring in fiscal 2022; this is used for Applications and Decision Management Software segments;
- approximately 124,000 square feet of office space in San Rafael, California in one building under a lease expiring in fiscal 2025; this is used for all of our segments;
- approximately 80,000 square feet of office space in San Diego, California in one building under a lease expiring in fiscal 2027; this is used for Applications and Decision Management Software segments; and
- approximately 45,000 square feet of office space in Roseville, Minnesota in one building under a lease expiring in fiscal 2028; this is used for all of our segments.

In addition, we lease an aggregate of approximately 254,000 square feet of office and data center space in a number of smaller domestic locations and internationally in the United Kingdom, China, Singapore, and several other locations. We believe that suitable additional space will be available to accommodate future needs. See Note 17 to the accompanying consolidated financial statements for information regarding our obligations under leases.

**Item 3. Legal Proceedings**

**Item 4. Mine Safety Disclosures**

Not Applicable.

## PART II

### Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

#### Market Information

Our common stock trades on the New York Stock Exchange under the symbol: FICO. According to records of our transfer agent, at October 25, 2019, we had 303 stockholders of record of our common stock.

#### Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

#### Issuer Purchases of Equity Securities

<u>Period</u>	<u>Total Number of Shares Purchased (1)</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (2)</u>	<u>Maximum Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (2)</u>
July 1, 2019 through July 31, 2019	63,866	\$335.90	60,554	\$250,000,000
August 1, 2019 through August 31, 2019	76,445	\$348.16	75,000	\$223,871,960
September 1, 2019 through September 30, 2019	10,468	\$352.38	10,000	\$220,332,604
Total	<u>150,779</u>	\$343.26	<u>145,554</u>	\$220,332,604

- (1) Includes 5,225 shares delivered in satisfaction of the tax withholding obligations resulting from the vesting of restricted stock units held by employees during the quarter ended September 30, 2019.
- (2) In July 2018, our Board of Directors approved a stock repurchase program following the completion of our previous program. This program was open-ended and authorized repurchases of shares of our common stock up to an aggregate cost of \$250.0 million in the open market or in negotiated transactions. In July 2019, our Board of Directors approved a new stock repurchase program following the completion of the July 2018 program. The new program is open-ended and authorizes repurchases of shares of our common stock up to an aggregate cost of \$250.0 million in the open market or in negotiated transactions.

## Performance Graph

The following graph shows the total stockholder return of an investment of \$100 in cash on September 30, 2014, in (a) the Company's common stock, (b) the Standard & Poor's 500 Stock Index and (c) the Standard & Poor's 500 Application Software Index, in each case with reinvestment of dividends. We do not believe there are any publicly traded companies that compete with us across the full spectrum of our product and service offerings.

### COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURN\*

Among FICO, the S&P 500 Index  
and the S&P Application Software Index

\*\$100 invested on 9/30/14 in stock or index, including reinvestment of dividends.  
Fiscal year ending September 30.

(1) Results of operations for fiscal years 2017 and 2015 included pre-tax charges of \$4.5 million and \$18.2 million, respectively, in restructuring and acquisition-related expenses.

## **Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations**

Our Management’s Discussion and Analysis of Financial Condition and Results of Operations (“MD&A”) includes the following: a business overview that provides a high-level summary of our strategies and initiatives, financial results and bookings trends that affect our business; a more detailed analysis of our results of operations; our liquidity and capital resources, which discusses key aspects of our statements of cash flows, changes in our balance sheets and our financial commitments; and a summary of our critical accounting policies and estimates we believe are important to understanding the assumptions and judgments incorporated in our reported financial results. Our MD&A should be read in conjunction with Item 8, *Financial Statements and Supplementary Data*, of this Annual Report on Form 10-K. The following discussion contains forward-looking statements that are subject to risks and uncertainties. Actual results may differ from those referred to herein due to a number of factors, including but not limited to risks described in Item 1A, *Risk Factors*, in this Annual Report on Form 10-K.

### **BUSINESS OVERVIEW**

#### **Strategies and Initiatives**

During fiscal 2019, our growth initiatives continued to generate significant free cash flow. We utilized our cash to enhance stockholder value through investments in long-term growth initiatives; acquisitions of relevant technologies and products that strengthen our portfolio and competitive position; and our stock repurchase programs.

We continued to transform our business from on-premises to recurring revenue associated with our cloud-based solutions in our Applications and Decision Management Software segments. Our continued product innovation provides growth opportunities with customers that can benefit from the affordability and simplicity of these solutions. The majority of our software solutions are now available through both the FICO® Analytic Cloud and AWS. During fiscal 2019, our cloud bookings accounted for 39% of our total bookings, compared to 35% during fiscal 2018.

For our Scores segment, our industry leading business-to-business FICO® Scores has achieved a multi-year expansion in the growing U.S. consumer market. We have launched numerous new FICO® Score based products, and continue to grow our partnership with Experian, a leading global information services provider. This partnership provides consumers the FICO® Score that lenders most commonly use in evaluating credit when determining applicant eligibility for new credit cards, car loans, mortgages or other lines of credit and can be accessed through Experian.com. The FICO® Score Open Access program, which allows our participating clients to provide their customers with a free FICO® Score along with content to help them understand the FICO® Score their lender uses, has more than 290 million consumer accounts with access to their free FICO® Scores. We continue to pursue additional partners to distribute FICO® Scores with their product offerings sold directly to consumers.

We continue to enhance stockholder value by returning cash to stockholders through our stock repurchase program. During fiscal 2019, we repurchased approximately 0.9 million shares at a total repurchase price of \$228.9 million. As of September 30, 2019, we had \$220.3 million remaining under our current stock repurchase program.

#### **Overview of Financial Results**

Total revenues for fiscal 2019 were \$1.16 billion, an increase of 16% from \$1.00 billion in fiscal 2018. We continue to drive growth in our Scores segment. Scores revenue increased 25% to \$421.2 million in fiscal 2019 from \$335.9 million in fiscal 2018, and Scores operating income increased 33% to \$361.4 million in fiscal 2019 from \$272.4 million in fiscal 2018. For our Applications and Decision Management Software segments, our cloud business continues to grow as we pursue our cloud-first strategy. Cloud revenues increased 12% to \$270.4 million during fiscal 2019, from \$240.9 million during fiscal 2018.

We derive a significant portion of revenues internationally, and 34% and 35% of total consolidated revenues were derived from clients outside the U.S. during fiscal 2019 and 2018, respectively. A significant portion of our revenues are derived from the sale of products and services within the banking (including consumer credit) industry, and 87% and 85% of our revenues were derived from within this industry during fiscal 2019 and 2018, respectively. In addition, we derive a significant share of revenues from transactional or unit-based software license fees, transactional fees derived under credit scoring, data processing, data management and SaaS subscription services arrangements, and annual software maintenance fees. Arrangements with transactional or unit-based pricing accounted for 74% and 75% of our revenues during fiscal 2019 and 2018, respectively. Revenue fluctuations in our business are primarily driven by changes in the transactional volume and license fees.

Operating income for fiscal 2019 was \$253.5 million, an increase of 45% from \$175.4 million in fiscal 2018. Operating margin was 22% and 18% for fiscal 2019 and 2018, respectively. As a result, net income increased 52% to \$192.1 million in fiscal 2019 from \$126.5 million in fiscal 2018. Diluted earnings per share for fiscal 2019 was \$6.34, an increase of 56% from \$4.06 in fiscal 2018.

## **Bookings**

Management regards the volume of bookings achieved as an important indicator of future revenues, but they are not comparable to nor a substitute for an analysis of our revenues. Bookings represent contracts signed in the current reporting period that generate current and future revenue streams. While we disclose estimated revenue expected to be recognized in the future related to unsatisfied performance obligations in Note 16 to the accompanying consolidated financial statements, we believe bookings amount is still a meaningful measure of our business as it includes estimated revenues omitted from Note 16, such as sales- or usage-based royalties derived from our software licenses, among others.

We estimate bookings as of the end of the period in which a contract is signed and initial booking estimates are not updated in future periods for changes between estimated and actual results. Our calculations have varying degrees of certainty depending on the revenue type and individual contract terms. They are subject to a number of risks and uncertainties concerning timing and contingencies affecting product delivery and performance, and estimates consider contract terms, knowledge of the marketplace and experience with our customers, among other factors. Actual revenue and the timing thereof could differ materially from our initial estimates.

Although many of our contracts contain non-cancelable terms, most of our bookings are transactional or service related that depend upon estimates such as volume of transactions, number of active accounts, or number of hours incurred. Since these estimates cannot be considered fixed or firm, we do not believe it is appropriate to characterize bookings as backlog. The following paragraphs discuss the key assumptions used to calculate bookings and the susceptibility of these assumptions to variability for each revenue type.

### ***Transactional and Maintenance Bookings***

We calculate transactional bookings as the total estimated volume of transactions or number of accounts under contract, multiplied by the contractual rate. Transactional contracts generally span multiple years and require estimates of future transaction volumes or number of active accounts. We develop estimates from discussions with our customers and examinations of historical data from similar products and customer arrangements. Differences between estimated bookings and actual results occur due to variability in the volume of transactions or number of active accounts estimated. This variability is primarily caused by the economic trends in our customers' industries; individual performance of our customers relative to their competitors; and regulatory and other factors that affect the business environment in which our customers operate.

We calculate maintenance bookings directly from the terms stated in the contract.

### ***Professional Services Bookings***

We calculate professional services bookings as the estimated number of hours to complete a project multiplied by the rate per hour. We estimate the number of hours based on our understanding of the project scope, conversations with customer personnel and our experience in estimating professional services projects. Estimated bookings may differ from actual results primarily due to differences in the actual number of hours incurred.

### ***License Bookings***

Licenses are sold on a perpetual or term basis and bookings generally equal the fixed amount stated in the contract.

### ***Bookings Trend Analysis***

	<b>Bookings (In millions)</b>	<b>Bookings Yield (1)</b>	<b>Number of Bookings over \$1 Million</b>	<b>Weighted- Average Term (2) (months)</b>
Quarter ended September 30, 2019	\$160.4	15%	34	34
Quarter ended September 30, 2018	\$133.5	11%	24	31
Year ended September 30, 2019	\$481.7	31%	95	NM <sup>(a)</sup>
Year ended September 30, 2018	\$437.3	29%	80	NM <sup>(a)</sup>

(1) Bookings yield represents the percentage of revenue recognized from bookings for the periods indicated.

(2) Weighted-average term of bookings measures the average term over which bookings are expected to be recognized as revenue.

(a) NM — Measure is not meaningful as our estimate of bookings is as of the end of the period in which a contract is signed, and we do not update our initial booking estimates in future periods for changes between estimated and actual results.

Transactional and maintenance bookings were 48% and 46% of total bookings for the years ended September 30, 2019 and 2018, respectively. Professional services bookings were 39% and 43% of total bookings for the years ended September 30, 2019 and 2018, respectively. License bookings were 13% and 11% of total bookings for the years ended September 30, 2019 and 2018, respectively.

## **RESULTS OF OPERATIONS**

We are organized into the following three reportable segments: Applications, Scores and Decision Management Software. Although we sell solutions and services into a large number of end user product and industry markets, our reportable business segments reflect the primary method in which management organizes and evaluates internal financial information to make operating decisions and assess performance. Segment revenues, operating income, and related financial information, including disaggregation of revenue, for the years ended September 30, 2019, 2018 and 2017 are set forth in Note 15 to the accompanying consolidated financial statements.

## Revenues

The following tables set forth certain summary information on a segment basis related to our revenues for fiscal 2019, 2018 and 2017:

Segment	Revenues Year Ended September 30,			Period-to-Period Change		Period-to-Period Percentage Change	
	2019	2018	2017	2019 to 2018	2018 to 2017	2019 to 2018	2018 to 2017
	As Adjusted (In thousands)		As Adjusted	As Adjusted (In thousands)		As Adjusted	
Applications	\$ 605,034	\$ 564,375	\$560,634	\$ 40,659	\$ 3,741	7%	1%
Scores	421,177	335,870	259,537	85,307	76,333	25%	29%
Decision Management Software	133,872	99,901	114,812	33,971	(14,911)	34%	(13)%
Total	<u>\$1,160,083</u>	<u>\$1,000,146</u>	<u>\$934,983</u>	159,937	65,163	16%	7%

Segment	Percentage of Revenues Year Ended September 30,		
	2019	2018	2017
	As Adjusted		As Adjusted
Applications	52%	56%	60%
Scores	36%	34%	28%
Decision Management Software	12%	10%	12%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

## Applications

	Year Ended September 30,			Period-to-Period Change		Period-to-Period Percentage Change	
	2019	2018	2017	2019 to 2018	2018 to 2017	2019 to 2018	2018 to 2017
	As Adjusted (In thousands)		As Adjusted	As Adjusted (In thousands)		As Adjusted	
Transactional and maintenance	\$395,398	\$372,283	\$335,560	\$23,115	\$ 36,723	6%	11%
Professional services	137,258	142,736	140,990	(5,478)	1,746	(4)%	1%
License	72,378	49,356	84,084	23,022	(34,728)	47%	(41)%
Total	<u>\$605,034</u>	<u>\$564,375</u>	<u>\$560,634</u>	40,659	3,741	7%	1%

**Applications** segment revenues increased \$40.7 million in fiscal 2019 from 2018 primarily due to a \$50.6 million increase in our fraud solutions and a \$7.3 million increase in our customer communication services, partially offset by an \$8.7 million decrease in our customer management solutions and a \$7.6 million decrease in our originations solutions. The increase in fraud solutions was primarily attributable to an increase in license and transactional revenues. The increase in customer communication services was primarily attributable to an increase in transactional revenue. The decrease in customer management solutions was primarily attributable to a decrease in license and services revenues. The decrease in originations solutions was primarily attributable to a decrease in services revenues.

**Applications** segment revenues increased \$3.7 million in fiscal 2018 from 2017 primarily due to an \$11.5 million increase in our customer communication services, a \$6.6 million increase in our customer management solutions, a \$6.3 million increase in our originations solutions, a \$6.0 million increase in our compliance solutions, and a \$3.2 million increase in our collections & recovery solutions, partially offset by a

\$29.9 million decrease in our fraud solutions. The increase in customer communication services was primarily attributable to an increase in transactional revenue. The increase in customer management solutions was primarily attributable to an increase in license and transactional revenues. The increase in originations solutions was primarily attributable to an increase in transactional and services revenues from our SaaS products. The increase in collections & recovery solutions was primarily attributable to an increase in license revenue. The increase in compliance solutions was attributable to an increase in all revenue types. The decrease in fraud solutions was primarily attributable to a decrease in license revenue.

### Scores

	Year Ended September 30,			Period-to-Period Change		Period-to-Period Percentage Change	
	2019	2018	2017	2019 to 2018	2018 to 2017	2019 to 2018	2018 to 2017
		As Adjusted	As Adjusted		As Adjusted		As Adjusted
		(In thousands)		(In thousands)			
Transactional and maintenance	\$415,288	\$331,662	\$254,424	\$83,626	\$77,238	25%	30%
Professional services	2,157	1,900	2,869	257	(969)	14%	(34)%
License	3,732	2,308	2,244	1,424	64	62%	3%
Total	<u>\$421,177</u>	<u>\$335,870</u>	<u>\$259,537</u>	85,307	76,333	25%	29%

**Scores** segment revenues increased \$85.3 million in fiscal 2019 from 2018 due to an increase of \$77.4 million in our business-to-business scores revenue and \$7.9 million in our business-to-consumer services revenue. The increase in business-to-business scores was primarily attributable to a higher unit price in mortgage and auto activities. The increase in business-to-consumer services was primarily attributable to an increase in royalties derived from scores sold indirectly to consumers through credit reporting agencies.

**Scores** segment revenues increased \$76.3 million in fiscal 2018 from 2017 due to an increase of \$60.8 million in our business-to-business scores revenue and \$15.5 million in our business-to-consumer services revenue. The increase in business-to-business scores was primarily attributable to a \$48.1 million increase in transactional scores in originations, primarily driven by a higher unit price in mortgage activities; in addition, transactional scores in account management and prescreen increased \$13.1 million driven by higher transactional volume. The increase in business-to-consumer services was primarily attributable to an increase in royalties derived from scores sold indirectly to consumers through credit reporting agencies.

During fiscal 2019, 2018 and 2017, revenues generated from our agreements with Experian accounted for 13%, 11% and 9%, respectively, of our total revenues, and revenues generated from our agreements with Equifax and TransUnion together accounted for 16%, 14% and 11%, respectively, of our total revenues. Revenues from these customers included amounts recorded in our other segments.

### Decision Management Software

	Year Ended September 30,			Period-to-Period Change		Period-to-Period Percentage Change	
	2019	2018	2017	2019 to 2018	2018 to 2017	2019 to 2018	2018 to 2017
		As Adjusted	As Adjusted		As Adjusted		As Adjusted
		(In thousands)		(In thousands)			
Transactional and maintenance	\$ 50,262	\$46,658	\$ 43,943	\$ 3,604	\$ 2,715	8%	6%
Professional services	44,680	32,274	34,045	12,406	(1,771)	38%	(5)%
License	38,930	20,969	36,824	17,961	(15,855)	86%	(43)%
Total	<u>\$133,872</u>	<u>\$99,901</u>	<u>\$114,812</u>	33,971	(14,911)	34%	(13)%

**Decision Management Software** segment revenues increased \$34.0 million primarily attributable to an increase in both of our license sales and SaaS subscription revenue, as well as an increase in services revenues related to our Decision Management Platform product.

**Decision Management Software** segment revenues decreased \$14.9 million in fiscal 2018 from 2017 primarily attributable to a decrease in license revenue related to our FICO® Blaze Advisor®.

### Operating Expenses and Other Income (Expense), Net

The following tables set forth certain summary information related to our consolidated statements of income and comprehensive income for the fiscal 2019, 2018 and 2017:

	Year Ended September 30,			Period-to-Period Change		Period-to-Period Percentage Change	
	2019	2018 As Adjusted	2017 As Adjusted	2019 to 2018	2018 to 2017 As Adjusted	2019 to 2018	2018 to 2017

### ***Cost of Revenues***

Cost of revenues consists primarily of employee salaries and benefits for personnel directly involved in developing, installing and supporting revenue products; travel costs; overhead costs; outside services; internal network hosting costs; software royalty fees; and credit bureau data and processing services.

The fiscal 2019 over 2018 increase of \$23.9 million in cost of revenues expenses was primarily attributable to a \$13.9 million increase in personnel and labor costs and a \$6.7 million increase in facilities and infrastructure costs. The increase in personnel and labor costs was primarily attributable to an increase in headcount. The increase in facilities and infrastructure costs was primarily attributable to increased resource requirement due to expansion in our cloud infrastructure operations. Cost of revenues as a percentage of revenues decreased to 29% during fiscal 2019 from 31% during fiscal 2018 primarily due to increased sales of our high-margin Scores and software products.

The fiscal 2018 over 2017 increase of \$25.3 million in cost of revenues expenses was primarily attributable to a \$13.4 million increase in facilities and infrastructure costs and a \$9.4 million increase in personnel and labor costs. The increase in facilities and infrastructure costs was primarily attributable to increased resource requirement due to expansion in our cloud infrastructure operations. The increase in personnel and labor costs was primarily attributable to an increase in incentive cost and share-based compensation costs. Cost of revenues as a percentage of revenues was 31% during fiscal 2018, consistent with that incurred during fiscal 2017.

### ***Research and Development***

Research and development expenses include the personnel and related overhead costs incurred in the development of new products and services, including the research of mathematical and statistical models and the development of new versions of our products.

The fiscal 2019 over 2018 increase of \$21.1 million in research and development expenses was primarily attributable to a \$15.6 million increase in personnel and labor costs as a result of increased headcount, and a \$3.5 million increase in facilities and infrastructure cost. Research and development expenses as a percentage of revenues was 13% during fiscal 2019, consistent with that incurred during fiscal 2018.

The fiscal 2018 over 2017 increase of \$17.5 million in research and development expenses was primarily attributable to a \$14.8 million increase in personnel and labor costs as a result of our continued investment in the areas of cloud computing and SaaS, as well as new products. Research and development expenses as a percentage of revenues was 13% during fiscal 2018, materially consistent with those incurred during fiscal 2017.

### ***Selling, General and Administrative***

Selling, general and administrative expenses consist principally of employee salaries and benefits; travel costs; overhead costs; advertising and other promotional expenses; corporate facilities expenses; legal expenses; business development expenses and the cost of operating computer systems.

The fiscal 2019 over 2018 increase of \$37.2 million was primarily attributable to an increase in personnel and labor costs as a result of increased headcount, higher share-based compensation and higher non-capitalizable commission cost. Selling, general and administrative expenses as a percentage of revenues decreased to 35% during fiscal 2019 from 37% during fiscal 2018 primarily due to increased sales of our high-margin Scores and software products.

The fiscal 2018 over 2017 increase of \$39.7 million was primarily attributable to a \$27.4 million increase in personnel and labor costs as a result of increased headcount, higher share-based compensation and incentive costs; as well as a \$10.1 million increase in marketing and travel costs, primarily driven by a company-wide marketing event during fiscal 2018. Selling, general and administrative expenses as a percentage of revenues was 37% during fiscal 2018, materially consistent with those incurred during fiscal 2017.

### ***Amortization of Intangible Assets***

Amortization of intangible assets consists of expense related to intangible assets recorded in connection with our acquisitions. Our finite-lived intangible assets consist primarily of completed technology and customer contracts and relationships, which are being amortized using the straight-line method over periods ranging from four to fifteen years.

Amortization expense was \$6.2 million, \$6.6 million and \$12.7 million for fiscal 2019, 2018 and 2017 respectively. The fiscal 2018 over fiscal 2017 decrease of \$6.1 million was primarily attributable to certain intangible assets associated with our Adepra and HNC acquisitions becoming fully amortized in fiscal 2017.

### ***Restructuring and Acquisition-Related***

There were no restructuring or acquisition-related expenses incurred during fiscal 2019 and 2018.

During fiscal 2017, we incurred net charges totaling \$4.5 million consisting of \$1.7 million in facilities charges associated with vacating excess leased space in San Rafael, California and \$2.8 million in employee separation costs due to the elimination of 79 positions throughout the Company. Cash payments for all the facilities charges will be paid by the end of fiscal 2020. Cash payments for all the employee separation costs were paid before the end of the second quarter of fiscal 2018. There were no acquisition-related expenses incurred during fiscal 2017.

### ***Interest Expense, Net***

Interest expense includes primarily interest on the senior notes issued in May 2008, July 2010 and May 2018, as well as interest and credit facility fees on the revolving line of credit. On our consolidated statements of income and comprehensive income, interest expense is netted with interest income, which is derived primarily from the investment of funds in excess of our immediate operating requirements.

The fiscal 2019 over 2018 increase in net interest expense of \$8.4 million was primarily attributable to a higher average outstanding debt balance during fiscal 2019, as well as a higher average interest rate on our 2018 Senior Notes compared to that on our revolving line of credit.

The fiscal 2018 over 2017 increase in net interest expense of \$5.5 million was primarily attributable to a higher average outstanding debt balance during fiscal 2018, as well as a higher average interest rate on our 2018 Senior Notes compared to that on our revolving line of credit.

#### ***Other Income (Expense), Net***

Other income (expense), net consists primarily of realized investment gains/losses and unrealized gains/losses on certain investments classified as trading securities, exchange rate gains/losses resulting from re-measurement of foreign-currency-denominated receivable and cash balances held by our various reporting entities into their respective functional currencies at period-end market rates, net of the impact of offsetting foreign currency forward contracts, and other non-operating items.

The fiscal 2019 over 2018 decrease in other income (expense), net of \$10.6 million was primarily attributable to a non-operating gain related to the divestiture of an investment during fiscal 2018.

The fiscal 2018 over 2017 change in other income (expense), net of \$13.0 million was primarily attributable to a non-operating gain related to the divestiture of an investment, as well as an increase in foreign currency exchange gain during fiscal 2018.

#### ***Provision for Income Taxes***

Our effective tax rates were 11.1%, 19.4% and 14.6% in fiscal 2019, 2018 and 2017, respectively.

The decrease in our income tax provision in fiscal 2019 compared to fiscal 2018 is due to the decrease in the overall federal tax rate from the blended 24.5% in fiscal 2018 to 21% in fiscal 2019 and the recording of several one-time items in fiscal 2018 related to the enactment of the Tax Cuts and Jobs Act of 2017 (the "Tax Act").

The increase in our income tax provision in fiscal 2018 compared to fiscal 2017 was primarily due to recording the impact related to the enactment of the Tax Act in fiscal 2018. This includes re-measurement to our deferred for the tax rate changes, the one-time deemed repatriation transition tax, and the loss of deductibility of performance-based compensation for certain employees.

As of September 30, 2019, we have approximately \$95.6 million of unremitted earnings of non-U.S. subsidiaries. The Company generates substantial cash flow in the U.S. and does not have a current need for the cash to be returned to the U.S. from the foreign entities. In the event these earnings are later remitted to the U.S., any estimated withholding tax on remittance of those earnings is expected to be immaterial to the income tax provision.

## Operating Income

The following tables set forth certain summary information on a segment basis related to our operating income for the fiscal 2019, 2018 and 2017:

Segment	Year Ended September 30,			Period-to-Period Change		Period-to-Period Percentage Change	
	2019	2018 As Adjusted	2017 As Adjusted	2019 to 2018	2018 to 2017 As Adjusted	2019 to 2018	2018 to 2017 As Adjusted
	(In thousands)			(In thousands)			
Applications	\$ 161,162	\$ 143,964	\$ 168,327	\$ 17,198	\$(24,363)	12%	(14)%

## Decision Management Software

	Year Ended September 30,			Percentage of Revenues		
	2019	2018 As Adjusted	2017 As Adjusted	2019	2018 As Adjusted	2017 As Adjusted
	(In thousands)					
Segment revenues	\$ 133,872	\$ 99,901	\$ 114,812	100%	100%	100%
Segment operating expenses	(168,988)	(134,261)	(122,839)	(126)%	(134)%	(107)%
Segment operating loss	\$ (35,116)	\$ (34,360)	\$ (8,027)	(26)%	(34)%	(7)%

The fiscal 2019 over 2018 increase in operating income of \$78.2 million was attributable to a \$160.0 million increase in segment revenues and a \$0.5 million decrease in amortization expense, partially offset by a \$54.6 million increase in segment operating expenses, a \$19.5 million increase in unallocated corporate expenses and an \$8.2 million increase in share-based compensation expense.

At the segment level, the \$85.9 million increase in segment operating income was the result of an \$88.9 million increase in our Scores segment operating income and a \$17.2 million increase in our Applications segment operating income, partially offset by a \$19.5 million increase in unallocated corporate expenses primarily driven by an increase in unallocated incentive cost and a \$0.7 million increase in our Decision Management Software segment operating loss.

The \$17.2 million increase in Applications segment operating income was attributable to a \$40.7 million increase in segment revenue, partially offset by a \$23.5 million increase in segment operating expenses. Segment operating income as a percentage of segment revenue for Applications increased to 27% from 26% mainly due to an increase in sales of our higher-margin software products.

The \$88.9 million increase in Scores segment operating income was attributable to an \$85.3 million increase in segment revenue as well as a \$3.6 million decrease in segment operating expenses. Segment operating income as a percentage of segment revenue for Scores increased to 86% from 81% mainly due to an increase in sales of our higher-margin score products.

The \$0.7 million increase in Decision Management Software segment operating loss was attributable to a \$34.7 million increase in segment operating expenses, partially offset by a \$34.0 million increase in segment revenue. Segment operating margin for Decision Management Software improved to a negative 26% from a negative 34% mainly due to an increase in sales of our higher-margin software products, partially offset by our continued investment in cloud infrastructure operations and new products.

The fiscal 2018 over 2017 decrease in operating income of \$6.8 million was attributable to a \$48.6 million increase in segment operating expenses, a \$20.3 million increase in unallocated corporate expenses and a \$13.6 million increase in share-based compensation expense, partially offset by a \$65.1 million increase in segment revenues, a \$6.1 million decrease in amortization expense and a \$4.5 million decrease in restructuring and acquisition-related expenses.

At the segment level, the \$3.8 million decrease in segment operating income was the result of a \$26.3 million increase in our Decision Management Software segment operating loss, a \$24.4 million decrease in our Applications segment operating income, and a \$20.3 million increase in unallocated corporate expenses primarily driven by an increase in unallocated incentive cost and a one-time settlement during fiscal 2017, partially offset by a \$67.2 million increase in our Scores segment operating income.

The \$24.4 million decrease in Applications segment operating income was attributable to a \$28.1 million increase in segment operating expenses, partially offset by a \$3.7 million increase in segment revenue. Segment operating income as a percentage of segment revenue for Applications decreased to 26% from 30% mainly due to a decrease in sales of our higher-margin software products.

The \$67.2 million increase in Scores segment operating income was attributable to a \$76.3 million increase in segment revenue, partially offset by a \$9.1 million increase in segment operating expenses. Segment operating income as a percentage of segment revenue for Scores increased to 81% from 79% mainly due to an increase in sales of our higher-margin score products.

The \$26.3 million increase in Decision Management Software segment operating loss was attributable to a \$14.9 million decrease in segment revenue and an \$11.4 million increase in segment operating expenses. Segment operating margin for Decision Management Software decreased to a negative 34% from a negative 7% mainly due to a decrease in sales of our higher-margin software products, as well as our continued investment in cloud infrastructure operations and new products.

## CAPITAL RESOURCES AND LIQUIDITY

### Outlook

As of September 30, 2019, we had \$106.4 million in cash and cash equivalents, which included \$81.1 million held off-shore by our foreign subsidiaries. We believe these balances, as well as available borrowings from our \$400 million revolving line of credit and anticipated cash flows from operating activities, will be sufficient to fund our working and other capital requirements as well as the \$85.0 million principal payment due in July 2020 on our senior notes issued in July 2010. Under our current financing arrangements, we have no other significant debt obligations maturing over the next twelve months. Additionally, though we do not anticipate the need to repatriate any undistributed earnings from our foreign subsidiaries for the foreseeable future, we may take advantage of opportunities where we are able to repatriate these earnings to the U.S. without material incremental tax provision.

In the normal course of business, we evaluate the merits of acquiring technology or businesses, or establishing strategic relationships with or investing in these businesses. We may elect to use available cash and cash equivalents to fund such activities in the future. In the event additional needs for cash arise, or if we refinance our existing debt, we may raise additional funds from a combination of sources, including the potential issuance of debt or equity securities. Additional financing might not be available on terms favorable to us, or at all. If adequate funds were not available or were not available on acceptable terms, our ability to take advantage of unanticipated opportunities or respond to competitive pressures could be limited.

### Summary of Cash Flows

	Year Ended September 30,		
	2019	2018	2017
	(In thousands)		
Cash provided by (used in):			
Operating activities	\$ 260,350	\$ 223,052	\$ 225,644
Investing activities	(42,760)	(14,119)	(20,605)
Financing activities	(200,047)	(218,627)	(180,625)
Effect of exchange rate changes on cash	(1,140)	(5,901)	5,278
Increase (decrease) in cash and cash equivalents	\$ 16,403	\$ (15,595)	\$ 29,692

### *Cash Flows from Operating Activities*

Our primary method for funding operations and growth has been through cash flows generated from operating activities. Net cash provided by operating activities totaled \$260.4 million in fiscal 2019 compared to \$223.1 million in fiscal 2018. The \$37.3 million increase was attributable to a \$65.6 increase in net income as well as an \$18.7 million increase in non-cash items, partially offset by a \$47.0 million decrease that resulted from timing of receipts and payments in our ordinary course of business.

Net cash provided by operating activities totaled \$223.1 million in fiscal 2018 compared to \$225.6 million in fiscal 2017. The \$2.5 million decrease was attributable to a \$7.8 million decrease that resulted from timing of receipts and payments in our ordinary course of business and a \$6.9 million decrease in net income, partially offset by a \$12.2 million increase in non-cash items.

#### ***Cash Flows from Investing Activities***

Net cash used in investing activities totaled \$42.8 million in fiscal 2019 compared to \$14.1 million in fiscal 2018. The \$28.7 million increase was primarily attributable to a \$20.0 million decrease in proceeds from the sale of cost method investment and a \$15.9 million increase in net cash used for acquisition, partially offset by a \$7.3 million decrease in net cash used for purchases of property and equipment.

Net cash used in investing activities totaled \$14.1 million in fiscal 2018 compared to \$20.6 million in fiscal 2017. The \$6.5 million decrease was primarily attributable to a \$20.0 million increase in proceeds from the sale of cost method investment, partially offset by an \$11.5 million increase in net cash used for purchases of property and equipment as well as a \$2.8 million increase in purchases, net of proceeds from sale, of marketable securities.

#### ***Cash Flows from Financing Activities***

Net cash used in financing activities totaled \$200.0 million in fiscal 2019 compared to \$218.6 million in fiscal 2018. The \$18.6 million decrease was primarily due to a \$192.0 million decrease in payments, net of proceeds, on our revolving line of credit, a \$113.7 million decrease in net cash used for repurchases of common stock and an \$11.8 million increase in proceeds from issuance of treasury stock under employee stock plans, partially offset by a \$297.0 million decrease in proceeds, net of payments, from our senior notes.

Net cash used in financing activities totaled \$218.6 million in fiscal 2018 compared to \$180.6 million in fiscal 2017. The \$38.0 million increase was primarily due to a \$210.0 million increase in payments, net of proceeds, on our revolving line of credit, a \$155.0 million increase in net cash used for repurchases of common stock and a \$7.8 million increase in debt issuance cost, partially offset by a \$341.0 million increase in proceeds, net of payments, from our senior notes.

#### **Repurchases of Common Stock**

In July 2018, our Board of Directors approved a stock repurchase program following the completion of the previously authorized program. This program was open-ended and authorizes repurchases of shares of our common stock up to an aggregate cost of \$250.0 million in the open market or in negotiated transactions. In July 2019, our Board of Directors approved a new stock repurchase program following the completion of the July 2018 program. This program is open-ended and authorizes repurchases of shares of our common stock up to an aggregate cost of \$250.0 million in the open market or in negotiated transactions. As of September 30, 2019, we had \$220.3 million remaining under this authorization. During fiscal 2019, 2018 and 2017, we expended \$228.9 million, \$336.9 million and \$193.3 million, respectively, under these and previously authorized stock repurchase programs.

#### **Dividends**

We paid dividends of \$0.02 per share on a quarterly basis during the first two quarters of our fiscal 2017. In May 2017, our Board of Directors discontinued cash dividend payments in favor of using our excess cash flow for share repurchases.

#### **Revolving Line of Credit**

On May 8, 2018, we amended our credit agreement with a syndicate of banks, extending the maturity date of the unsecured revolving line of credit from December 30, 2019 to May 8, 2023, while reducing our borrowing

capacity to \$400 million with an option to increase it by another \$100 million. Proceeds from the credit facility can be used for working capital and general corporate purposes and may also be used for the refinancing of existing debt, acquisitions and the repurchase of our common stock. Interest on amounts borrowed under the credit facility is based on (i) a base rate, which is the greater of (a) the prime rate, (b) the Federal Funds rate plus 0.500% and (c) the one-month LIBOR rate plus 1.000%, plus, in each case, an applicable margin, or (ii) an adjusted LIBOR rate plus an applicable margin. The applicable margin for base rate borrowings ranges from 0% to 0.875% and for LIBOR borrowings ranges from 1.000% to 1.875%, and is determined based on our consolidated leverage ratio. In addition, we must pay credit facility fees. The credit facility contains certain restrictive covenants including maintaining a maximum consolidated leverage ratio of 3.25, subject to a step up to 3.75 following certain permitted acquisitions; and a minimum fixed charge ratio of 2.50 through the maturity of our 2010 Senior Notes in July 2020 (as defined below), upon which maintaining a minimum interest coverage ratio of 3.00. The credit agreement also contains other covenants typical of unsecured facilities. As of September 30, 2019, we had \$345.0 million in borrowings outstanding at a weighted average interest rate of 3.423% and were in compliance with all financial covenants under this credit facility.

### Senior Notes

On July 14, 2010, we issued \$245 million of senior notes in a private placement to a group of institutional investors (the “2010 Senior Notes”). The 2010 Senior Notes were issued in four series with maturities ranging from 6 to 10 years. The outstanding 2010 Senior Notes’ weighted average interest rate is 5.59% and the weighted average maturity is 10 years. The 2010 Senior Notes require interest payments semi-annually and contain certain restrictive covenants, including the maintenance of a maximum consolidated net debt to consolidated EBITDA ratio of 3.00 and a minimum fixed charge coverage ratio of 2.50. On May 8, 2018, we issued \$400 million of senior notes in a private offering to qualified institutional investors (the “2018 Senior Notes”, and with the 2010 Senior Notes, the “Senior Notes”). The 2018 Senior Notes require interest payments semi-annually at a rate of 5.25% per annum and will mature on May 15, 2026. The purchase agreement for the 2010 Senior Notes and the indenture for the 2018 Senior Notes contain certain covenants typical of unsecured obligations. As of September 30, 2019, the carrying value of the Senior Notes was \$485.0 million and we were in compliance with all financial covenants under the purchase agreement and the indenture, respectively.

### Contractual Obligations

The following table presents a summary of our contractual obligations at September 30, 2019:

	Year Ending September 30,					Thereafter	Total
	2020	2021	2022	2023	2024		
	(In thousands)						
Senior notes (1)	\$ 85,000	\$ —	\$ —	\$ —	\$ —	\$400,000	\$485,000
Revolving line of credit				345,000			
Interest due on debt obligations (2)	25,752	21,000	21,000	21,000	21,000	42,000	151,752
Capital lease obligations	1,935	1,934	1,934	—	—	—	5,803
Operating lease obligations	19,842	19,969	17,677	16,940	14,887	24,431	113,746
Purchase obligations (3)	7,000	—	—	—	—	—	—
Unrecognized tax benefits (4)	—	—	—	—	—	—	5,834
Total commitments	<u>\$139,529</u>	<u>\$42,903</u>	<u>\$40,611</u>	<u>\$382,940</u>	<u>\$35,887</u>	<u>\$466,431</u>	<u>\$762,135</u>

- (1) Represents the unpaid principal amount of the Senior Notes.
- (2) Represents interest payments on the Senior Notes.
- (3) Represents amounts associated with agreements that are enforceable, legally binding and specify terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the payments.

- (4) Represents unrecognized tax benefits related to uncertain tax positions. As we are not able to reasonably estimate the timing of the payments or the amount by which the liability will increase or decrease over time, the related balances have not been reflected in the section of the table showing payment by fiscal year.

### **Off-Balance Sheet Arrangements**

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future material effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures, or capital resources.

## **CRITICAL ACCOUNTING POLICIES AND ESTIMATES**

We prepare our consolidated financial statements in conformity with U.S. generally accepted accounting principles. These accounting principles require management to make certain judgments and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities as of the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. We periodically evaluate our estimates including those relating to revenue recognition, goodwill and other intangible assets resulting from business acquisitions, share-based compensation, income taxes and contingencies and litigation. We base our estimates on historical experience and various other assumptions that we believe to be reasonable based on the specific circumstances, the results of which form the basis for making judgments about the carrying value of certain assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We believe the following critical accounting policies involve the most significant judgments and estimates used in the preparation of our consolidated financial statements:

### **Revenue Recognition**

#### *Contracts with Customers*

Our revenue is primarily derived from term-based or perpetual licensing of software and scoring products and solutions, and associated maintenance; SaaS subscription services; scoring and credit monitoring services for consumers; and professional services. For contracts with customers that contain various combinations of products and services, we evaluate whether the products or services are distinct — distinct products or services will be accounted for as separate performance obligations, while non-distinct products or services are combined with others to form a single performance obligation. For contracts with multiple performance obligations, the transaction price is allocated to each performance obligation on a relative standalone selling price (“SSP”) basis. Revenue is recognized when control of the promised goods or services is transferred to our customers.

License revenue is derived from contracts in which we grant our direct customers or distributors the right to deploy or resell our software and scoring products and solutions on-premises. Our software offerings often include a perpetual or term-based license and post-contract support or maintenance, both of which generally represent distinct performance obligations and are accounted for separately. The transaction price is either in the form of a fixed consideration with separate stated prices for license and maintenance, or a sales or usage-based royalty — sometimes subject to a guaranteed minimum — for the license and maintenance bundle. When the amount is in the form of a fixed consideration, including the guaranteed minimum in sales or usage-based royalty, license revenue from distinct on-premises license is recognized at the point in time when the software or scoring solution is made available to the customer or distributor. Any royalties not subject to the guaranteed minimum or earned in excess of the minimum amount are recognized as transactional revenue when the subsequent sales or usage occurs. Revenue allocated to maintenance is generally recognized ratably over the contract period as customers simultaneously consume and receive benefits.

In addition to sales or usage-based royalty on our software and scoring products, transactional revenue is also derived from SaaS contracts in which we provide customers with access to and standard support for our software application either in the FICO<sup>®</sup> Analytic Cloud or AWS, our primary cloud infrastructure provider, on a subscription basis. The transaction price typically includes a fixed consideration in the form of a guaranteed minimum that allows up to a certain level of usage and a variable consideration in the form of usage or transaction-based fees in excess of the minimum threshold; or usage or transaction-based variable amount not subject to a minimum threshold. We determined the nature of our SaaS arrangements is to provide continuous access to our hosted application in the cloud, i.e., a stand-ready obligation that comprises a series of distinct service periods (e.g., a series of distinct daily, monthly or annual periods of service). We estimate the total variable consideration at contract inception — subject to any constraints that may apply — and update the estimates as new information becomes available and recognize the amount ratably over the SaaS service period, unless we determine it is appropriate to allocate the variable amount to each distinct service period and recognize revenue as each distinct service period is performed.

We also derive transactional revenue from credit scoring and monitoring services that provide consumers access to their credit reports and enable them to monitor their credit. These are provided as either a one-time or ongoing subscription service renewed monthly or annually, all with a fixed consideration. We determined the nature of the subscription service is a stand-ready obligation to generate credit reports, provide credit monitoring and other services for our customers, which comprises a series of distinct service periods (e.g., a series of distinct daily, monthly or annual periods of service). Revenue from one-time or monthly subscription services is recognized during the period when service is performed. Revenue from annual subscription services is recognized ratably over the subscription period.

Professional services include software or SaaS implementation, consulting, model development, training services and premium cloud support. They are sold either standalone, or together with other products or services and generally represent distinct performance obligations. The transaction price can be a fixed amount or on a time and materials basis. Revenue on fixed-price services is recognized using an input method based on labor hours expended which we believe provides a faithful depiction of the transfer of services. Revenue on services provided on a time and materials basis is recognized applying the “right-to-invoice” practical expedient as the amount to which we have a right to invoice the customer corresponds directly with the value of our performance to the customer. In addition, we sell premium cloud support on a subscription basis for a fixed amount, and revenue is recognized ratably over the contract term.

### ***Significant Judgments***

Our contracts with customers often include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct and should be accounted for separately may require significant judgment. Specifically, when implementation service is included in the original software or SaaS offerings, judgment is required to determine if the implementation service significantly modifies or customizes the software or SaaS service in such a way that the risks of providing it and the customization service are inseparable. In rare instances, contracts may include significant modification or customization of the software or SaaS service and will result in the combination of software or SaaS service and implementation service as one performance obligation.

We determine the SSPs using data from our historical standalone sales, or, in instances where such information is not available (such as when we do not sell the product or service separately), we consider factors such as the stated contract prices, our overall pricing practices and objectives, go-to-market strategy, size and type of the transactions, and effects of the geographic area on pricing, among others. When the selling price of a product or service is highly variable, we may use the residual approach to determine the SSP of that product or service. Significant judgment may be required to determine the SSP for each distinct performance obligation when it involves the consideration of many market conditions and entity-specific factors discussed above.

Significant judgment may be required to determine the timing of satisfaction of a performance obligation in certain professional services contracts with a fixed consideration, in which we measure progress using an input method based on labor hours expended. In order to estimate the total hours of the project, we make assumptions about labor utilization, efficiency of processes, the customer's specification and IT environment, among others. For certain complex projects, due to the risks and uncertainties inherent with the estimation process and factors relating to the assumptions, actual progress may differ due to the change in estimated total hours. Adjustments to estimates are made in the period in which the facts requiring such revisions become known and, accordingly, recognized revenues are subject to revisions as the contract progresses to completion.

### ***Capitalized Commission Costs***

We capitalize incremental commission fees paid as a result of obtaining customer contracts. Capitalized commission costs are amortized on a straight-line basis over ten years — determined using a portfolio approach — based on the transfer of goods or services to which the assets relate, taking into consideration both the initial and future contracts as we do not typically pay a commission on a contract renewal. The amortization costs are included in selling, general, and administrative expenses of our consolidated statements of income and comprehensive income.

We apply a practical expedient to recognize the incremental costs of obtaining contracts as an expense when incurred if the amortization period of the assets that we otherwise would have recognized is one year or less. These costs are recorded within selling, general, and administrative expenses.

### **Business Combinations**

Accounting for our acquisitions requires us to recognize, separately from goodwill, the assets acquired and the liabilities assumed at their acquisition-date fair values. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition-date fair values of the assets acquired and the liabilities assumed. While we use our best estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, we record adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to our consolidated statements of income and comprehensive income.

Accounting for business combinations requires our management to make significant estimates and assumptions, especially at the acquisition date, including our estimates for intangible assets, contractual obligations assumed, pre-acquisition contingencies and contingent consideration, where applicable. If we cannot reasonably determine the fair value of a pre-acquisition contingency (non-income tax related) by the end of the measurement period, we will recognize an asset or a liability for such pre-acquisition contingency if: (i) it is probable that an asset existed or a liability had been incurred at the acquisition date and (ii) the amount of the asset or liability can be reasonably estimated. Although we believe the assumptions and estimates we have made in the past have been reasonable and appropriate, they are based in part on historical experience and information obtained from the management of the acquired companies and are inherently uncertain. Subsequent to the measurement period, changes in our estimates of such contingencies will affect earnings and could have a material effect on our consolidated results of operations and financial position.

Examples of critical estimates in valuing certain of the intangible assets we have acquired include but are not limited to: (i) future expected cash flows from software license sales, support agreements, consulting contracts, other customer contracts and acquired developed technologies and patents; (ii) expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed; and (iii) the acquired company's brand and competitive position, as well as

assumptions about the period of time the acquired brand will continue to be used in the combined company's product portfolio. Unanticipated events and circumstances may occur that may affect the accuracy or validity of such assumptions, estimates or actual results. Historically, there have been no significant changes in our estimates or assumptions. To the extent a significant acquisition is made during a fiscal year, as appropriate we will expand the discussion to include specific assumptions and inputs used to determine the fair value of our acquired intangible assets.

In addition, uncertain tax positions and tax-related valuation allowances assumed in connection with a business combination are initially estimated as of the acquisition date. We reevaluate these items quarterly based upon facts and circumstances that existed as of the acquisition date with any adjustments to our preliminary estimates being recorded to goodwill provided that we are within the measurement period. Subsequent to the measurement period or our final determination of the tax allowance's or contingency's estimated value, whichever comes first, changes to these uncertain tax positions and tax-related valuation allowances will affect our provision for income taxes in our consolidated statements of income and comprehensive income and could have a material impact on our consolidated results of operations and financial position. Historically, there have been no significant changes in our valuation allowances or uncertain tax positions as it relates to business combinations. We do not believe there is a reasonable likelihood there will be a material change in the future estimates.

### **Goodwill, Acquisition Intangibles and Other Long-Lived Assets — Impairment Assessment**

Goodwill represents the excess of cost over the fair value of identifiable assets acquired and liabilities assumed in business combinations. We assess goodwill for impairment for each of our reporting units on an annual basis during the fourth quarter using a July 1 measurement date unless circumstances require a more frequent measurement. We have determined that our reporting units are the same as our reportable segments. When evaluating goodwill for impairment, we may first perform an assessment qualitatively whether it is more likely than not that a reporting unit's carrying amount exceeds its fair value, referred to as a "step zero" approach. If, based on the review of the qualitative factors, we determine it is not more likely than not that the fair value of a reporting unit is less than its carrying value, we would bypass the two-step impairment test. Events and circumstances we consider in performing the "step zero" qualitative assessment include macro-economic conditions, market and industry conditions, internal cost factors, share price fluctuations, and the operational stability and the overall financial performance of the reporting units. If we conclude that it is more likely than not that a reporting unit's fair value is less than its carrying amount, we would perform the first step ("step one") of the two-step impairment test and calculate the estimated fair value of the reporting unit by using discounted cash flow valuation models and by comparing our reporting units to guideline publicly-traded companies. These methods require estimates of our future revenues, profits, capital expenditures, working capital, and other relevant factors, as well as selecting appropriate guideline publicly-traded companies for each reporting unit. We estimate these amounts by evaluating historical trends, current budgets, operating plans, industry data, and other relevant factors. Using assumptions that are different from those used in our estimates, but in each case reasonable, could produce significantly different results and materially affect the determination of fair value and/or goodwill impairment for each reporting unit. For example, if the economic environment impacts our forecasts beyond what we have anticipated, it could cause the fair value of a reporting unit to fall below its respective carrying value.

For fiscal 2017, we elected to proceed directly to the step one quantitative analysis for all of our reporting units, as three years had elapsed since the date of our previous quantitative valuation. There was a substantial excess of fair value over carrying value for each of our reporting units and we determined goodwill was not impaired for any of our reporting units for fiscal 2017. For fiscal 2018 and 2019, we performed a step zero qualitative analysis for our annual assessment of goodwill impairment. After evaluating and weighing all relevant events and circumstances, we concluded that it is not more likely than not that the fair value of any of our reporting units was less their carrying amounts. Consequently, we did not perform a step one quantitative analysis and determined goodwill was not impaired for any of our reporting units for fiscal 2018 and 2019.

Our intangible assets that have finite useful lives and other long-lived assets are assessed for potential impairment when there is evidence that events and circumstances related to our financial performance and economic environment indicate the carrying amount of the assets may not be recoverable. When impairment indicators are identified, we test for impairment using undiscounted cash flows. If such tests indicate impairment, then we measure and record the impairment as the difference between the carrying value of the asset and the fair value of the asset. Significant management judgment is required in forecasting future operating results used in the preparation of the projected cash flows. Should different conditions prevail, material write downs of our intangible assets or other long-lived assets could occur. We review the estimated remaining useful lives of our acquired intangible assets at each reporting period. A reduction in our estimate of remaining useful lives, if any, could result in increased annual amortization expense in future periods. We did not recognize any impairment charges on intangible assets that have finite useful lives or other long-lived assets in fiscal 2019, 2018 and 2017.

As discussed above, while we believe that the assumptions and estimates utilized were appropriate based on the information available to management, different assumptions, judgments and estimates could materially affect our impairment assessments for our goodwill, acquired intangibles with finite lives and other long-lived assets. Historically, there have been no significant changes in our estimates or assumptions that would have had a material impact for our goodwill or intangible assets impairment assessment. We believe our projected operating results and cash flows would need to be significantly less favorable to have a material impact on our impairment assessment. However, based upon our historical experience with operations, we do not believe there is a reasonable likelihood of a significant change in our projections.

### **Share-Based Compensation**

We measure stock-based compensation cost at the grant date based on the fair value of the award and recognize it as expense, net of estimated forfeitures, over the vesting or service period, as applicable, of the stock award (generally three to four years). We use the Black-Scholes valuation model to determine the fair value of our stock options and a Monte Carlo valuation model to determine the fair value of our market share units. Our valuation models and generally accepted valuation techniques require us to make assumptions and to apply judgment to determine the fair value of our awards. These assumptions and judgments include estimating the volatility of our stock price, expected dividend yield, employee turnover rates and employee stock option exercise behaviors. Historically, there have been no material changes in our estimates or assumptions. We do not believe there is a reasonable likelihood there will be a material change in the future estimates or assumptions. See Note 13 to the accompanying consolidated financial statements for further discussion of our share-based employee benefit plans.

### **Income Taxes**

We estimate our income taxes based on the various jurisdictions where we conduct business, which involves significant judgment in determining our income tax provision. We estimate our current tax liability using currently enacted tax rates and laws and assess temporary differences that result from differing treatments of certain items for tax and accounting purposes. These differences result in deferred tax assets and liabilities recorded on our balance sheet using the currently enacted tax rates and laws that will apply to taxable income for the years in which those tax assets are expected to be realized or settled. We then assess the likelihood our deferred tax assets will be realized and to the extent we believe realization is not more likely than not, we establish a valuation allowance. When we establish a valuation allowance or increase this allowance in an accounting period, we record a corresponding income tax expense in our consolidated statements of income and comprehensive income. In assessing the need for the valuation allowance, we consider future taxable income in the jurisdictions we operate; our ability to carry back tax attributes to prior years; an analysis of our deferred tax assets and the periods over which they will be realizable; and ongoing prudent and feasible tax planning strategies. An increase in the valuation allowance would have an adverse impact, which could be material, on our income tax provision and net income in the period in which we record the increase.

On December 22, 2017, the Tax Act was enacted by the U.S. government. The Tax Act makes broad and complex changes to the U.S. tax code that affect our fiscal year ended September 30, 2019, including but not limited to: (1) creating the base erosion anti-abuse tax measure that taxes certain payments between a U.S. corporation and its foreign subsidiaries; (2) creating a new provision designed to tax global intangible low-tax income of foreign subsidiaries; and (3) a foreign derived intangible income. We have estimated the impact of these changes in our income tax provision for 2019.

We recognize and measure benefits for uncertain tax positions using a two-step approach. The first step is to evaluate the tax position taken or expected to be taken in a tax return by determining if the technical merits of the tax position indicate it is more likely than not that the tax position will be sustained upon audit, including resolution of any related appeals or litigation processes. For tax positions more likely than not of being sustained upon audit, the second step is to measure the tax benefit as the largest amount more than 50% likely of being realized upon settlement. Significant judgment is required to evaluate uncertain tax positions and they are evaluated on a quarterly basis. Our evaluations are based upon a number of factors, including changes in facts or circumstances, changes in tax law, correspondence with tax authorities during the course of audits and effective settlement of audit issues. Changes in the recognition or measurement of uncertain tax positions could result in material increases or decreases in our income tax expense in the period in which we make the change, which could have a material impact on our effective tax rate and operating results.

A description of our accounting policies associated with tax-related contingencies and valuation allowances assumed as part of a business combination is provided under “Business Combinations” above.

## **Contingencies and Litigation**

We are subject to various proceedings, lawsuits and claims relating to products and services, technology, labor, stockholder and other matters. We are required to assess the likelihood of any adverse outcomes and the potential range of probable losses in these matters. If the potential loss is considered probable and the amount can be reasonably estimated, we accrue a liability for the estimated loss. If the potential loss is considered less than probable or the amount cannot be reasonably estimated, disclosure of the matter is considered. The amount of loss accrual or disclosure, if any, is determined after analysis of each matter, and is subject to adjustment if warranted by new developments or revised strategies. Due to uncertainties related to these matters, accruals or disclosures are based on the best information available at the time. Significant judgment is required in both the assessment of likelihood and in the determination of a range of potential losses. Revisions in the estimates of the potential liabilities could have a material impact on our consolidated financial position or consolidated results of operations. Historically, there have been no material changes in our estimates or assumptions. We do not believe there is a reasonable likelihood there will be a material change in the future estimates.

## **New Accounting Pronouncements**

### *Recently Adopted Accounting Pronouncements*

In May 2014, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2014-09. The standard’s core principle is that a reporting entity will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from the contracts with customers. The guidance permits two methods of adoption: retrospectively to each prior reporting period presented (“full retrospective method”), or retrospectively with the cumulative effect of initially applying the guidance recognized at the date of initial application (“modified retrospective method”).

We adopted ASU 2014-09 in the first quarter of our fiscal 2019 using the full retrospective method which required us to adjust each prior reporting period presented. This adoption primarily affected timing of revenue

recognition of license revenue on term licenses and transactional revenue on guaranteed minimum fees related to our on-premises software products. Under the new standard, we recognize revenue when control of the license is transferred to the customer, rather than at the date payments become due and payable when there are extended payment terms, or ratably over the term of the contract as required under the previous standard. In addition, revenue attributable to a software license renewal is recognized at the beginning of the applicable renewal period rather than at the signing of the renewal agreement as required under the previous standard. Additionally, under the new standard, when we enter into noncancellable contracts that provide unconditional rights to payment from our customers for services we have not yet completed or services we will provide in the near future, we present receivables — our unconditional rights to payments — and deferred revenues on a gross basis, rather than on a net basis. Finally, under the new standard we capitalize and amortize contract acquisition costs such as commissions paid for SaaS cloud services contracts in excess of one year. Following the adoption of ASU 2014-09, the revenue recognition for our other sales arrangements remained materially consistent with our historical practice.

Upon adoption of ASU 2014-09, we applied the standard's practical expedients that permit the omission of prior-period information about our performance obligations.

See Note 1 to the accompanying consolidated financial statements for further discussion on the impact of the standard adoption on our previously reported results.

#### *Recent Accounting Pronouncements Not Yet Adopted*

In August 2018, the FASB issued ASU No. 2018-15, "*Intangibles — Goodwill and Other (Topic 350): Internal-Use Software.*" ASU 2018-15 aligns the requirements for capitalizing implementation costs incurred in a cloud computing arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The standard is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2019, which means that it will be effective for our fiscal year beginning October 1, 2020. Early adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2018-15 on our consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, "*Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*" and subsequent amendments to the initial guidance: ASU 2018-19, ASU 2019-04 and ASU 2019-05 (collectively, "Topic 326"). Topic 326 requires measurement and recognition of expected credit losses for financial assets held. Topic 326 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2019, which means it will be effective for our fiscal year beginning October 1, 2020. Early adoption is permitted. We are currently evaluating the impact of our pending adoption of Topic 326 on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, "*Leases (Topic 842)*" and subsequent amendments to the initial guidance: ASU 2017-13, ASU 2018-10, ASU 2018-11, ASU 2018-20 and ASU 2019-01 (collectively, "Topic 842"). Topic 842 requires companies to generally recognize on the balance sheet operating and financing lease liabilities and corresponding right-of-use assets. Topic 842 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2018, which means it will be effective for our fiscal year beginning October 1, 2019. Early adoption is permitted. We are currently evaluating the impact of our pending adoption of Topic 842 on our consolidated financial statements. We expect that most of our operating leases will be recognized as right-of-use assets and corresponding lease liabilities on our consolidated balance sheets, which will increase our total assets and total liabilities upon adoption. Subject to the completion of our assessment, we expect the adoption of the standard will result in recognition of right-of-use assets of approximately \$90 million and lease liability of approximately \$99 million in our consolidated balance sheets.

We do not expect that any other recently issued accounting pronouncements will have a significant effect on our financial statements.

## Item 7A. Quantitative and Qualitative Disclosures about Market Risk

### Market Risk Disclosures

We are exposed to market risk related to changes in interest rates and foreign exchange rates. We do not use derivative financial instruments for speculative or trading purposes.

#### Interest Rate

We maintain an investment portfolio consisting of bank deposits and money market funds. The funds provide daily liquidity and may be subject to interest rate risk and fall in value if market interest rates increase. We do not expect our operating results or cash flows to be affected to any significant degree by a sudden change in market interest rates. The following table presents the principal amounts and related weighted-average yields for our investments with interest rate risk at September 30, 2019 and 2018:

	September 30, 2019			September 30, 2018		
	Cost Basis	Carrying Amount	Average Yield	Cost Basis	Carrying Amount	Average Yield
	(Dollars in thousands)					
Cash and cash equivalents	\$106,426	\$106,426	0.76%	\$90,023	\$90,023	0.66%

On July 14, 2010, we issued \$245 million of senior notes in a private placement to a group of institutional investors (the “2010 Senior Notes”). On May 8, 2018, we issued \$400 million of senior notes in a private offering to qualified institutional investors (the “2018 Senior Notes”, and with the 2010 Senior Notes, the “Senior Notes”). The fair value of the Senior Notes may increase or decrease due to various factors, including fluctuations in market interest rates and fluctuations in general economic conditions. See Management’s Discussion and Analysis of Financial Condition and Results of Operations — Capital Resources and Liquidity for additional information on the Senior Notes. The following table presents the carrying amounts and fair values for the Senior Notes at September 30, 2019 and 2018:

	September 30, 2019		September 30, 2018	
	Carrying Amounts	Fair Value	Carrying Amounts	Fair Value
	(In thousands)			
The 2010 Senior Notes	85,000	86,121	113,000	114,413
The 2018 Senior Notes	400,000	\$428,000	400,000	404,000
Total	<u>\$485,000</u>	<u>\$514,121</u>	<u>\$513,000</u>	<u>\$518,413</u>

We have interest rate risk with respect to our \$400 million unsecured revolving line of credit. Interest on amounts borrowed under the credit facility is based on (i) a base rate, which is the greater of (a) the prime rate and (b) the Federal Funds rate plus 0.500% and (c) the one-month LIBOR rate plus 1.000%, plus, in each case, an applicable margin, or (ii) an adjusted LIBOR rate plus an applicable margin. The applicable margin for base rate borrowings ranges from 0% to 0.875% and for LIBOR borrowings ranges from 1.000% to 1.875% and is determined based on our consolidated leverage ratio. A change in interest rates on this variable rate debt impacts the interest incurred and cash flows, but does not impact the fair value of the instrument. We had \$345.0 million in borrowings outstanding at a weighted average interest of 3.423% under the credit facility as of September 30, 2019.

#### Foreign Currency Forward Contracts

We use derivative instruments to manage risks caused by fluctuations in foreign exchange rates. The primary objective of our derivative instruments is to protect the value of foreign-currency-denominated receivable and cash balances from the effects of volatility in foreign exchange rates that might occur prior to conversion to their functional currencies. We principally utilize foreign currency forward contracts, which enable

us to buy and sell foreign currencies in the future at fixed exchange rates and economically offset changes in foreign exchange rates. We routinely enter into contracts to offset exposures denominated in the British pound, Euro and Singapore dollar.

Foreign-currency-denominated receivable and cash balances are remeasured at foreign exchange rates in effect on the balance sheet date with the effects of changes in foreign exchange rates reported in other income (expense), net. The forward contracts are not designated as hedges and are marked to market through other income (expense), net. Fair value changes in the forward contracts help mitigate the changes in the value of the remeasured receivable and cash balances attributable to changes in foreign exchange rates. The forward contracts are short-term in nature and typically have average maturities at inception of less than three months.

The following tables summarize our outstanding foreign currency forward contracts, by currency, at September 30, 2019 and 2018:

<b>September 30, 2019</b>				
<b>Contract Amount</b>				<b>Fair Value</b>
<b>Foreign Currency</b>	<b>US\$</b>		<b>US\$</b>	
<b>(In thousands)</b>				
Sell foreign currency:				
Euro (EUR)	EUR	10,800	\$11,723	—
Buy foreign currency:				
British pound (GBP)	GBP	5,200	\$ 6,400	—
Singapore dollar (SGD)	SGD	5,798	\$ 4,200	—
 <b>September 30, 2018</b>				
<b>Contract Amount</b>				<b>Fair Value</b>
<b>Foreign Currency</b>	<b>US\$</b>		<b>US\$</b>	
<b>(In thousands)</b>				
Sell foreign currency:				
Euro (EUR)	EUR	9,000	\$10,372	—
Buy foreign currency:				
British pound (GBP)	GBP	8,598	\$11,200	—
Singapore dollar (SGD)	SGD	9,580	\$ 7,000	—

The foreign currency forward contracts were entered into on September 30 of each fiscal year; therefore, the fair value was \$0 on September 30, 2019 and 2018.

**Item 8. Financial Statements and Supplementary Data**

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

To the Board of Directors and Stockholders of  
Fair Isaac Corporation  
San Jose, California

**Opinions on the Financial Statements and Internal Control over Financial Reporting**

We have audited the accompanying consolidated balance sheets of Fair Isaac Corporation and subsidiaries (the “Company”) as of September 30, 2019 and 2018, and the related consolidated statements of income and comprehensive income, stockholders’ equity, and cash flows for each of the three years in the period ended September 30, 2019, and the related notes (collectively referred to as the “financial statements”). We also have audited the Company’s internal control over financial reporting as of September 30, 2019, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Company as of September 30, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended September 30, 2019, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of September 30, 2019, based on criteria established in *Internal Control — Integrated Framework (2013)* issued by COSO.

**Change in Accounting Principle**

As discussed in Note 1 to the financial statements, the Company has changed its method of accounting for revenue from contracts with customers in fiscal year 2019 due to the adoption of the new revenue standard. The Company adopted the new revenue standard using the full retrospective approach.

**Basis for Opinions**

The Company’s management is responsible for these financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these financial statements and an opinion on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the financial statements included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and

operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

### **Definition and Limitations of Internal Control over Financial Reporting**

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

### **Critical Audit Matter**

The critical audit matter communicated below is a matter arising from the current-period audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

*Revenues — Refer to Notes 1, 15 and 16 to the financial statements*

#### *Critical Audit Matter Description*

The Company recognizes revenue when control of the promised goods or services in a contract is transferred to the customer, in an amount that reflects the consideration to which the Company expects to be entitled to in exchange for those goods or services. The Company's revenue is primarily derived from term-based or perpetual licensing of software and scoring products and solutions, and associated maintenance; software-as-a-service (SaaS) subscription services; scoring and credit monitoring services for consumers; and professional services.

The Company's contracts with customers often include promises to transfer multiple products and services to a customer. For contracts with customers that contain various combinations of products and services, the Company evaluates whether the products or services are distinct. Distinct products or services will be accounted for as separate performance obligations, while non-distinct products or services are combined with others to form a single performance obligation.

For transactional revenue, the transaction price for contracts with customers typically includes a fixed consideration in the form of a guaranteed minimum that allows up to a certain level of usage and a variable consideration in the form of usage or transaction-based fees in excess of the minimum threshold; or usage or transaction-based variable amount not subject to a minimum threshold.

For contracts with multiple performance obligations, the transaction price is allocated to each performance obligation on a relative standalone selling price (“SSP”) basis. The Company determines the SSP using data from historical standalone sales, or, in instances where such information is not available, the Company considers factors such as the stated contract prices, their overall pricing practices and objectives, go-to-market strategy, size and type of the transactions, and effects of the geographic area on pricing, among others.

Given the complexity of certain of the Company’s contracts, together with the judgment involved in identifying performance obligations, estimating variable consideration, and determining SSP, auditing the related revenue required both extensive audit effort due to the volume and complexity of the contracts and a high degree of auditor judgment when performing audit procedures and evaluating the results of those procedures.

*How the Critical Audit Matter Was Addressed in the Audit*

Our audit procedures related to revenue recognition and the Company’s identification of performance obligations, estimation of variable consideration, and determination of SSP included the following, among others:

- We tested the effectiveness of controls over contract revenue, including management’s controls over the identification of performance obligations, estimation of variable consideration, and determination of the SSP.
- We selected a sample of contracts and performed the following procedures:
  - Obtained and read the contract, including master agreements, renewal agreements, and other source documents that were part of the contract.
  - Obtained other contracts with the same customer that were entered into at or near the same time and evaluated management’s conclusion of whether two or more contracts for multiple products and services promised to a customer should be combined and accounted for as a single contract for revenue recognition.
  - Confirmed the terms of the contract directly with the customer, including whether there are side agreements and terms not formally included in the contract that may impact the identification of performance obligations and revenue recognition.
  - Evaluated internal certification letters provided by the Company’s sales personnel to identify the existence of side agreements that may impact the identification of performance obligations and revenue recognition.
  - Tested management’s identification of the performance obligations within the customer contract, including whether material rights that gave rise to a performance obligation were identified.
  - Tested management’s estimation of variable consideration in the transaction price by evaluating the reasonableness of the inputs used in management’s estimates.
  - Tested the accuracy and completeness of the data and factors used in management’s determination of the SSP for each performance obligation.
  - Evaluated the consistency of the methodologies used to develop the SSP for each performance obligation.

/s/ Deloitte & Touche LLP  
San Diego, CA  
November 8, 2019

We have served as the Company’s auditor since 2004.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

**1. Nature of Business and Summary of Significant Accounting Policies**

***Fair Isaac Corporation***

Incorporated under the laws of the State of Delaware, Fair Isaac Corporation (“FICO”) is a provider of analytic, software and data management products and services that enable businesses to automate, improve and connect decisions. FICO provides a range of analytical solutions, credit scoring and credit account management products and services to banks, credit reporting agencies, credit card processing agencies, insurers, retailers, healthcare organizations and public agencies.

In these consolidated financial statements, FICO is referred to as “we,” “us,” “our,” or “the Company.”

***Principles of Consolidation and Basis of Presentation***

Effective October 1, 2018, we adopted ASU No. 2014-09, “*Revenue from Contracts with Customers (Topic 606)*” (“ASU 2014-09”) using the full retrospective method. In connection with this adoption, the results and related disclosures for the comparative fiscal 2018 and 2017 presented in this Form 10-K were adjusted to be presented as if ASU 2014-09 had been in effect during such fiscal years. See “New Accounting Pronouncements” and “Revenue Recognition” below. All amounts and disclosures set forth in this Form 10-K reflect these changes.

The consolidated financial statements include the accounts of FICO and its subsidiaries. All intercompany accounts and transactions have been eliminated.

***Use of Estimates***

We make estimates and assumptions that affect the amounts reported in the financial statements and the disclosures made in the accompanying notes. For example, we use estimates in determining the collectibility of accounts receivable; the appropriate levels of various accruals; labor hours in connection with fixed-fee service contracts; the amount of our tax provision and the realizability of deferred tax assets. We also use estimates in determining the remaining economic lives and carrying values of acquired intangible assets, property and equipment, and other long-lived assets. In addition, we use assumptions to estimate the fair value of reporting units and share-based compensation. Actual results may differ from our estimates.

***Cash and Cash Equivalents***

Cash and cash equivalents consist of cash in banks and investments with an original maturity of 90 days or less at time of purchase.

***Fair Value of Financial Instruments***

The fair value of certain of our financial instruments, including cash and cash equivalents, receivables, other current assets, accounts payable, accrued compensation and employee benefits, other accrued liabilities and amounts outstanding under our revolving line of credit, approximate their carrying amounts because of the short-term maturity of these instruments. The fair values of our cash and cash equivalents and marketable security investments are disclosed in Note 4. The fair value of our derivative instruments is disclosed in Note 5. The fair value of our senior notes is disclosed in Note 9.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

***Investments***

We categorize our investments in debt and equity instruments as trading, available-for-sale or held-to-maturity at the time of purchase. Trading securities are carried at fair value with unrealized gains or losses included in income (expense). Available-for-sale securities are carried at fair value measurements using quoted prices in active markets for identical assets or liabilities with unrealized gains or losses included in accumulated other comprehensive income (loss). Held-to-maturity securities are carried at amortized cost. Dividends and interest income are accrued as earned. Realized gains and losses are determined on a specific identification basis and are included in other income (expense). We review marketable securities for impairment whenever circumstances and situations change such that there is an indication that the carrying amounts may not be recovered. We did not classify any securities as held-to-maturity or available-for-sale during each of the three years ended September 30, 2019, 2018, and 2017. Investments with remaining maturities over one year are classified as long-term investments.

We have certain other investments for which there is no readily determinable fair value. These investments are recorded at cost, less impairment (if any) plus or minus adjustments for observable price changes. The carrying value of these investments was \$1.6 million and \$1.7 million at September 30, 2019 and 2018, respectively, and they are reported in other assets on our balance sheets. At September 30, 2019, we reviewed the carrying value of these investments and concluded that they were not impaired and as of that date, we are unable to exercise significant influence over the investees.

***Concentration of Risk***

Financial instruments that potentially expose us to concentrations of risk consist primarily of cash and cash equivalents, marketable securities and accounts receivable, which are generally not collateralized. Our policy is to place our cash, cash equivalents, and marketable securities with high quality financial institutions, commercial corporations and government agencies in order to limit the amount of credit exposure. We have established guidelines relative to diversification and maturities for maintaining safety and liquidity. We generally do not require collateral from our customers, but our credit extension and collection policies include analyzing the financial condition of potential customers, establishing credit limits, monitoring payments, and aggressively pursuing delinquent accounts. We maintain allowances for potential credit losses.

A significant portion of our revenues are derived from the sales of products and services to the consumer credit and banking industries.

***Property and Equipment***

Property and equipment are recorded at cost less accumulated depreciation and amortization. Major renewals and improvements are capitalized, while repair and maintenance costs are expensed as incurred. Assets acquired under capital leases are included in property and equipment with corresponding depreciation included in accumulated depreciation. Depreciation and amortization charges are calculated using the straight-line method over the following estimated useful lives:

	<u>Estimated Useful Life</u>
Data processing equipment and software	3 years to 6 years
Office furniture and equipment	3 years to 7 years
Leasehold improvements	Shorter of estimated useful life or lease term
Equipment under capital lease	Shorter of estimated useful life or lease term

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

The cost and accumulated depreciation for property and equipment sold, retired or otherwise disposed of are removed from the applicable accounts and resulting gains or losses are recorded in our consolidated statements of income and comprehensive income. Depreciation and amortization on property and equipment totaled \$24.2 million, \$22.6 million and \$23.0 million during fiscal 2019, 2018 and 2017, respectively.

***Internal-Use Software***

Costs incurred to develop internal-use software during the application development stage are capitalized and reported at cost. Application development stage costs generally include costs associated with internal-use software configuration, coding, installation and testing. Costs of significant upgrades and enhancements that result in additional functionality are also capitalized whereas costs incurred for maintenance and minor upgrades and enhancements are expensed as incurred. Capitalized costs are amortized using the straight-line method over two to three years. Software development costs required to be capitalized for internal-use software have not been material to date.

***Capitalized Software and Research and Development Costs***

Software development costs relating to products to be sold in the normal course of business are expensed as incurred as research and development costs until technological feasibility is established. Technological feasibility for our products occurs approximately concurrently with the general release of our products; accordingly, we have not capitalized any development or production costs. Costs we incur to maintain and support our existing products after the general release of the product are expensed in the period they are incurred and included in research and development costs in our consolidated statements of income and comprehensive income.

***Goodwill, Acquisition Intangibles and Other Long-Lived Assets***

Goodwill represents the excess of cost over the fair value of identifiable assets acquired and liabilities assumed in business combinations. We assess goodwill for impairment for each of our reporting units on an annual basis during the fourth quarter using a July 1 measurement date unless circumstances require a more frequent measurement. We have determined that our reporting units are the same as our reportable segments. When evaluating goodwill for impairment, we may first perform an assessment qualitatively whether it is more likely than not that a reporting unit's carrying amount exceeds its fair value, referred to as a "step zero" approach. If, based on the review of the qualitative factors, we determine it is not more likely than not that the fair value of a reporting unit is less than its carrying value, we would bypass the two-step impairment test. Events and circumstances we consider in performing the "step zero" qualitative assessment include macro-economic conditions, market and industry conditions, internal cost factors, share price fluctuations, and the operational stability and the overall financial performance of the reporting units. If we conclude that it is more likely than not that a reporting unit's fair value is less than its carrying amount, we would perform the first step ("step one") of the two-step impairment test and calculate the estimated fair value of the reporting unit by using discounted cash flow valuation models and by comparing our reporting units to guideline publicly-traded companies. These methods require estimates of our future revenues, profits, capital expenditures, working capital, and other relevant factors, as well as selecting appropriate guideline publicly-traded companies for each reporting unit. We estimate these amounts by evaluating historical trends, current budgets, operating plans, industry data, and other relevant factors. Alternatively, we may bypass the qualitative assessment described above for any reporting unit in any period and proceed directly to performing step one of the goodwill impairment test.

For each of fiscal 2019 and 2018, we performed a step zero qualitative analysis for our annual assessment of goodwill impairment. After evaluating and weighing all relevant events and circumstances, we concluded that it

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

is not more likely than not that the fair value of any of our reporting units was less their carrying amounts, and did not perform a step one quantitative analysis. For fiscal 2017, we elected to proceed directly to the step one quantitative analysis for all of our reporting units, and determined goodwill was not impaired for any of our reporting units as there was a substantial excess of fair value over carrying value for each of our reporting units. Consequently, we did not recognize any goodwill impairment charges in fiscal 2019, 2018 or 2017.

We amortize our finite-lived intangible assets which result from our acquisitions over the following estimated useful lives:

	<u>Estimated Useful Life</u>
Completed technology	4 years to 10 years
Customer contracts and relationships	5 years to 15 years
Trade names	1 year to 3 years
Non-compete agreements	2 years

Our intangible assets that have finite useful lives and other long-lived assets are assessed for potential impairment when there is evidence that events and circumstances related to our financial performance and economic environment indicate the carrying amount of the assets may not be recoverable. When impairment indicators are identified, we test for impairment using undiscounted cash flows. If such tests indicate impairment, then we measure and record the impairment as the difference between the carrying value of the asset and the fair value of the asset. We did not recognize any impairment charges on intangible assets that have finite useful lives or other long-lived assets in fiscal 2019, 2018 and 2017.

***Revenue Recognition***

*Contracts with Customers*

Our revenue is primarily derived from term-based or perpetual licensing of software and scoring products and solutions, and associated maintenance; SaaS subscription services; scoring and credit monitoring services for consumers; and professional services. For contracts with customers that contain various combinations of products and services, we evaluate whether the products or services are distinct — distinct products or services will be accounted for as separate performance obligations, while non-distinct products or services are combined with others to form a single performance obligation. For contracts with multiple performance obligations, the transaction price is allocated to each performance obligation on a relative SSP basis. Revenue is recognized when control of the promised goods or services is transferred to our customers.

License revenue is derived from contracts in which we grant our direct customers or distributors the right to deploy or resell our software and scoring products and solutions on-premises. Our software offerings often include a perpetual or term-based license and post-contract support or maintenance, both of which generally represent distinct performance obligations and are accounted for separately. The transaction price is either in the form of a fixed consideration with separate stated prices for license and maintenance, or a sales or usage-based royalty — sometimes subject to a guaranteed minimum — for the license and maintenance bundle. When the amount is in the form of a fixed consideration, including the guaranteed minimum in sales or usage-based royalty, license revenue from distinct on-premises license is recognized at the point in time when the software or scoring solution is made available to the customer or distributor. Any royalties not subject to the guaranteed minimum or earned in excess of the minimum amount are recognized as transactional revenue when the subsequent sales or usage occurs. Revenue allocated to maintenance is generally recognized ratably over the contract period as customers simultaneously consume and receive benefits.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

In addition to sales or usage-based royalty on our software and scoring products, transactional revenue is also derived from SaaS contracts in which we provide customers with access to and standard support for our software application either in the FICO<sup>®</sup> Analytic Cloud or AWS, our primary cloud infrastructure provider, on a subscription basis. The transaction price typically includes a fixed consideration in the form of a guaranteed minimum that allows up to a certain level of usage and a variable consideration in the form of usage or transaction-based fees in excess of the minimum threshold; or usage or transaction-based variable amount not subject to a minimum threshold. We determined the nature of our SaaS arrangements is to provide continuous access to our hosted application in the cloud, i.e., a stand-ready obligation that comprises a series of distinct service periods (e.g., a series of distinct daily, monthly or annual periods of service). We estimate the total variable consideration at contract inception — subject to any constraints that may apply — and update the estimates as new information becomes available and recognize the amount ratably over the SaaS service period, unless we determine it is appropriate to allocate the variable amount to each distinct service period and recognize revenue as each distinct service period is performed.

We also derive transactional revenue from credit scoring and monitoring services that provide consumers access to their credit reports and enable them to monitor their credit. These are provided as either a one-time or ongoing subscription service renewed monthly or annually, all with a fixed consideration. We determined the nature of the subscription service is a stand-ready obligation to generate credit reports, provide credit monitoring and other services for our customers, which comprises a series of distinct service periods (e.g., a series of distinct daily, monthly or annual periods of service). Revenue from one-time or monthly subscription services is recognized during the period when service is performed. Revenue from annual subscription services is recognized ratably over the subscription period.

Professional services include software or SaaS implementation, consulting, model development, training services and premium cloud support. They are sold either standalone, or together with other products or services and generally represent distinct performance obligations. The transaction price can be a fixed amount or on a time and materials basis. Revenue on fixed-price services is recognized using an input method based on labor hours expended which we believe provides a faithful depiction of the transfer of services. Revenue on services provided on a time and materials basis is recognized applying the “right-to-invoice” practical expedient as the amount to which we have a right to invoice the customer corresponds directly with the value of our performance to the customer. In addition, we sell premium cloud support on a subscription basis for a fixed amount, and revenue is recognized ratably over the contract term.

*Significant Judgments*

Our contracts with customers often include promises to transfer multiple products and services to a customer. Determining whether products and services are considered distinct and should be accounted for separately may require significant judgment. Specifically, when implementation service is included in the original software or SaaS offerings, judgment is required to determine if the implementation service significantly modifies or customizes the software or SaaS service in such a way that the risks of providing it and the customization service are inseparable. In rare instances, contracts may include significant modification or customization of the software or SaaS service and will result in the combination of software or SaaS service and implementation service as one performance obligation.

We determine the SSPs using data from our historical standalone sales, or, in instances where such information is not available (such as when we do not sell the product or service separately), we consider factors such as the stated contract prices, our overall pricing practices and objectives, go-to-market strategy, size and type of the transactions, and effects of the geographic area on pricing, among others. When the selling price of a

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

product or service is highly variable, we may use the residual approach to determine the SSP of that product or service. Significant judgment may be required to determine the SSP for each distinct performance obligation when it involves the consideration of many market conditions and entity-specific factors discussed above.

Significant judgment may be required to determine the timing of satisfaction of a performance obligation in certain professional services contracts with a fixed consideration, in which we measure progress using an input method based on labor hours expended. In order to estimate the total hours of the project, we make assumptions about labor utilization, efficiency of processes, the customer's specification and IT environment, among others. For certain complex projects, due to the risks and uncertainties inherent with the estimation process and factors relating to the assumptions, actual progress may differ due to the change in estimated total hours. Adjustments to estimates are made in the period in which the facts requiring such revisions become known and, accordingly, recognized revenues are subject to revisions as the contract progresses to completion.

*Capitalized Commission Costs*

We capitalize incremental commission fees paid as a result of obtaining customer contracts. Capitalized commission costs, which are recorded in other assets within the accompanying consolidated balance sheets, were \$33.7 million and \$27.1 million at September 30, 2019 and 2018, respectively.

Capitalized commission costs are amortized on a straight-line basis over ten years — determined using a portfolio approach — based on the transfer of goods or services to which the assets relate, taking into consideration both the initial and future contracts as we do not typically pay a commission on a contract renewal. The amortization costs are included in selling, general, and administrative expenses of our consolidated statements of income and comprehensive income. The amount of amortization was \$5.0 million, \$4.5 million and \$4.2 million during the years ended September 30, 2019, 2018 and 2017, respectively. There was no impairment loss in relation to the costs capitalized.

We apply a practical expedient to recognize the incremental costs of obtaining contracts as an expense when incurred if the amortization period of the assets that we otherwise would have recognized is one year or less. These costs are recorded within selling, general, and administrative expenses.

See Note 15 for our discussion on disaggregation of revenues, and Note 16 for contract balances and performance obligations.

*Business Combinations*

Accounting for our acquisitions requires us to recognize, separately from goodwill, the assets acquired and the liabilities assumed at their acquisition-date fair values. Goodwill as of the acquisition date is measured as the excess of consideration transferred and the net of the acquisition-date fair values of the assets acquired and the liabilities assumed. While we use our best estimates and assumptions to accurately value assets acquired and liabilities assumed at the acquisition date, our estimates are inherently uncertain and subject to refinement. As a result, during the measurement period, which may be up to one year from the acquisition date, we record adjustments to the assets acquired and liabilities assumed with the corresponding offset to goodwill. Upon the conclusion of the measurement period or final determination of the values of assets acquired or liabilities assumed, whichever comes first, any subsequent adjustments are recorded to our consolidated statements of income and comprehensive income.

Accounting for business combinations requires our management to make significant estimates and assumptions, especially at the acquisition date, including our estimates for intangible assets, contractual

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

obligations assumed, pre-acquisition contingencies and contingent consideration, where applicable. If we cannot reasonably determine the fair value of a pre-acquisition contingency (non-income tax related) by the end of the measurement period, we will recognize an asset or a liability for such pre-acquisition contingency if: (i) it is probable that an asset existed or a liability had been incurred at the acquisition date and (ii) the amount of the asset or liability can be reasonably estimated. Although we believe the assumptions and estimates we have made in the past have been reasonable and appropriate, they are based in part on historical experience and information obtained from the management of the acquired companies and are inherently uncertain. Subsequent to the measurement period, changes in our estimates of such contingencies will affect earnings and could have a material effect on our consolidated results of operations and financial position.

Examples of critical estimates in valuing certain of the intangible assets we have acquired include but are not limited to: (i) future expected cash flows from software license sales, support agreements, consulting contracts, other customer contracts and acquired developed technologies and patents; (ii) expected costs to develop the in-process research and development into commercially viable products and estimated cash flows from the projects when completed; and (iii) the acquired company's brand and competitive position, as well as assumptions about the period of time the acquired brand will continue to be used in the combined company's product portfolio. Unanticipated events and circumstances may occur that may affect the accuracy or validity of such assumptions, estimates or actual results.

In addition, uncertain tax positions and tax related valuation allowances assumed in connection with a business combination are initially estimated as of the acquisition date. We reevaluate these items quarterly based upon facts and circumstances that existed as of the acquisition date with any adjustments to our preliminary estimates being recorded to goodwill provided that we are within the measurement period. Subsequent to the measurement period or our final determination of the tax allowance's or contingency's estimated value, whichever comes first, changes to these uncertain tax positions and tax related valuation allowances will affect our provision for income taxes in our consolidated statements of income and comprehensive income and could have a material impact on our consolidated results of operations and financial position.

***Income Taxes***

We estimate our income taxes based on the various jurisdictions where we conduct business, which involves significant judgment in determining our income tax provision. We estimate our current tax liability using currently enacted tax rates and laws and assess temporary differences that result from differing treatments of certain items for tax and accounting purposes. These differences result in deferred tax assets and liabilities recorded on our balance sheet using the currently enacted tax rates and laws that will apply to taxable income for the years in which those tax assets are expected to be realized or settled. We then assess the likelihood our deferred tax assets will be realized and to the extent we believe realization is not more likely than not, we establish a valuation allowance. When we establish a valuation allowance or increase this allowance in an accounting period, we record a corresponding income tax expense in our consolidated statements of income and comprehensive income. In assessing the need for the valuation allowance, we consider future taxable income in the jurisdictions we operate; our ability to carry back tax attributes to prior years; an analysis of our deferred tax assets and the periods over which they will be realizable; and ongoing prudent and feasible tax planning strategies. An increase in the valuation allowance would have an adverse impact, which could be material, on our income tax provision and net income in the period in which we record the increase.

On December 22, 2017, the Tax Act was enacted by the U.S. government. The Tax Act makes broad and complex changes to the U.S. tax code that affect our fiscal year ended September 30, 2019, including but not limited to: (1) creating the base erosion anti-abuse tax measure that taxes certain payments between a U.S.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

corporation and its foreign subsidiaries; (2) creating a new provision designed to tax global intangible low-tax income of foreign subsidiaries; and (3) a foreign derived intangible income. We have estimated the impact of these changes in our income tax provision for 2019.

We recognize and measure benefits for uncertain tax positions using a two-step approach. The first step is to evaluate the tax position taken or expected to be taken in a tax return by determining if the technical merits of the tax position indicate it is more likely than not that the tax position will be sustained upon audit, including resolution of any related appeals or litigation processes. For tax positions more likely than not of being sustained upon audit, the second step is to measure the tax benefit as the largest amount more than 50% likely of being realized upon settlement. Significant judgment is required to evaluate uncertain tax positions and they are evaluated on a quarterly basis. Our evaluations are based upon a number of factors, including changes in facts or circumstances, changes in tax law, correspondence with tax authorities during the course of audits and effective settlement of audit issues. Changes in the recognition or measurement of uncertain tax positions could result in material increases or decreases in our income tax expense in the period in which we make the change, which could have a material impact on our effective tax rate and operating results.

A description of our accounting policies associated with tax-related contingencies and valuation allowances assumed as part of a business combination is provided under “Business Combinations” above.

***Earnings per Share***

Basic earnings per share are computed on the basis of the weighted-average number of common shares outstanding during the period under measurement. Diluted earnings per share are based on the weighted-average number of common shares outstanding and potential common shares. Potential common shares result from the assumed exercise of outstanding stock options or other potentially dilutive equity instruments, when they are dilutive under the treasury stock method.

***Comprehensive Income***

Comprehensive income is the change in our equity (net assets) during each period from transactions and other events and circumstances from non-owner sources. It includes net income, foreign currency translation adjustments and unrealized gains and losses on our investments in marketable securities, net of tax.

***Foreign Currency and Derivative Financial Instruments***

We have determined that the functional currency of each foreign operation is the local currency. Assets and liabilities denominated in their local foreign currencies are translated into U.S. dollars at the exchange rate on the balance sheet date. Revenues and expenses are translated at average rates of exchange prevailing during the period. Foreign currency translation adjustments are accumulated as a separate component of consolidated stockholders’ equity.

We utilize derivative instruments to manage market risks associated with fluctuations in certain foreign currency exchange rates as they relate to specific balances of accounts receivable and cash denominated in foreign currencies. We principally utilize foreign currency forward contracts to protect against market risks arising in the normal course of business. Our policies prohibit the use of derivative instruments for the sole purpose of trading for profit on price fluctuations or to enter into contracts that intentionally increase our underlying exposure. All of our foreign currency forward contracts have maturity periods of less than three months.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

At the end of the reporting period, foreign-currency-denominated assets and liabilities are remeasured into the functional currencies of the reporting entities at current market rates. The change in value from this remeasurement is reported as a foreign exchange gain or loss for that period in other income (expense), net in the accompanying consolidated statements of income and comprehensive income.

We recorded transactional foreign exchange losses of \$0.0 million, \$0.4 million and \$1.1 million during fiscal 2019, 2018 and 2017, respectively.

***Share-Based Compensation***

We measure stock-based compensation cost at the grant date based on the fair value of the award and recognize it as expense, net of estimated forfeitures, over the vesting or service period, as applicable, of the stock award (generally three to four years). See Note 13 for further discussion of our share-based employee benefit plans.

***Advertising and Promotion Costs***

Advertising and promotion costs are expensed as incurred and are included in selling, general and administrative expenses in the accompanying consolidated statements of income and comprehensive income. Advertising and promotion costs totaled \$3.6 million, \$4.1 million and \$3.1 million in fiscal 2019, 2018 and 2017, respectively.

***New Accounting Pronouncements***

***Recently Adopted Accounting Pronouncements***

In May 2014, the FASB issued ASU 2014-09. The standard's core principle is that a reporting entity will recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In addition, the standard requires disclosure of the nature, amount, timing, and uncertainty of revenue and cash flows arising from the contracts with customers. The guidance permits two methods of adoption: full retrospective method or modified retrospective method.

We adopted ASU 2014-09 in the first quarter of our fiscal 2019 using the full retrospective method which required us to adjust each prior reporting period presented. This adoption primarily affected timing of revenue recognition of license revenue on term licenses and transactional revenue on guaranteed minimum fees related to our on-premises software products. Under the new standard, we recognize revenue when control of the license is transferred to the customer, rather than at the date payments become due and payable when there are extended payment terms, or ratably over the term of the contract as required under the previous standard. In addition, revenue attributable to a software license renewal is recognized at the beginning of the applicable renewal period rather than at the signing of the renewal agreement as required under the previous standard. Additionally, under the new standard, when we enter into noncancellable contracts that provide unconditional rights to payment from our customers for services we have not yet completed or services we will provide in the near future, we present receivables — our unconditional rights to payments — and deferred revenues on a gross basis, rather than on a net basis. Finally, under the new standard we capitalize and amortize contract acquisition costs such as commissions paid for SaaS cloud services contracts in excess of one year. Following the adoption of ASU 2014-09, the revenue recognition for our other sales arrangements remained materially consistent with our historical practice.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

Upon adoption of ASU 2014-09, we applied the standard's practical expedients that permit the omission of prior-period information about our performance obligations.

Adoption of the standard impacted our previously reported results as follows:

Consolidated Balance Sheets

	September 30, 2018		
	As Previously Reported	Adjustment (In thousands)	As Adjusted

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

*Recent Accounting Pronouncements Not Yet Adopted*

In August 2018, the FASB issued ASU No. 2018-15, “*Intangibles — Goodwill and Other (Topic 350): Internal-Use Software.*” ASU 2018-15 aligns the requirements for capitalizing implementation costs incurred in a cloud computing arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software. The standard is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2019, which means that it will be effective for our fiscal year beginning October 1, 2020. Early adoption is permitted. We are currently evaluating the impact of our pending adoption of ASU 2018-15 on our consolidated financial statements.

In June 2016, the FASB issued ASU No. 2016-13, “*Financial Instruments — Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments*” and subsequent amendments to the initial guidance: ASU 2018-19, ASU 2019-04 and ASU 2019-05 (collectively, “Topic 326”). Topic 326 requires measurement and recognition of expected credit losses for financial assets held. Topic 326 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2019, which means it will be effective for our fiscal year beginning October 1, 2020. Early adoption is permitted. We are currently evaluating the impact of our pending adoption of Topic 326 on our consolidated financial statements.

In February 2016, the FASB issued ASU No. 2016-02, “*Leases (Topic 842)*” and subsequent amendments to the initial guidance: ASU 2017-13, ASU 2018-10, ASU 2018-11, ASU 2018-20 and ASU 2019-01 (collectively, “Topic 842”). Topic 842 requires companies to generally recognize on the balance sheet operating and financing lease liabilities and corresponding right-of-use assets. Topic 842 is effective for fiscal years and interim periods within those fiscal years beginning after December 15, 2018, which means it will be effective for our fiscal year beginning October 1, 2019. Early adoption is permitted. We are currently evaluating the impact of our pending adoption of Topic 842 on our consolidated financial statements. We expect that most of our operating leases will be recognized as right-of-use assets and corresponding lease liabilities on our consolidated balance sheets, which will increase our total assets and total liabilities upon adoption. Subject to the completion of our assessment, we expect the adoption of the standard will result in recognition of right-of-use assets of approximately \$90 million and lease liability of approximately \$99 million in our consolidated balance sheets.

We do not expect that any other recently issued accounting pronouncements will have a significant effect on our financial statements.

## **2. Business Combinations**

On August 9, 2019, we acquired 100% of the equity of EZMCOM for \$18.6 million in cash. EZMCOM is a provider of digital security and authentication products that helps organizations protect users, data and applications from credential theft, account takeover and breaches. We expect that this acquisition will help provide our clients, including the world’s largest financial services institutions, with a seamless approach to authentication and customer onboarding across digital channels, mobile devices, servers and workstations. We recorded, separately from goodwill, the assets acquired and the liabilities assumed at their acquisition-date fair values, which included \$2.7 million of cash and \$6.0 million of intangible assets primarily consisting of completed technology. The intangible assets are being amortized using the straight-line method over a weighted average useful life of 4.73 years. We allocated \$11.2 million of goodwill to our Applications segment that is deductible for tax purposes. EZMCOM has been included in our operating results since the acquisition date. The pro forma impact of this acquisition was not deemed material to our results of operations.

There were no acquisitions incurred during fiscal 2018 and 2017.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

**3. Cash, Cash Equivalents and Marketable Securities**

The following is a summary of cash, cash equivalents and marketable securities at September 30, 2019 and 2018:

	September 30, 2019		September 30, 2018	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(In thousands)			
<b>Cash and Cash Equivalents:</b>				
Cash	\$ 77,525	\$ 77,525	\$71,610	\$71,610
Money market funds	22,102	22,102	13,813	13,813
Bank time deposits	6,799	6,799	4,600	4,600
Total	\$106,426	\$106,426	\$90,023	\$90,023
<b>Long-term Marketable Securities:</b>				
Marketable securities	\$ 17,193	\$ 20,222	\$14,313	\$18,059

The assets included in marketable securities represent long-term marketable equity securities held under a supplemental retirement and savings plan for senior management employees, which are distributed upon termination or retirement of the employees. These investments are treated as trading securities and recorded at fair value.

**4. Fair Value Measurements**

Fair value is defined as the price that would be received from the sale of an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The accounting guidance establishes a three-level hierarchy for disclosure that is based on the extent and level of judgment used to estimate the fair value of assets and liabilities.

- Level 1 — uses unadjusted quoted prices that are available in active markets for identical assets or liabilities. Our Level 1 assets are comprised of money market funds and certain marketable securities. We do not have any liabilities that are valued using inputs identified under a Level 1 hierarchy as of September 30, 2019 and 2018.
- Level 2 — uses inputs other than quoted prices included in Level 1 that are either directly or indirectly observable through correlation with market data. These include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in markets that are not active; and inputs to valuation models or other pricing methodologies that do not require significant judgment because the inputs used in the model, such as interest rates and volatility, can be corroborated by readily observable market data. We do not have any assets that are valued using inputs identified under a Level 2 hierarchy as of September 30, 2019 and 2018. We measure the fair value of the Senior Notes based on Level 2 inputs, which include quoted market prices and interest rate spreads of similar securities.
- Level 3 — uses one or more significant inputs that are unobservable and supported by little or no market activity, and that reflect the use of significant management judgment. Level 3 assets and liabilities include those whose fair value measurements are determined using pricing models, discounted cash flow methodologies or similar valuation techniques, and significant management

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

judgment or estimation. We do not have any assets or liabilities that are valued using inputs identified under a Level 3 hierarchy as of September 30, 2019 and 2018.

The following table represents financial assets that we measured at fair value on a recurring basis at September 30, 2019 and 2018:

<u>September 30, 2019</u>	<u>Active Markets for Identical Instruments (Level 1)</u>	<u>Fair Value as of September 30, 2019</u>
(In thousands)		
<b>Assets:</b>		
Cash equivalents (1)	\$28,901	\$28,901
Marketable securities (2)	<u>20,222</u>	<u>20,222</u>
Total	<u>\$49,123</u>	<u>\$49,123</u>
<u>September 30, 2018</u>	<u>Active Markets for Identical Instruments (Level 1)</u>	<u>Fair Value as of September 30, 2018</u>
(In thousands)		
<b>Assets:</b>		
Cash equivalents (1)	\$18,413	\$18,413
Marketable securities (2)	<u>18,059</u>	<u>18,059</u>
Total	<u>\$36,472</u>	<u>\$36,472</u>

- (1) Included in cash and cash equivalents on our balance sheet at September 30, 2019 and 2018. Not included in this table are cash deposits of \$77.5 million and \$71.6 million at September 30, 2019 and 2018, respectively.
- (2) Represents securities held under a supplemental retirement and savings plan for certain officers and senior management employees, which are distributed upon termination or retirement of the employees. Included in long-term marketable securities on our consolidated balance sheets at September 30, 2019 and 2018.

For the fair value of our derivative instruments and senior notes, see Note 5 and Note 9, respectively.

There were no transfers between Level 1, Level 2, and Level 3 of the fair value hierarchy during the year ended September 30, 2019, 2018 or 2017.

## 5. Derivative Financial Instruments

We use derivative instruments to manage risks caused by fluctuations in foreign exchange rates. The primary objective of our derivative instruments is to protect the value of foreign-currency-denominated receivable and cash balances from the effects of volatility in foreign exchange rates that might occur prior to conversion to their functional currencies. We principally utilize foreign currency forward contracts, which enable us to buy and sell foreign currencies in the future at fixed exchange rates and economically offset changes in foreign exchange rates. We routinely enter into contracts to offset exposures denominated in the British pound, Euro and Singapore dollar.

Foreign-currency-denominated receivable and cash balances are remeasured at foreign exchange rates in effect on the balance sheet date with the effects of changes in foreign exchange rates reported in other income (expense), net. The forward contracts are not designated as hedges and are marked to market through other

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

income (expense), net. Fair value changes in the forward contracts help mitigate the changes in the value of the remeasured receivable and cash balances attributable to changes in foreign exchange rates. The forward contracts are short-term in nature and typically have average maturities at inception of less than three months.

The following tables summarize our outstanding foreign currency forward contracts, by currency at September 30, 2019 and 2018:

	<b>September 30, 2019</b>			
	Contract Amount		Fair Value	
	Foreign Currency	US\$	US\$	
	(In thousands)			
Sell foreign currency:				
Euro (EUR)	EUR	10,800	\$11,723	—
Buy foreign currency:				
British pound (GBP)	GBP	5,200	\$ 6,400	—
Singapore dollar (SGD)	SGD	5,798	\$ 4,200	—
	<b>September 30, 2018</b>			
	Contract Amount		Fair Value	
	Foreign Currency	US\$	US\$	
	(In thousands)			
Sell foreign currency:				
Euro (EUR)	EUR	9,000	\$10,372	—
Buy foreign currency:				
British pound (GBP)	GBP	8,598	\$11,200	—
Singapore dollar (SGD)	SGD	9,580	\$ 7,000	—

The foreign currency forward contracts were entered into on September 30 of each fiscal year; therefore, their fair value was \$0 at September 30, 2019 and 2018.

Gains (losses) on derivative financial instruments are recorded in our consolidated statements of income and comprehensive income as a component of other income (expense), net. These amounts are shown below for the years ended September 30, 2019, 2018 and 2017:

	<b>Year Ended September 30,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
	(In thousands)		
Gain (loss) on foreign currency forward contracts	\$(896)	\$(476)	\$210

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

**6. Goodwill and Intangible Assets**

Intangible assets that are subject to amortization consisted of the following at September 30, 2019 and 2018:

	September 30, 2019				September 30, 2018			
	Gross Carrying Amount	Accumulated Amortization	Net	Average Life	Gross Carrying Amount	Accumulated Amortization	Net	Average Life
	(In thousands, except average life)							
Completed technology	\$ 82,724	\$(77,331)	\$ 5,393	5	\$ 82,295	\$(77,400)	\$ 4,895	5
Customer contracts and relationships	30,583	(22,283)	8,300	8	28,692	(19,051)	9,641	8
Trade names	150	(25)	125	1	—	—	—	0
Non-compete agreements	350	(29)	321	2	—	—	—	0
	\$113,807	\$(99,668)	\$14,139		\$110,987	\$(96,451)	\$14,536	

Amortization expense associated with our intangible assets is reflected as a separate operating expense caption — amortization of intangible assets — and is excluded from cost of revenues and selling, general and administrative expenses within the accompanying consolidated statements of income and comprehensive income. Amortization expense consisted of the following:

	Year Ended September 30,		
	2019	2018	2017
	(In thousands)		
Completed technology	\$1,974	\$2,380	\$ 6,511

Total	<u><u>\$ 53,027</u></u>	<u><u>\$ 48,837</u></u>

**8. Revolving Line of Credit**

On May 8, 2018, we amended our credit agreement with a syndicate of banks, extending the maturity date of the unsecured revolving line of credit from December 30, 2019 to May 8, 2023, while reducing our borrowing capacity to \$400 million with an option to increase it by another \$100 million. Proceeds from the credit facility can be used for working capital and general corporate purposes and may also be used for the refinancing of existing debt, acquisitions, and the repurchase of our common stock. Interest on amounts borrowed under the credit facility is based on (i) a base rate, which is the greater of (a) the prime rate and (b) the Federal Funds rate plus 0.500% and (c) the one-month LIBOR rate plus 1.000%, plus, in each case, an applicable margin, or (ii) an adjusted LIBOR rate plus an applicable margin. The applicable margin for base rate borrowings ranges from 0% to 0.875% and for LIBOR borrowings ranges from 1.000% to 1.875% and is determined based on our consolidated leverage ratio. In addition, we must pay credit facility fees. The credit facility contains certain restrictive covenants including maintaining a maximum consolidated leverage ratio of 3.25, subject to a step up to 3.75 following certain permitted acquisitions; and a minimum fixed charge ratio of 2.50 through the maturity of our 2010 Senior Notes in July 2020, upon which maintaining a minimum interest coverage ratio of 3.00. The credit agreement also contains other covenants typical of unsecured facilities. The credit agreement also contains other covenants typical of unsecured facilities. As of September 30, 2019, we had \$345.0 million in borrowings outstanding at a weighted average interest rate of 3.423%, of which \$212.0 million was classified as a long-term

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

liability and recorded in long-term debt within the accompanying consolidated balance sheets. We were in compliance with all financial covenants under this credit facility as of September 30, 2019.

**9. Senior Notes**

On July 14, 2010, we issued \$245 million of senior notes in a private placement to a group of institutional investors (the “2010 Senior Notes”). The 2010 Senior Notes were issued in four series as follows:

<u>Series</u>	<u>Amount</u> (In millions)	<u>Interest Rate</u>	<u>Maturity Date</u>
E	\$60.0	4.72%	July 14, 2016
F	\$72.0	5.04%	July 14, 2017
G	\$28.0	5.42%	July 14, 2019
H	\$85.0	5.59%	July 14, 2020

The 2010 Senior Notes require us to pay the entire unpaid principal balances of each note series on its maturity date. The 2010 Senior Notes also require interest payments semi-annually and contain certain restrictive covenants, including the maintenance of a maximum consolidated net debt to consolidated EBITDA ratio of 3.00 and a minimum fixed charge coverage ratio of 2.50. We were in compliance with all financial covenants under the 2010 Senior Notes as of September 30, 2019.

On May 8, 2018, we issued \$400 million of senior notes in a private offering to qualified institutional investors (the “2018 Senior Notes”, and with the 2010 Senior Notes, the “Senior Notes”). The 2018 Senior Notes require interest payments semi-annually at a rate of 5.25% per annum and will mature on May 15, 2026.

The purchase agreements for the 2010 Senior Notes and the indenture for the 2018 Senior Notes contain certain covenants typical of unsecured obligations.

The following table presents the carrying amounts and fair values for the Senior Notes at September 30, 2019 and 2018:

	<u>September 30, 2019</u>		<u>September 30, 2018</u>	
	<u>Carrying Amounts (1)</u>	<u>Fair Value</u>	<u>Carrying Amounts (1)</u>	<u>Fair Value</u>
	(In thousands)			
The 2010 Senior Notes	\$ 85,000	\$ 86,121	\$113,000	\$114,413
The 2018 Senior Notes	400,000	428,000	400,000	404,000
Total	<u>\$485,000</u>	<u>\$514,121</u>	<u>\$513,000</u>	<u>\$518,413</u>

(1) Amounts exclusive of net debt issuance cost of \$5.2 million and \$6.1 million at September 30, 2019 and 2018, respectively.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

Future principal payments for the Senior Notes are as follows (in thousands):

<u>Year Ending September 30,</u>	
2020	\$ 85,000
2021	—
2022	—
2023	—
2024	—
Thereafter	<u>400,000</u>
Total	<u><u>\$485,000</u></u>

**10. Employee Benefit Plans**

*Defined Contribution Plans*

We sponsor the Fair Isaac Corporation 401(k) plan for eligible employees in the U.S. Under this plan, eligible employees may contribute up to 25% of compensation, not to exceed statutory limits. We also provide a company matching contribution. Investment in FICO common stock is not an option under this plan. Our contributions into all 401(k) plans, including former-acquired-company-sponsored plans that have since merged into the Fair Isaac Corporation 401(k) plan or have been frozen, totaled \$10.3 million, \$8.8 million and \$8.4 million during fiscal 2019, 2018 and 2017, respectively.

*Employee Incentive Plans*

We maintain various employee incentive plans for the benefit of eligible employees, including officers. The awards generally are based on the achievement of certain financial and performance objectives subject to the discretion of management. Total expenses under our employee incentive plans were \$57.5 million, \$48.4 million and \$41.6 million during fiscal 2019, 2018 and 2017, respectively.

**11. Restructuring Expenses**

There was no restructuring expense incurred during fiscal 2019 and 2018.

During fiscal 2017, we incurred net charges totaling \$4.5 million consisting of \$1.7 million in facilities charges associated with vacating excess leased space in San Rafael, California and \$2.8 million in employee separation costs due to the elimination of 79 positions throughout the Company. Cash payments for all the facilities charges will be paid by the end of fiscal 2020. Cash payments for all the employee separation costs were paid before the end of the second quarter of fiscal 2018.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

The following tables summarize our restructuring accruals associated with the above actions. The current portion and non-current portion were recorded in other accrued liabilities and other liabilities, respectively, within the accompanying consolidated balance sheets.

	Accrual at September 30, 2017	Cash Payments	Accrual at September 30, 2018
		(In thousands)	
Facilities charges	\$ 8,120	\$(2,892)	\$ 5,228
Employee separation	185	(185)	—
	8,305	\$(3,077)	5,228

Less: current portion	(3,850)		(1,378)
Non-current	\$ 1,378		\$ —

**12. Income Taxes**

On December 22, 2017, the Tax Cuts and Jobs Act (the “Tax Act”) was enacted by the U.S. government. The Tax Act makes broad and complex changes to the U.S. tax code that affect our fiscal year ended September 30, 2019, including but not limited to: (1) creating the base erosion anti-abuse tax measure that taxes certain payments between a U.S. corporation and its foreign subsidiaries; (2) creating a new provision designed to tax global intangible low-tax income (“GILTI”) of foreign subsidiaries; and (3) a foreign derived intangible income. We have estimated the impact of these changes in our income tax provision for 2019.

The GILTI provisions impose a tax on foreign income in excess of a deemed return on tangible assets of foreign corporations. The FASB Staff Q&A, Topic 740, No. 5, “*Accounting for Global Intangible Low-Taxed Income*”, states that an entity can make an accounting policy election to either recognize deferred taxes for temporary basis differences expected to reverse as GILTI in future years or provide for the tax expense related to GILTI in the year the tax is incurred as a period expense. We have elected to account for any potential GILTI tax in the period in which it is incurred.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

The provision for income taxes was as follows during fiscal 2019, 2018 and 2017:

	<u>Year ended September 30,</u>		
	<u>2019</u>	<u>2018</u> <u>As Adjusted</u>	<u>2017</u> <u>As Adjusted</u>
	(In thousands)		
<b>Current:</b>			
Federal	\$ 1,299	\$ 8,071	\$19,576
State	(423)	2,236	1,055
Foreign	<u>15,371</u>	<u>9,559</u>	<u>8,486</u>
	<u>16,247</u>	<u>19,866</u>	<u>29,117</u>
<b>Deferred:</b>			
Federal	7,003	13,987	(8,523)
State	947	132	(296)
Foreign	<u>(249)</u>	<u>(3,535)</u>	<u>2,571</u>
	<u>7,701</u>	<u>10,584</u>	<u>(6,248)</u>
<b>Total provision</b>	<u>\$23,948</u>	<u>\$30,450</u>	<u>\$22,869</u>

The foreign provision was based on foreign pre-tax earnings of \$36.0 million, \$10.8 million and \$43.3 million in fiscal 2019, 2018 and 2017, respectively. Current foreign tax expense related to foreign tax withholdings was \$6.5 million, \$6.0 million and \$4.6 million in fiscal 2019, 2018 and 2017, respectively. Foreign withholding tax and related foreign tax credits are included in current tax expense above.

Deferred tax assets and liabilities at September 30, 2019 and 2018 were as follows:

	<u>September 30,</u>	
	<u>2019</u>	<u>2018</u> <u>As Adjusted</u>
	(In thousands)	
<b>Deferred tax assets:</b>		
Loss and credit carryforwards	\$ 26,702	\$ 24,377

Other liabilities	<u>(8,244)</u>	<u>(7,226)</u>
Total deferred tax liabilities	<u>(34,789)</u>	<u>(32,131)</u>
Deferred tax assets, net	<u>\$ 6,006</u>	<u>\$ 13,805</u>

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

Based upon the level of historical taxable income and projections for future taxable income over the periods that the deferred tax assets will reverse, management believes it is more likely than not that we will realize the benefits of the deferred tax assets, net of the existing valuation allowance at September 30, 2019.

As of September 30, 2019, we had available U.S. federal, state and foreign net operating loss (“NOL”) carryforwards of approximately \$10.6 million, \$0.2 million, and \$25.0 million, respectively. The U.S. NOLs were acquired in connection with our acquisitions of Braun in fiscal 2005, Adepra in fiscal 2012 and Infoglide in fiscal 2013. The U.S. federal NOL carryforward will expire at various dates beginning in fiscal 2020, if not utilized. The state NOL carryforward will expire at various dates beginning in fiscal 2021, if not utilized. The \$25.0 million of foreign NOL includes \$3.5 million related to China and \$12.7 million related to Germany. Due to a limited ability to utilize the China and Germany NOLs, a full valuation allowance has been recorded on the China and Germany NOLs, resulting in no tax benefit. Utilization of the U.S. federal and state NOL are subject to an annual limitation due to the “change in ownership” provisions of the Internal Revenue Code of 1986, as amended, and similar state provisions. In fiscal 2018 we generated approximately \$3.8 million of excess federal research credits which are expected to be utilized fully in future tax years. We also have available excess California state research credit of approximately \$14.1 million. The California state research credit does not have an expiration date; however, based on enacted law and expected future cash taxes, we have recorded a valuation allowance of \$14.1 million.

A reconciliation of the provision for income taxes, with the amount computed by applying the U.S. federal statutory income tax rate (21% in fiscal 2019, 24.5% in fiscal 2018, and 35% in fiscal 2017) to income before provision for income taxes for fiscal 2019, 2018 and 2017 is shown below:

	Year Ended September 30,		
	2019	2018 As Adjusted	2017 As Adjusted
	(In thousands)		
Income tax provision at U.S. federal statutory rate	\$ 45,375	\$ 38,495	\$ 54,699
State income taxes, net of U.S. federal benefit	4,194	2,755	2,072
Foreign tax rate differential	839	(649)	(4,082)
Intercompany interest	—	—	(477)
Research credits	(5,761)	(3,486)	(2,572)
Domestic production deduction	—	(2,421)	(2,759)
Amended returns/audit settlements/statute expirations	(2,268)	(2,349)	(1,296)
Foreign	11,177	4,040	935
Valuation allowance	(333)	1,907	2,512
Foreign tax credit	(464)	1,320	(1,342)
Excess tax benefits relating to stock-based compensation	(24,891)	(22,253)	(24,746)
Tax effect of the Tax Act	—	16,719	—
Other	(3,920)	(3,628)	(75)
Recorded income tax provision	<u>\$ 23,948</u>	<u>\$ 30,450</u>	<u>\$ 22,869</u>

The decrease in our income tax provision in fiscal 2019 compared to fiscal 2018 is due to the decrease in the overall federal tax rate from the blended 24.5% in fiscal 2018 to 21% in fiscal 2019 and the recording of several one-time items in fiscal 2018 related to the enactment of the Tax Act.

The increase in our income tax provision in fiscal 2018 compared to fiscal 2017 was primarily due to recording the impact related to the enactment of the Tax Act in fiscal 2018. This includes re-measurement to our

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

deferred for the tax rate changes, the one-time deemed repatriation transition tax, and the loss of deductibility of performance-based compensation for certain employees.

As of September 30, 2019, we have approximately \$95.6 million of unremitted earnings of non-U.S. subsidiaries. The Company generates substantial cash flow in the U.S. and does not have a current need for the cash to be returned to the U.S. from the foreign entities. In the event these earnings are later remitted to the U.S., any estimated withholding tax on remittance of those earnings is expected to be immaterial to the income tax provision.

**Unrecognized Tax Benefit for Uncertain Tax Positions**

We conduct business globally and, as a result, file income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business, we are subject to examination by taxing authorities. With a few exceptions, we are no longer subject to U.S. federal, state, local, or foreign income tax examinations for fiscal years prior to 2015. We are currently under audit by South Carolina and New York State for fiscal years 2016, 2017 and 2018. We do not anticipate any adjustments related to those audits that will result in a material change to our consolidated financial statements.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	<b>Year Ended September 30,</b>		
	<b>2019</b>	<b>2018</b>	<b>2017</b>
	<b>(In thousands)</b>		
Gross unrecognized tax benefits at beginning of year	\$6,113	\$ 6,480	\$ 6,799
Gross increases for tax positions in prior years	509	404	57
Gross decreases for tax positions in prior years	(611)	—	(19)
Gross increases based on tax positions related to the current year	1,439	1,625	1,291
Decreases for settlements and payments	(637)	—	(151)
Decreases due to statute expiration	(979)	(2,396)	(1,497)
Gross unrecognized tax benefits at end of year	<u>\$5,834</u>	<u>\$ 6,113</u>	<u>\$ 6,480</u>

We had \$5.8 million of total unrecognized tax benefits as of September 30, 2019, including \$5.7 million of tax benefits that, if recognized, would impact the effective tax rate. Although the timing and outcome of audit settlements are uncertain, it is unlikely there will be a reduction of the uncertain tax benefits in the next twelve months.

We recognize interest expense related to unrecognized tax benefits and penalties as part of the provision for income taxes in our consolidated statements of income and comprehensive income. We recognize interest earned related to income tax matters as interest income in our consolidated statements of income and comprehensive income. As of September 30, 2019, we have accrued interest of \$0.3 million related to the unrecognized tax benefits.

**13. Stock-Based Employee Benefit Plans**

*Description of Stock Option and Share Plans*

We maintain the 2012 Long-Term Incentive Plan (the “2012 Plan”) under which we are authorized to issue equity awards, including stock options, stock appreciation rights, restricted stock awards, stock unit awards and

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

other stock-based awards. All employees, consultants and advisors of FICO or any subsidiary, as well as all non-employee directors are eligible to receive awards under the 2012 Plan. We also have awards currently outstanding under the 1992 Long-Term Incentive Plan, which was adopted in February 1992 and expired in February 2012. Stock option awards have a maximum term of seven years. In general, stock option awards and restricted stock unit awards not subject to market or performance conditions vest annually over four years. Restricted stock unit awards subject to market or performance conditions vest annually over three years based on the achievement of specified criteria. At September 30, 2019, there were 4,259,396 shares available for issuance under the 2012 Plan.

***Description of Employee Stock Purchase Plan***

On February 28, 2019 our shareholders approved the adoption of the 2019 Employee Stock Purchase Plan (the “2019 Purchase Plan”). The 2019 Purchase Plan authorizes the issuance of up to 1,000,000 shares of common stock to eligible employees. Employees may have up to 15% of their eligible pay withheld through payroll deductions to purchase FICO common stock during semi-annual offering periods. The purchase price of the stock is 85% of the closing sales price on the last trading day of each offering period. Offering period means approximately six-month periods commencing (a) on the first trading day on or after September 1 and terminating on the last trading day in the following February, and (b) on the first trading day on or after March 1 and terminating on the last trading day in the following August. At September 30, 2019, there were 1,000,000 shares available for issuance under the 2019 Purchase Plan.

We satisfy stock option exercises, vesting of restricted stock units and the 2019 Purchase Plan issuances from treasury shares.

***Share-Based Compensation Expense and Related Income Tax Benefits***

We recorded share-based compensation expense of \$83.0 million, \$74.8 million and \$61.2 million in fiscal years 2019, 2018 and 2017, respectively. The total tax benefit related to this share-based compensation expense was \$12.5 million, \$15.7 million and \$20.4 million in fiscal 2019, 2018 and 2017, respectively. As of September 30, 2019, there was \$122.7 million of total unrecognized compensation cost related to non-vested share-based compensation arrangements granted under all equity compensation plans. Total unrecognized compensation cost will be adjusted for future changes in estimated forfeitures. We expect to recognize that cost over a weighted average period of 2.41 years.

In fiscal 2019 we received \$22.8 million in cash from stock option exercises, with the tax benefit realized for the tax deductions from these exercises of \$23.3 million.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

***Stock-Based Activity***

*Stock Options*

We estimate the fair value of stock options granted using the Black-Scholes option valuation model and we amortize the fair value on a straight-line basis over the vesting period. We used the following assumptions to estimate the fair value of our stock options during fiscal 2019, 2018 and 2017:

	<u>Year Ended September 30,</u>		
	<u>2019</u>	<u>2018</u>	<u>2017</u>
<b>Stock Options:</b>			
Weighted average expected term (years)	4.26	4.78	5.00
Expected volatility (range)	31.1 - 32.4%	33.6 - 35.1%	35.3%
Weighted average volatility	32.2%	34.6%	35.3%
Risk-free interest rate (range)	2.50 - 2.68%	2.03 - 2.65%	2.02%
Weighted average expected dividend yield	— %	— %	0.07%
Expected dividend yield (range)	— %	— %	0.07%

*Expected Volatility.* We estimate the volatility of our common stock at the date of grant based on a combination of the implied volatility of publicly traded options on our common stock and our historical volatility rate.

*Expected Term.* The expected term represents the period that our stock options are expected to be outstanding. We estimate the expected term based on historical experience of similar awards, giving consideration to the contractual terms of the stock-based awards, vesting schedules and expectations of future employee behavior.

*Dividends.* In fiscal 2017 the dividend yield assumption was based on historical dividend payments, which were discontinued in May 2017.

*Risk-Free Interest Rate.* The risk-free interest rate assumption is based on observed interest rates appropriate for the term of our employee options.

*Forfeitures.* We use historical data to estimate pre-vesting option forfeitures and record share-based compensation expense only for those awards that are expected to vest.

The following table summarizes option activity during fiscal 2019:

	<u>Shares</u>	<u>Weighted- average Exercise Price</u>	<u>Weighted- average Remaining Contractual Term</u>	<u>Aggregate Intrinsic Value</u>
	(In thousands)		(In years)	(In thousands)
Outstanding at October 1, 2018	996	\$ 63.13		
Granted	81	196.43		
Exercised	(456)	50.03		
Forfeited	(5)	178.09		
Outstanding at September 30, 2019	<u>616</u>	\$ 89.36	<u>2.76</u>	<u>\$131,921</u>
Exercisable at September 30, 2019	<u>533</u>	\$ 73.89	<u>2.25</u>	<u>\$122,381</u>
Vested and expected to vest at September 30, 2019	<u>613</u>	\$ 88.84	<u>2.74</u>	<u>\$131,509</u>

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

The weighted average fair value of options granted were \$59.63, \$56.61 and \$43.80 during fiscal 2019, 2018 and 2017, respectively. The aggregate intrinsic value of options outstanding at September 30, 2019 was calculated as the difference between the exercise price of the underlying options and the market price of our common stock for the 0.6 million outstanding shares, which had exercise prices lower than the \$303.52 market price of our common stock at September 30, 2019. The total intrinsic value of options exercised was \$99.1 million, \$41.4 million and \$27.0 million during fiscal 2019, 2018 and 2017, respectively, determined as of the date of exercise.

**Restricted Stock Units**

The fair value of restricted stock units (“RSUs”) granted is the closing market price of our common stock on the date of grant, adjusted for the expected dividend yield, if applicable. We amortize the fair value on a straight-line basis over the vesting period.

The following table summarizes the RSUs activity during fiscal 2019:

	<u>Shares</u>	<u>Weighted-average Grant-date Fair Value</u>
	(In thousands)	
Outstanding at October 1, 2018	1,113	\$127.34
Granted	370	206.29
Released	(448)	118.73
Forfeited	<u>(37)</u>	140.17
Outstanding at September 30, 2019	<u>998</u>	\$159.99

The weighted average fair value of the RSUs granted were \$206.29, \$161.85 and \$122.47 during fiscal 2019, 2018 and 2017, respectively. The total intrinsic value of the RSUs that vested was \$91.2 million, \$70.7 million and \$58.7 million during fiscal 2019, 2018 and 2017, respectively, determined as of the date of vesting.

**Performance Share Units**

Performance share units (“PSUs”) are granted to our senior officers and earned based on pre-established performance goals approved by the Leadership Development and Compensation Committee of our Board of Directors for any given performance period. The range of payout is zero to 200% of the number of granted PSUs, based on the outcome of the performance conditions. We estimate the fair value of the PSUs using the closing market price of our common stock on the date of grant, adjusted for the expected dividend yield if applicable, based on the performance condition that is probable of achievement. We amortize the fair values over the requisite service period for each vesting tranche of the award. We reassess the probability at each reporting period and recognize the cumulative effect of the change in estimate in the period of change.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

The following table summarizes the PSUs activity during fiscal 2019:

	<u>Shares</u>	<u>Weighted-average Grant-date Fair Value</u>
	(In thousands)	
Outstanding at October 1, 2018	210	\$133.76
Granted	91	185.05
Released	(106)	123.04
Outstanding at September 30, 2019	<u>195</u>	<u>\$163.38</u>

The weighted average fair value of the PSUs granted were \$185.05, \$157.17 and \$121.30 during fiscal 2019, 2018 and 2017, respectively. The total intrinsic value of the PSUs that vested was \$19.3 million, \$15.1 million and \$16.6 million during fiscal 2019, 2018 and 2017, respectively, determined as of the date of vesting.

**Market Share Units**

Market share units (“MSUs”) are granted to our senior officers and earned based on our total stockholder return relative to the Russell 3000 Index over performance periods of one, two and three years. We estimate the fair value of MSUs granted using the Monte Carlo valuation model and amortize the fair values over the requisite service period for each vesting tranche of the award. In addition, we do not reverse the compensation cost solely because the market condition is not satisfied, and the award is therefore not earned by the employee, provided the requisite service is rendered. We used the following assumptions to estimate the fair value of our MSUs during fiscal 2019, 2018 and 2017:

	<u>Year Ended September 30,</u>		
	<u>2019</u>	<u>2018</u>	<u>2017</u>
Expected volatility in FICO’s stock price	24.6%	24.6%	27.4%
Expected volatility in Russell 3000 Index	12.8%	12.7%	13.6%
Correlation between FICO and the Russell 3000 Index	66.6%	63.1%	59.8%
Risk-free interest rate	2.73%	1.92%	1.40%
Average expected dividend yield	— %	— %	0.07%

The expected volatility was determined based on daily historical movements in our stock price and the Russell 3000 Index for the three years preceding the grant date. The correlation between FICO and the Russell 3000 Index was determined based on historical daily stock price movements for the three years preceding the grant date. The dividend yield was determined using the historical dividend payout and a trailing twelve-month closing stock price on the grant date for fiscal 2017, and in May 2017 we discontinued dividend payments. The risk-free rate was determined based on U.S. Treasury zero-coupon yields over the three-year performance period.

The following table summarizes the MSUs activity during fiscal 2019:

	<u>Shares</u>	<u>Weighted-average Grant-date Fair Value</u>
	(In thousands)	
Outstanding at October 1, 2018	114	\$159.34
Granted	105	169.46
Released	(119)	143.57
Outstanding at September 30, 2019	<u>100</u>	<u>\$188.63</u>

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

The weighted average fair value of the MSUs granted were \$169.46, \$151.78 and \$108.09 during fiscal 2019, 2018 and 2017, respectively. The total intrinsic value of the MSUs that vested was \$21.6 million, \$18.7 million and \$20.2 million during fiscal 2019, 2018 and 2017, respectively, determined as of the date of vesting.

**Employee Stock Purchase Plan**

The compensation expense on the employee stock purchase plan arises from the 15% discount offered to participants. As our first semi-annual offering period started on September 1, 2019, no shares have been purchased as of September 30, 2019.

**14. Earnings per Share**

The following table presents reconciliations for the numerators and denominators of basic and diluted earnings per share (“EPS”) during fiscal 2019, 2018 and 2017:

	Year Ended September 30,		
	2019	2018	2017
	As Adjusted	As Adjusted	As Adjusted
	(In thousands, except per share data)		
Numerator for basic and diluted earnings per share — net income	\$192,124	\$126,482	\$133,414
Denominator — share:			
Basic weighted-average shares	28,980	29,711	30,862
Effect of dilutive securities	1,314	1,469	1,383
Diluted weighted-average shares	30,294	31,180	32,245
Earnings per share:			
Basic	\$ 6.63	\$ 4.26	\$ 4.32
Diluted	\$ 6.34	\$ 4.06	\$ 4.14

The computation of diluted EPS excludes options to purchase approximately 4,000, 5,000, and 8,000 shares of common stock for fiscal 2019, 2018 and 2017, respectively, because the exercise prices of the options exceeded the average market price of our common stock in these fiscal years and their inclusion would be antidilutive.

**15. Segment Information**

We are organized into the following three operating segments, each of which is a reportable segment, to align with internal management of our worldwide business operations based on product offerings.

- *Applications.* This segment includes pre-configured decision management applications designed for a specific type of business problem or process — such as marketing, account origination, customer management, fraud, collections and insurance claims management — as well as associated professional services. These applications are available to our customers as on-premises software, and many are available as hosted, SaaS applications through the FICO® Analytic Cloud or third-party public clouds, such as those provided by AWS.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

- *Scores.* This segment includes our business-to-business scoring solutions, our myFICO® solutions for consumers and associated professional services. Our scoring solutions give our clients access to analytics that can be easily integrated into their transaction streams and decision-making processes. Our scoring solutions are distributed through major credit reporting agencies, as well as services through which we provide our scores to clients directly.
- *Decision Management Software.* This segment is composed of analytic and decision management software tools that clients can use to create their own custom decision management applications, our FICO® Decision Management Suite, as well as associated professional services. These tools are available to our customers as on-premises software or through the FICO® Analytic Cloud or third-party public clouds, such as those provided by AWS.

Our Chief Executive Officer evaluates segment financial performance based on segment revenues and segment operating income. Segment operating expenses consist of direct and indirect costs principally related to personnel, facilities, consulting, travel and depreciation. Indirect costs are allocated to the segments generally based on relative segment revenues, fixed rates established by management based upon estimated expense contribution levels and other assumptions that management considers reasonable. We do not allocate broad-based incentive expense, share-based compensation expense, restructuring and acquisition-related expense, amortization expense, various corporate charges and certain other income and expense measures to our segments. These income and expense items are not allocated because they are not considered in evaluating the segment's operating performance. Our Chief Executive Officer does not evaluate the financial performance of each segment based on its respective assets or capital expenditures; rather, depreciation amounts are allocated to the segments from their internal cost centers as described above.

The following tables summarize segment information for fiscal 2019, 2018 and 2017:

	Year Ended September 30, 2019				Total
	Applications	Scores	Decision Management Software (In thousands)	Unallocated Corporate Expenses

Total	<u>\$53,027</u>	<u>100%</u>	<u>\$48,837</u>	<u>100%</u>

## 16. Contract Balances and Performance Obligations

### *Contract Balances*

We record a receivable when we satisfy a performance obligation prior to invoicing if only the passage of time is required before payment is due or if we have an unconditional right to consideration before we satisfy a performance obligation. We record a contract asset when we satisfy a performance obligation prior to invoicing but our right to consideration is conditional. We record deferred revenue when the payment is made or due before we satisfy a performance obligation.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

Receivables at September 30, 2019 and 2018 consisted of the following:

	September 30,	
	2019	2018 As Adjusted
	(In thousands)	
Billed	\$206,714	\$196,960
Unbilled	127,651	73,221
	334,365	270,181
Less: allowance for doubtful accounts	(2,568)	(3,439)
Net receivables (*)	\$331,797	\$266,742

(\*) Included short-term receivables of \$297.4 million and long-term receivables of \$34.4 million that were recorded in accounts receivable, net and other assets, respectively, within the accompanying consolidated balance sheets at September 30, 2019. Long-term receivables were not material at September 30, 2018.

Activity in the allowance for doubtful accounts was as follows:

	Year Ended September 30,	
	2019	2018
	(In thousands)	
Balance, beginning of year	\$ 3,439	\$2,941
Add: expense	518	623
Less: write-offs (net of recoveries)	(1,389)	(125)
Balance, end of year	\$ 2,568	\$3,439

Contract assets balance at September 30, 2019 and 2018 was immaterial.

Deferred revenue primarily relates to our maintenance and SaaS contracts billed annually in advance and generally recognized ratably over the term of the service period. Significant changes in the deferred revenues balances are as follows:

	Year Ended September 30,	
	2019	2018 As Adjusted
	(In thousands)	
Deferred revenues, beginning balance	\$108,118	\$114,729
Revenue recognized that was included in the deferred revenues balance at the beginning of the period	(93,265)	(83,125)
Increases due to billings, excluding amounts recognized as revenue during the period	101,467	76,514
Deferred revenues, ending balance (*)	\$116,320	\$108,118

(\*) Ending balance at September 30, 2019 included current portion of \$111.0 million and long-term portion of \$5.3 million that were recorded in deferred revenue and other liabilities, respectively, within the consolidated balance sheets. Ending balance at September 30, 2018 included current portion of \$103.3 million and long-term portion of \$4.8 million that were recorded in deferred revenue and other liabilities, respectively, within the consolidated balance sheets.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

Payment terms and conditions vary by contract type, although terms generally include a requirement of payment within 30 to 60 days. In instances where the timing of revenue recognition differs from the timing of invoicing, we have determined our contracts generally do not include a significant financing component. The primary purpose of our invoicing terms is to provide customers with simplified and predictable ways of purchasing our products and services, not to provide customers with financing or to receive financing from our customers. Examples include multi-year on-premises licenses that are invoiced annually with revenue recognized upfront, and invoicing at the beginning of a subscription term with revenue recognized ratably over the contract period.

***Performance Obligations***

The following table includes estimated revenue expected to be recognized in the future related to performance obligations that are unsatisfied (or partially unsatisfied) at the end of the reporting period:

<u>Year Ending September 30,</u>	<u>Performance Obligations</u> (In thousands)
2020	\$ 84,022
2021	66,809
2022	39,960
2023	26,188
2024	16,512
Thereafter	4,879
Total	<u>\$238,370</u>

We apply the optional exemption that permits the omission of information about remaining performance obligations that have original expected durations of one year or less. We also applied the transition practical expedient that permits the omission of prior-period information about our performance obligations.

**17. Commitments**

We occupy the majority of our facilities under non-cancelable operating leases with lease terms in excess of one year. Such facility leases generally provide for annual increases based upon the Consumer Price Index or fixed increments. Rent expense under operating leases, including month-to-month leases, totaled \$21.6 million, \$19.8 million and \$18.6 million during fiscal 2019, 2018 and 2017, respectively.

We have also entered into capital lease commitments for certain computer equipment. Property acquired through capital leases and the associated depreciation of these assets is included in property and equipment on our consolidated balance sheets. The current portion and long-term portion of our capital lease obligations is reported in other accrued liabilities and other liabilities, respectively within the accompanying consolidated balance sheets.

In the ordinary course of business, we enter into contractual purchase obligations and other agreements that are legally binding and specify certain minimum payment terms.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

Minimum future commitments under our non-cancelable leases and other obligations were as follows at September 30, 2019:

<u>Year Ending September 30,</u>	<u>Future Minimum Lease Commitments</u>		<u>Other Commitments</u>
	<u>Capital Leases</u>	<u>Operating Leases</u>	
	(In thousands)		
2020	\$1,935	\$ 19,842	\$7,000
2021	1,934	19,969	—
2022	1,934	17,677	—
2023	—	16,940	—
2024	—	14,887	—
Thereafter	—	24,431	—
Total	<u>\$5,803</u>	<u>\$113,746</u>	<u>\$7,000</u>

We are also a party to a management agreement with 24 of our executives providing for certain payments and other benefits in the event of a qualified change in control of FICO, coupled with a termination of the officer during the following year.

#### **18. Contingencies**

We are in disputes with certain customers regarding amounts owed in connection with the sale of certain of our products and services. We also have had claims asserted by former employees relating to compensation and other employment matters. We are also involved in various other claims and legal actions arising in the ordinary course of business. We record litigation accruals for legal matters which are both probable and estimable. For legal proceedings for which there is a reasonable possibility of loss (meaning those losses for which the likelihood is more than remote but less than probable), we have determined we do not have material exposure on an aggregate basis.

#### **19. Guarantees**

In the ordinary course of business, we are not subject to potential obligations under guarantees, except for standard indemnification and warranty provisions that are contained within many of our customer license and service agreements and certain supplier agreements, including underwriter agreements, as well as standard indemnification agreements that we have executed with certain of our officers and directors, and give rise only to the disclosure in the consolidated financial statements. In addition, we continue to monitor the conditions that are subject to the guarantees and indemnifications to identify whether it is probable that a loss has occurred, and would recognize any such losses under the guarantees and indemnifications when those losses are estimable.

Indemnification and warranty provisions contained within our customer license and service agreements and certain supplier agreements are generally consistent with those prevalent in our industry. The duration of our product warranties generally does not exceed 90 days following delivery of our products. We have not incurred significant obligations under customer indemnification or warranty provisions historically and do not expect to incur significant obligations in the future. Accordingly, we do not maintain accruals for potential customer indemnification or warranty-related obligations. The indemnification agreements that we have executed with certain of our officers and directors would require us to indemnify such officers and directors in certain instances. We have not incurred obligations under these indemnification agreements historically and do not expect to incur significant obligations in the future. Accordingly, we do not maintain accruals for potential officer or director indemnification obligations. The maximum potential amount of future payments that we could be required to make under the indemnification provisions in our customer license and service agreements, and officer and director agreements is unlimited.

**FAIR ISAAC CORPORATION**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**Years Ended September 30, 2019, 2018 and 2017**

**20. Supplementary Financial Data (Unaudited)**

The following table presents selected unaudited consolidated financial results for each of the eight quarters in the two-year period ended September 30, 2019. In the opinion of management, this unaudited information has been prepared on the same basis as the audited information and includes all adjustments (consisting of only normal recurring adjustments, except as noted below) necessary for a fair statement of the consolidated financial information for the period presented.

	Quarter Ended			
	September 30, 2019	June 30, 2019	March 31, 2019	December 31, 2018
	(In thousands, except per share data)			
Revenues	\$305,344	\$314,249	\$278,234	\$262,256
Cost of revenues (1)	87,996	87,215	85,568	76,066
Gross profit	<u>217,348</u>	<u>227,034</u>	<u>192,666</u>	<u>186,190</u>
Net income	<u>\$ 54,584</u>	<u>\$ 64,152</u>	<u>\$ 33,381</u>	<u>\$ 40,007</u>
Earnings per share (2):				
Basic	<u>\$ 1.89</u>	<u>\$ 2.21</u>	<u>\$ 1.15</u>	<u>\$ 1.38</u>
Diluted	<u>\$ 1.80</u>	<u>\$ 2.12</u>	<u>\$ 1.10</u>	<u>\$ 1.32</u>
Shares used in computing earnings per share:				
Basic	28,918	28,967	29,074	28,961
Diluted	30,290	30,292	30,259	30,336

	Quarter Ended			
	September 30, 2018 As Adjusted	June 30, 2018 As Adjusted	March 31, 2018 As Adjusted	December 31, 2017 As Adjusted
	(In thousands, except per share data)			
Revenues	\$256,532	\$254,993	\$256,260	\$232,361
Cost of revenues (1)	79,962	79,011	79,493	74,432
Gross profit	<u>176,570</u>	<u>175,982</u>	<u>176,767</u>	<u>157,929</u>
Net income	<u>\$ 32,713</u>	<u>\$ 29,721</u>	<u>\$ 31,169</u>	<u>\$ 32,879</u>
Earnings per share (2):		3		
Basic	<u>\$ 1.13</u>	<u>\$ 1.00</u>	<u>\$ 1.04</u>	<u>\$ 1.09</u>
Diluted	<u>\$ 1.07</u>	<u>\$ 0.95</u>	<u>\$ 1.00</u>	<u>\$ 1.04</u>
Shares used in computing earnings per share:				
Basic	29,077	29,708	29,985	30,078
Diluted	30,702	31,161	31,300	31,561

- (1) Cost of revenues excludes amortization expense of \$0.5 million, \$0.5 million, \$0.5 million, \$0.5 million, \$0.5 million, \$0.6 million, \$0.6 million and \$0.7 million for the quarters ended September 30, 2019, June 30, 2019, March 31, 2019, December 31, 2018, September 30, 2018, June 30, 2018, March 31, 2018 and December 31, 2017, respectively.
- (2) Earnings per share is computed independently for each of the quarters presented. Therefore, the sum of the quarterly per share amounts may not equal the totals for the respective years.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure**

Not applicable.

**Item 9A. Controls and Procedures**

**Evaluation of Disclosure Controls and Procedures**

An evaluation was carried out under the supervision and with the participation of FICO’s management, including the Chief Executive Officer (“CEO”) and Chief Financial Officer (“CFO”), of the effectiveness of the design and operation of FICO’s disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)) as of the end of the period covered by this annual report. Based on that evaluation, the CEO and CFO have concluded that FICO’s disclosure controls and procedures are effective to ensure that information required to be disclosed by FICO in reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms. In addition, the disclosure controls and procedures ensure that information required to be disclosed is accumulated and communicated to management, including the CEO and CFO, allowing timely decisions regarding required disclosure.

**Changes in Internal Control over Financial Reporting**

Beginning on October 1, 2018, we implemented ASU 2014-09 and, as a result, we also implemented changes to our controls related to revenue. These included the development of new policies, enhanced contract review processes, and other ongoing monitoring activities. These controls were designed to provide assurance at a reasonable level of the fair presentation of our consolidated financial statements and related disclosures. There was no other change in FICO’s internal control over financial reporting was identified in connection with the evaluation required by Rules 13a-15 or 15d-15 of the Exchange Act that occurred during the year ended September 30, 2019, that has materially affected, or is reasonably likely to materially affect, FICO’s internal control over financial reporting.

**Management’s Report on Internal Control over Financial Reporting**

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act. Under the supervision and with the participation of management, including our CEO and CFO, we conducted an evaluation of the effectiveness of our internal control over financial reporting as of September 30, 2019 based on the guidelines established in *Internal Control — Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this evaluation management has concluded that our internal control over financial reporting was effective as of September 30, 2019.

Deloitte & Touche LLP, an independent registered public accounting firm that audited the consolidated financial statements included in this Annual Report on Form 10-K, has also audited the effectiveness of our internal control over financial reporting as of September 30, 2019, as stated in their attestation report included in Part II, Item 8 of this Annual Report on Form 10-K.

**Item 9B. Other Information**

Not applicable.

## PART III
